A Bibliography of Matrix Isolation Spectroscopy David Warren Ball, 1988 **Biographies of Scientists for Sci-Tech Libraries** Tony Stankus, 2019-12-05 This book first published in 1991 is an invaluable guide to biographies of scientists from a wide variety of scientific fields The books selected for this highly descriptive bibliography help librarians shatter readers stereotypes of scientists as monomaniacal and uninteresting people by providing interesting and provocative titles to capture the interest of students and other readers The biographies included in this very special bibliography were carefully selected for their humour and human insights to give future scientists encouragement inspiration and an understanding of the origins of particular scientific fields These biographies are unique in that they explore the whole personality of the scientist giving students a glimpse at the variety and drama of the lives beyond well known contributions or Nobel prize accomplishments CRC Handbook of Organic Photochemistry and Photobiology, Volumes 1 & 2 William M. Horspool, Francesco Lenci, 2003-09-29 The second edition of this best selling handbook is bigger more comprehensive and now completely current In addition to thorough updates to the discussions featured in the first edition this edition includes 66 new chapters that reflect recent developments new applications and emerging areas of interest Within the handbook 145 critically r Low Temperature Molecular Spectroscopy Rui Fausto, 2013-11-11 Molecular spectroscopy has achieved rapid and significant progress in recent years the low temperature techniques in particular having proved very useful for the study of reactive species phase transitions molecular clusters and crystals superconductors and semiconductors biochemical systems astrophysical problems etc The widening range of applications has been accompanied by significant improvements in experimental methods and low temperature molecular spectroscopy has been revealed as the best technique in many cases to establish the connection between experiment and theoretical calculations This in turn has led to a rapidly increasing ability to predict molecular spectroscopic properties The combination of an advanced tutorial standpoint with an emphasis on recent advances and new perspectives in both experimental and theoretical molecular spectroscopy contained in this book offers the reader insight into a wide range of techniques particular emphasis being given to supersonic jet and matrix isolation techniques spectroscopy in cryogenic solutions including liquid noble gases and in both crystalline and amorphous states Suitable quantum chemical methods are also considered as are empirically based force field methods for calculating spectra of large molecular systems The wide range of topics covered includes molecular dynamics and reactivity time resolved and high resolution spectroscopy conformational analysis hydrogen bonding and solvent effects structure and dynamics of weakly bound complexes transition metal and organic photochemistry spectroscopy of excited states ab initio prediction of molecular spectra and biochemical and astrophysical applications **Supercritical Inert Gas Matrix Isolation Spectroscopy of Fullerenes and Other Model Compounds** Steven Anderson Clarke, 2000 Low-Temperature Chemistry of the Atmosphere Geert K. are authoritative and up to date assessments of the homogenous and heterogenous chemical and physical processes occurring in the troposphere and stratosphere especially during the ozone hole event The book begins with an overview of atmospheric chemistry followed by reviews of relevant homogenous reactions in the gas phase and the microphysics and physical chemistry of heterogenous processes that occur on or in aerosols rain and ice Low temperature laboratory studies are compared with related fieldwork measurements particularly in relation to the formation and composition of polar stratospheric clouds Also discussed are measurements in glacial ice Finally chemical modelling of the troposphere and stratosphere including heterogenous processes is reviewed
