Contributions To Aegean Archaeology Studies In Honor Of William A Mcdonald:

Animal Sacrifice in the Ancient Greek World Sarah Hitch,Ian Rutherford,2017-08-24 This volume brings together studies on Greek animal sacrifice by foremost experts in Greek language literature and material culture Readers will benefit from the synthesis of new evidence and approaches with a re evaluation of twentieth century theories on sacrifice The chapters range across the whole of antiquity and go beyond the Greek world to consider possible influences in Hittite Anatolia and Egypt while an introduction to the burgeoning science of osteo archaeology is provided The twentieth century emphasis on sacrifice as part of the Classical Greek polis system is challenged through consideration of various ancient perspectives on sacrifice as distinct from specific political or even Greek contexts Many previously unexplored topics are covered particularly the type of animals sacrificed and the spectrum of sacrificial ritual from libations to lasting memorials of the ritual in art [Animal Sacrifice in Ancient Greek Religion, Judaism, and Christianity, 100 BC to AD 200](#) Maria-Zoe

Petropoulou,2008-03-06 A study of animal sacrifice within Greek paganism Judaism and Christianity during the period of their interaction between about 100 BC and AD 200 After a vivid account of the realities of sacrifice in the Greek East and in the Jerusalem Temple up to AD 70 Maria Zoe Petropoulou explores the attitudes of early Christians towards this practice Contrary to other studies in this area she demonstrates that the process by which Christianity finally separated its own cultic code from the strong tradition of animal sacrifice was a slow and difficult one Petropoulou places special emphasis on the fact that Christians gave completely new meanings to the term sacrifice She also explores the question why if animal sacrifice was of prime importance in the eastern Mediterranean at this time Christians should ultimately have rejected it

The Oxford Handbook of the European Iron Age Colin Haselgrove,Katharina Rebay-Salisbury,Peter S. Wells,2023-09-22 The Oxford Handbook of the European Iron Age presents a broad overview of current understanding of the archaeology of Europe from 1000 BC through to the early historic periods exploiting the large quantities of new evidence yielded by the upsurge in archaeological research and excavation on this period over the last thirty years Three introductory chapters situate the reader in the times and the environments of Iron Age Europe Fourteen regional chapters provide accessible syntheses of developments in different parts of the continent from Ireland and Spain in the west to the borders with Asia in the east from Scandinavia in the north to the Mediterranean shores in the south Twenty six thematic chapters examine different aspects of Iron Age archaeology in greater depth from lifeways economy and complexity to identity ritual and expression Among the many topics explored are agricultural systems settlements landscape monuments iron smelting and forging production of textiles politics demography gender migration funerary practices social and religious rituals coinage and literacy and art and design [The Mediterranean Diet](#) Antonia-Leda Matalas,Antonis Zampelas,Vassilis Stavrinou,2001-01-23 Adults living in certain olive growing areas of the Mediterranean Basin display high life expectancies and rates of chronic disease that are among the lowest in the world These benefits are achieved despite socioeconomic

indicators that are often much lower than those of more industrial nations in North America and Europe Attention has focused on **The Oxford Handbook of Animals in Classical Thought and Life** Gordon Lindsay Campbell, 2014-08-28 The Oxford Handbook of Animals in Classical Thought and Life is the first comprehensive guide to animals in the ancient world encompassing all aspects of the topic by featuring authoritative chapters on 33 topics by leading scholars in their fields As well as an introduction to and a survey of each topic it provides guidance on further reading for those who wish to study a particular area in greater depth Both the realities and the more theoretical aspects of the treatment of animals in ancient times are covered in chapters which explore the domestication of animals animal husbandry animals as pets Aesop's Fables and animals in classical art and comedy all of which closely examine the nature of human animal interaction More abstract and philosophical topics are also addressed including animal communication early ideas on the origin of species and philosophical vegetarianism and the notion of animal rights **The Talking Greeks** John Heath, 2005-05-12 When considering the question of what makes us human the ancient Greeks provided numerous suggestions This book argues that the defining criterion in the Hellenic world however was the most obvious one speech It explores how it was the capacity for authoritative speech which was held to separate humans from other animals gods from humans men from women Greeks from non Greeks citizens from slaves and the mundane from the heroic John Heath illustrates how Homer's epics trace the development of immature young men into adults managing speech in entirely human ways and how in Aeschylus Oresteia only human speech can disentangle man beast and god Plato's Dialogues are shown to reveal the consequences of Socratically imposed silence With its examination of the Greek focus on speech animalization and status this book offers new readings of key texts and provides significant insights into the Greek approach to understanding our world **New Directions in the Skeletal Biology of Greece** Lynne Alison Schepartz, Sherry C. Fox, Chryssi Bourbou, 2009 In addition to including stimulating case studies ranging in date from the Palaeolithic to modern periods the 17 chapters in this book provide an overview of bioarchaeological research across Greece and Cyprus **An Early Destruction in the Mycenaean Palace at Knossos** Jan Driessen, 1990 **Siren Feasts** Andrew Dalby, 2013-04-15 Cheese wine honey and olive oil four of Greece's best known contributions to culinary culture were already well known four thousand years ago Remains of honeycombs and of cheeses have been found under the volcanic ash of the Santorini eruption of 1627 BC Over the millennia Greek food diversified and absorbed neighbouring traditions yet retained its own distinctive character In Siren Feasts Andrew Dalby provides the first serious social history of Greek food He begins with the tunny fishers of the neolithic age and traces the story through the repertoire of classical Greece the reputations of Lydia for luxury and of Sicily and South Italy for sybaritism to the Imperial synthesis of varying traditions with a look forward to the Byzantine cuisine and the development of the modern Greek menu The apples of the Hesperides turn out to be lemons and great favour attaches to Byzantine biscuits Fully documented and comprehensively illustrated scholarly yet immensely readable Siren Feasts demonstrates the social construction placed upon

