G. Wells, 2023-12-29 This Illustrated version of the A Short

History of the world contains about 300 Illustrated picture and many historic objects A Short History of the world by E Kitap projesi Illustrated version by Murat Ukray THE story of our world is a story that is still very imperfectly known A couple of hundred years ago men possessed the history of little more than the last three thousand years What happened before that time was a matter of legend and speculation Over a large part of the civilized world it was believed and taught that the world had been created suddenly in 4004 B C though authorities differed as to whether this had occurred in the spring or autumn of that year This fantastically precise misconception was based upon a too literal interpretation of the Hebrew Bible and upon rather arbitrary theological assumptions connected therewith Such ideas have long since been abandoned by religious teachers and it is universally recognized that the universe in which we live has to all appearances existed for an enormous period of time and possibly for endless time Of course there may be deception in these appearances as a room may be made to seem endless by putting mirrors facing each other at either end But that the universe in which we live has existed only for six or seven thousand years may be regarded as an altogether exploded idea Also added IN the last fifty years there has been much very fine and interesting speculation on the part of scientific men upon the age and origin of our earth Here we cannot pretend to give even a summary of such speculations because they involve the most subtle mathematical and physical considerations The truth is that the physical and astronomical sciences are still too undeveloped as yet to make anything of the sort more than an illustrative guesswork The general tendency has been to make the estimated age of our globe longer and longer It now seems probable that the earth has had an independent existence as a spinning planet flying round and round the sun for a longer period than 2 000 000 000 years It may have been much longer than that This is a length of time that absolutely overpowers the imagination
