Abused Child A Multidisciplinary Approach To Developmental Issues And Treatment:

The Abused Child Harold P. Martin, 1976 **Routledge Library Editions: Domestic Abuse** Various, 2021-03-11 This set of 7 volumes originally published between 1984 and 1998 provides illuminating and practical information on Domestic Abuse Aimed at both students and practitioners across a range of disciplines the volumes explore topics including provision of services for domestic abuse victims the law homelessness advice for those coming into contact with violence and victims of abuse public policy and the experience of domestic abuse victims themselves *Treatment for Abused and Neglected Children* Harold P. Martin, 1979 Treatment of Abused and Neglected Children is one in a series of manuals based on the Federal Standards for Child Abuse and Neglect Prevention and Treatment Programs and Projects This manual brings together current knowledge about the needs of abused and neglected children with some practical ideas and explanations of what can be done to meet those needs It is hoped that with this information identification and treatment planning for maltreated children will be more efficient and effective The manual is designed primarily for use by CPS workers but may also be used by other professionals dealing with child abuse and neglect **Handbook of Family Violence** Alan S. Bellack, Michel Hersen, R.L. Morrison, Vincent B. Van Hasselt, 2013-06-29 In the last decade there has been heightened clinical and investigative activity in the area of family violence This of course is partly attributable to recent surveys showing a high incidence of family violence in the United States For example there are indications that nearly 30% of married women in this country are victims of physical abuse by spouses at some point in their marriage Further FBI statistics show that approximately 13% of all homicides are husband wife killings Moreover it has been projected that such figures are likely to increase over the next several years Consistent with these trends funding of family violence research by both federal and private agencies has increased Indeed federal agencies such as the National Institute of Mental Health and the National Institute of Law Enforcement and Criminal Justice have provided considerable support for work in this area In addition family violence particularly wife battering child abuse and sexual abuse of children has been the focus of media attention at the national level and has generated intensive interest in both lay and professional publications Moreover there have been several recent governmental hearings and investigations regarding the prevalence of these problems *Child Abuse and Neglect: Research and Innovation* J. Leavitt, 2012-12-06 Proceedings of the NATO Advanced Study Institute Les Arcs France June 28 July 10 1982 *Treatment of Offenders and Families* Byrgen P. Finkelstein, 2013-11-19 First Published in 1995 This is Volume VI in the Child Abuse A Multidisciplinary Survey series The articles in this volume address the treatment of perpetrators of physical and sexual child abuse and neglect The articles in this volume provide many insights into the treatment of perpetrators of child maltreatment This title discusses that although there is still much to learn about treating offenders many programs seek to offer hope that prevention through treatment can be effective at stopping child abuse one perpetrator at a time **Emergency Psychiatry** Ellen L. Bassuk, 2012-12-06 This eagerly awaited volume occupies an

important place in the series Critical Issues in Psychiatry Most mental health professionals are quite at home with ordinary day to day crises of clinical practice but relatively unprepared for the true psychiatric emergency Such emergencies are too infrequent for most of us to experience a real sense of competence On the other hand emergency room psychiatrists as well as residents and other trainees have long wished for a truly comprehensive textbook that would cover the spectrum of emergency psychiatry This book is just such a definitive and comprehensive volume for the specialist while at the same time a clear succinct and comprehensive reference for the clinician of emergency care The authors consistently present a systematic model emphasizing the interconnection between the process of emergency intervention and the specific features of clinical crisis They are true to the principle that one's system of care should be built on priorities It is immediately apparent that these are highly experienced clinicians as well as teachers It is difficult to imagine a clinical situation that is not addressed by this book It includes chapters on triage assessment and treatment planning emergencies associated with all the various psychopathologies age groups from childhood to old age the emergency management of violent and suicidal patients as well as rape and disaster victims emergencies secondary to substance abuse and prescribed medications psychotherapeutic and psychopharmacologic intervention as well as the relevant legal social and community issues in emergency care

Theory and Research in Behavioral Pediatrics Hiram E. Fitzgerald, Barry M Lester, Michael W. Yogman, 2013-06-29 Volume I of Theory and Research in Behavioral Pediatrics focused on issues of early human development with special emphasis given to assessment of the preterm infant and to factors influencing the organization of the caregiver infant relationship Chapters in Volume 2 cover a broader range of topics and encompass a wider age span Chapter I provides a historical review of the relationship between developmental psychology and pediatrics The authors Barbara R Tinsley and Ross D Parke discuss differences between behavioral pediatrics and pediatric psychology and note that interdisciplinary collaboration in research and application has increased steadily in recent years However if similar collaborative efforts are

to occur in education and training of pediatricians and developmental psychologists it will be necessary to determine just what each discipline hopes to gain from such collaborative efforts Tinsley and Parke report the results of a national survey designed to determine the areas of developmental psychology that pediatricians perceive to be of potential benefit to them in their delivery of pediatric care Results of the survey suggest that there are many ways in which developmental psychology could be incorporated into the pediatric curriculum In many respects Chapter 2 sets the stage for the remaining chapters