different types of food at different periods was fish a luxury item in classical Athens though disdained by Homeric heroes It places diet in an economic and agricultural context and it provides a history of mentalities in relation to a subject which no human being can ignore From Minoan Farmers to Roman Traders Άγγελος Χανιώτης,1999 A collection of sixteen papers focusing on the economic activities of prehistoric Classical Hellenistic and Roman Crete The wide ranging papers discuss the economy of prehistoric Crete social development production and symbolism in the pre Palatial and Palatial periods economic activities and social development in the Classical and Hellenistic periods coinage and minting and relationships with other polities of the Aegean and east Mediterranean Oil, Wine, and the Cultural Economy of Ancient Greece Catherine E. Pratt,2021-03-18 Provides a diachronic account of the changing roles of surplus oil and wine in the economies of pre classical Greek societies **Zooarchaeology** Elizabeth J. Reitz,Elizabeth S. Wing,1999-02-04 Zooarchaeology is a detailed reference manual for students and professional archaeologists interested in identifying and analysing animal remains from archaeological sites Drawing on material from all over the world and covering a time span from the Pleistocene to the nineteenth century AD the emphasis is on animals whose remains inform us about many aspects of the relationships between humans and their natural and social environments especially site formation processes subsistence strategies and paleoenvironments The authors discuss suitable methods and theories for all vertebrate classes and molluscs and include hypothetical examples to demonstrate these There are extensive references and illustrations to help in the process of identification Contributions to Aegean Archaeology Nancy C. Wilkie,William D. E. Coulson,1985 Towards a Social Bioarchaeology of the Mycenaean Period Ioanna Moutafi,2021-06-09 This book investigates the complex relationship between funerary treatment and wider social dynamics through a contextual analysis of human skeletal remains and associated mortuary data from Voudeni an important Mycenaean 1450 1050 BC chamber tomb cemetery in Achaea Greece Voudeni is one of the most significant sites of Achaea thoroughly investigated under the direction of the Honorary General Director of Antiquities Dr Lazaros Kolonas Over 60 chamber tombs spanning the entire Late Helladic III period have been excavated yielding an unprecedented wealth of biocultural information This study explores the post mortem treatment of the body in the Voudeni cemetery through a novel interpretive approach that transcends unproductive cross disciplinary divisions This biosocial approach integrates traditional archaeology current reflections in mortuary archaeological theory and cutting edge bioarchaeological methods primarily focused on funerary taphonomy and archaeoethnology of commingled skeletal assemblages The author proposes that the most effective route to explore the social dimensions of mortuary data is through an emic understanding of historically situated actions and experiences both of the living actors the mourners and of the dead themselves Human skeletal remains are used as the primary strand of evidence both as the object of the acts of the living and the subject of their own lived experiences Most importantly this study aspires to show how reconciliation between abstract theoretical advances and empirical biocultural data may be possible providing the most insightful path to a better

understanding of the archaeological mortuary record The book provides a thorough background on Mycenaean mortuary research and explores the topic in successive stages a theoretical and methodological framework b detailed taphonomic analysis and osteological results of 20 tombs c multivariate analysis of bio cultural data across socio temporal parameters with special emphasis on the distinction between the palatial LHIIIA B and the transitional post palatial LHIIIC period and d final synthesis addressing questions pertaining to changing social conditions in Achaea and key issues of current Mycenaean mortuary research These include tomb re use form diversity sequence and frequency of mortuary activities mortality profiles differential inclusion visibility and funerary treatment of different groups identities changes in treatment of the dead body reflecting shifts in notions of the self and social relationships The results shed new light on social developments in Mycenaean Achaea showing that the complex interaction between changing social conditions and mortuary practice is often reflected in subtle yet meaningful shifts of emphasis in the post mortem treatment of bodies and bones rather than in blatant radical changes

