Intellectual Property: Law and Policy Charlotte Waelde, Graeme Laurie, Abbe Brown, Smita Kheria, Jane Cornwell, 2014

This textbook provides an account of intellectual property law The underlying policies influencing the direction of the law are explained and explored and contemporary issues facing the discipline are tackled head on The international and European dimensions are covered together with the domestic position Continuity and Change in Contemporary Capitalism Herbert

Kitschelt, 1999-01-13 In the early 1980s many observers argued that powerful organized economic interests and social democratic parties created successful mixed economies promoting economic growth full employment and a modicum of social equality The present book assembles scholars with formidable expertise in the study of advanced capitalist politics and political economy to reexamine this account from the vantage point of the second half of the 1990s The authors find that the conventional wisdom no longer adequately reflects the political and economic realities Advanced democracies have responded in path dependent fashion to such novel challenges as technological change intensifying international competition new social conflict and the erosion of established patterns of political mobilization The book rejects however the currently widespread expectation that internationalization makes all democracies converge on similar political and economic institutions and power relations Diversity among capitalist democracies persists though in a different fashion than in the Golden Age of rapid economic growth after World War II Contemporary Issues in Development Finance Joshua Yindenaba

Environment Marjolein van Asselt, Michelle Everson, Ellen Vos, 2013-10-30 The trade conflicts that the EU has faced within the EU or WTO context demonstrate that the question of how to balance trade and other societal values in situations of uncertainty has not been solved by the regulatory model evolved by the EU in the aftermath of the BSE crisis one which privileges processes of depoliticisation and scientification This book addresses the current key dilemmas around science law and the regulation of trade both on a regime level and in the context of particular industrial sectors e g pharmaceuticals climate change and nanotechnology It will present possible future research avenues by looking at both theory and practice and learning from various disciplines law and social sciences legal realities WTO USA and EU and actors regulators stakeholders courts Accountability in the Contemporary Constitution Nicholas Bamforth, Peter Leyland, 2013-11-14

Accountability is regarded as a central feature of modern constitutionalism At a general level this prominence is perhaps unsurprising given the long history of the idea However in many constitutional democracies including the UK and the USA it has acquired a particular resonance in contemporary circumstances with the declining power of social deference the expanding reach of populist accountability mechanisms and the increasing willingness of citizens to find mechanisms for challenging official decision making These essays by public law scholars seek to explore how ideas of and mechanisms associated with accountability play a part in the contemporary constitution While the majority of contributors concentrate on the United Kingdom others provide comparative discussion with particular reference to the United States and aspects of European Union law The main focus of the volume is the contemporary UK constitution Chapters are included which analyse the historical context including the role of Dicey common law constitutionalism the constitutional role of Parliament the constitutional role of the courts judicial accountability human rights protection under the constitution and the contribution of non judicial accountability mechanisms Further chapters explore the public service principle the impact of new public management on public service delivery and the relationship between accountability and regulation Finally accountability is discussed in the light of constitutional reform including the challenges posed by the multi layered government at the supra national level of EU membership and sub national national levels of devolution and local government **Integrated**
