medieval mathematics For example Pythagoras theorem the double false position rules Hero s formulae and Ruffini Harner s method are found almost everywhere As far as the reasoning used to obtain these results is concerned the fact that it is difficult to find rational justifications in the original texts has led to the reconstitution of proofs using appropriate tools of present day elementary algebra Consequently the conclusion that Chinese mathematics is of a fundamentally algebraic nature has been ventured However in recent decades new studies particularly in China and Japan have adopted a different approach to the original texts in that they have considered the Chinese modes of reasoning as these can be deduced from the rare texts which contain justifications By studying the results and the methods explicitly mentioned in these texts hand in hand this Chinese and Japanese research has attempted to reconstruct the conceptions of ancient authors within a given culture and period without necessarily involving the convenient but often distorting social and conceptual framework of present day mathematics

Chinese Books and Documents in the Jesuit Archives in Rome Albert Chan,2002 Book Review
Righting Canada's Wrongs: The Chinese Head Tax Arlene Chan,2014-10-20 The first Chinese immigrants arrived in Canada in the mid 1800s searching for gold and a better life They found jobs in forestry mining and other resource industries But life in Canada was difficult and the immigrants had to face racism and cultural barriers Thousands were recruited to work building the Canadian Pacific Railway Once the railway was finished Canadian governments and many Canadians wanted the Chinese to go away The government took measures to stop immigration from China to Canada Starting in 1885 the government imposed a Head Tax with the goal of stopping immigration from China In 1923 a ban was imposed that lasted to 1947 Despite this hostility and racism Chinese Canadian citizens built lives for themselves and persisted in protesting official discrimination In June 2006 Prime Minister Harper apologized to Chinese Canadians for the former racist policies of the Canadian government Through historical photographs documents and first person narratives from Chinese Canadians who experienced the Head Tax or who were children of Head Tax payers this book offers a full account of the injustice of this period in Canadian history It documents how this official racism was confronted and finally acknowledged

Chinese Literature in Transition from Antiquity to the Middle Ages Donald Holzman,2024-12-11 This volume aims to account for the tremendous changes in the attitudes towards the world and towards themselves that can be seen in the works of Chinese writers in the early centuries of the Christian era How do the massive conversion of such a large part of the population to Buddhism and the widespread development of the Daoist religion correspond to the conversion of the West to Christianity Does this conversion to new religions that were replacing the ancient imperial religions represent similar developments on the eastern and western fringes of the Old World Can we speak with any confidence of the gradual evolution of China from an Antiquity to a Middle Ages The author attempts to show that in their attitudes towards literature and their appreciation of landscape during the Han and the first four centuries of the Christian era we can see signs of a turning inward and the birth of new forms of spirituality akin to those that arose in the West during