The Archaeometallurgy of the Asian Old World Vincent C. Pigott, 1999 Written by eminent scholars in the field this edited volume is the first to treat in a comprehensive manner the archaeology of metallurgy s origins focusing specifically on initial uses of copper and bronze as well as the coming of iron across Asia from the Eastern Mediterranean to the Far East It is a volume that should serve for some time to come as the source of the fundamental information upon which larger interpretations of metallurgical developments in Asia will be grounded MASCA research papers Vol 16 University Museum Monograph 89

Cueva Blanca Kent V. Flannery, Frank Hole, 2019-04-02 Cueva Blanca lies in a volcanic tuff cliff some 4 km northwest of Mitla Oaxaca Mexico It is one of a series of Archaic sites excavated by Kent Flannery and Frank Hole as part of a project on the prehistory and human ecology of the Valley of Oaxaca The oldest stratigraphic level in Cueva Blanca yielded Late Pleistocene fauna including some species no longer present in southern Mexico The second oldest level Zone E produced Early Archaic material with calibrated dates as old as 11 000 10 000 BC Zones D and C provided a rich Late Archaic assemblage whose closest ties are with the Abejas phase of Puebla s Tehuacan Valley fourth millennium BC Spatial analyses undertaken on the Archaic living floors include 1 the drawing of density contours for tools and animal bones 2 a search for Archaic tool kits using rank order and cluster analysis and 3 an attempt to define Binfordian drop zones using an approach drawn from computer vision

Mycenaean Civilization Bryan Feuer, 2004-03-16 Classical Greeks considered the Mycenaean civilization to be the basis of their glorious and heroic heritage but its material existence was not confirmed until the excavations of Heinrich Schliemann in the late nineteenth century In the ensuing years as with the field of archaeology in general emphasis has shifted from revealing monuments and finding treasure to dealing with less glamorous more scientifically oriented investigations concerning aspects such as social and political organization economic functions and settlement patterns With its more than 2000 entries this reference work serves as both an introduction to and a summary of the study of ancient Mycenaean civilization Considerably expanded from the first edition there are 500 new entries

representing materials published since 1991 The largest part of the book is made up of annotated bibliography entries arranged topically with introductory material for each section The book also includes a general introduction to Mycenaean civilization a glossary and author place and subject indexes **Metallurgy** Philip P. Betancourt, Susan C.

Ferrence, 2011-12-31 Prof James D Muhly has enjoyed a distinguished career in the study of ancient history archaeology and metallurgy that includes an emeritus professorship at the University of Pennsylvania and a term as director of the American School of Classical Studies at Athens as well as receiving the Archaeological Institute of America's Pomerance Award for Scientific Contributions to Archaeology In Muhly's honor a total of 38 eminent scholars have contributed 30 articles that include topics on Bronze and Iron Age metallurgy around the Eastern Mediterranean in such places as Crete the Cyclades Cyprus and Turkey American Journal of Archaeology, 2000 *Maritime Archaeology* Lawrence E. Babits, Hans Van Tilburg, 2013-11-11 This volume initiates a new series of books on maritime or underwater archaeology and as the editor of the series I welcome its appearance with great excitement It is appropriate that the first book of the series is a collection of articles intended for graduate or undergraduate courses in underwater archaeology since the growth in academic opportunities for students is an important sign of the vitality of this subdiscipline The layman will enjoy the book as well Academic and public interest in shipwrecks and other submerged archaeological sites is indicated by a number of factors Every year there are 80 to 90 research papers presented at the Society for Historical Archaeology's Conference on Historical and Underwater Archaeology and the Proceedings are published Public interest is shown by extensive press coverage of shipwreck investigations One of the most important advances in recent years has been the passage of the Abandoned Shipwreck Act of 1987 for the first time providing national level law concerning underwater archaeological sites The legislation has withstood a number of legal challenges by commercial treasure salvors a very hopeful sign for the long term preservation of this nonrenewable type of cultural resource The underwater archaeological discoveries of 1995 were particularly noteworthy The Texas Historical Commission discovered the Belle one of La Salle's ships and the CSS Hunley was found by a joint project of South Carolina and a private nonprofit organization called NUMA
