A concise introduction to the Western tradition in art. Janson's Basic History of Art provides readers with a beautifully illustrated and masterfully concise introduction to the Western tradition of art history. The text centers discussions around the object, its manufacture, and its visual character. It considers the contribution of the artist as an important part of the analysis. This edition creates a narrative of how art has changed over time in the cultures that Europe has claimed as its patrimony and that Americans have claimed through their connection to Europe. Janson's Basic History of Western Art continues to maintain separate chapters on the Northern European Renaissance, the Italian Renaissance, and the High Renaissance, with stylistic divisions for key periods of the modern era. The 9th edition brings some exciting changes. For the first time, Janson's Basic History of Western Art comes with MyArtsLab, which provides students with an interactive learning experience. Also, the text incorporates new learning objectives, graphics, and maps throughout. In response to reviewer's requests, this new edition expands the coverage of Islamic art into its own chapter. MyArtsLab is an integral part of the Davies et al. program. Key learning applications include Art 21 and Studio Technique videos, 360-degree architectural panoramas and simulations, and Closer Look tours. A better teaching and learning experience. Williams, 2018-12-13. What is the place of architecture in the history of art? Why has it been at times central to the discipline and at other times seemingly so marginal? What is its place now? Many disciplines have a stake in the history of architecture: sociology, anthropology, human geography, to name a few. This book deals with perhaps the most influential tradition of all: art history, examining how the relation between the disciplines of art history and architectural history has waxed and waned over the last one hundred and fifty years. In this highly original study, Mark Crinson and Richard J. Williams point to a decline in the importance attributed to the role of architecture in art history over the last century, which has happened without crisis or self-reflection. The book explores the problem in relation to key art historical approaches: from formalism to feminism to the social history of art, and in key institutions from the Museum of Modern Art to the journal *October*. Among the key thinkers explored

are Banham Baxandall Giedion Panofsky Pevsner Pollock Riegl Rowe Steinberg Wittkower and W Ifflin The book will provoke debate on the historiography and present state of the discipline of art history and it makes a powerful case for the reconsideration of architecture
