Ritual Embodiment in Modern Western Magic Damon

Zacharias Lycourinos, 2017-11-15 In the Western world magic has often functioned as an umbrella term for various religious beliefs and ritual practices that seek to influence events by harnessing supernatural power The definition of these myriad occult and esoteric traditions have however usually come from those that are opposed to its practice notably authorities in religious legal and intellectual spheres This book seeks to provide a new perspective directly from the practitioners of modern Western magic by exploring how a distinctive mode of embodiment and consciousness can produce a transition from an ordinary to a magical worldview Starting with an introduction to the study of magic in the Western academy the book then presents the author's own participant observation of five ethnographic case studies of modern Western magic The focus of these ethnographic case studies is directed towards ideas and methods the informants employ to self legitimise and self represent as magicians It concludes by discussing the phenomenological implications and issues around embodiment that are inherent to the contemporary practice of magic This is a unique insight into the lived experience of practitioners of modern magic As such it will be of keen interest to scholars of the Occult and New Religious Movements as well as Religious Studies academics examining issues around the embodiment and the anthropology of religion

Experiments in Holism Ton

Otto, Nils Bubandt, 2011-08-02 Experiments in Holism Experiments in Holism Theory and Practice in Contemporary Anthropology presents a series of essays that critically examine the ongoing relevance of holism and its theoretical and methodological potential in today's world Contributions from a diverse collection of leading anthropologists reveal how recent critiques of the holistic approach have not led to its wholesale rejection but rather to a panoply of experiments that critically reassess and reemploy holism The essays focus on aspects of holism including its utilization in current ethnographic research holistic considerations in cultural anthropology the French structuralist tradition the predominantly English tradition of social anthropology and many others Collectively the essays show how holism is simultaneously central to and problematically a part of the theory and practice of anthropology Experiments in Holism reveals how contemporary attempts to rescale and retool anthropology entail new ways of coming to terms with anthropology's heritage of holism seeking to obviate its current excesses while recapturing its critical potential to meet the challenges of our contemporary world

Representing Others Kate Sturge, 2014-06-03 Cultural anthropology has always been dependent on translation as a textual practice and it has often used translation as a metaphor to describe ethnography's processes of interpretation and cross cultural comparison Questions of intelligibility and representation are central to both translation studies and

ethnographic writing as are the dilemmas of cultural distance or proximity exoticism or appropriation Similarly recent work in museum studies discusses problems of representation that are raised by ethnographic museums as multimedia translations However as yet there has been remarkably little interdisciplinary exchange neither has translation studies kept up with the sophistication of anthropology's investigations of meaning representation and culture itself nor have anthropology and museum studies often looked to translation studies for analyses of language difference or concrete methods of tracing translation practices This book opens up an exciting field of study to translation scholars and suggests possible avenues of cross disciplinary collaboration

Functionalist Construction Work in Social Science Peter Sohlberg, 2021-03-31 An understanding of the complex consequences of social processes and social design activities necessitates a holistic systemic perspective systematised in the classic structural functional research tradition which is presented in Functionalist Construction Work in Social Science In contrast to fragmented discussions of functionalism and functional analyses the approach here covers a span ranging from ontological epistemological and primarily methodological aspects of functionalism The functionalist tradition in social science is placed in a historic context and problematised from a philosophy of science perspective Unique here is a detailed account of four classic functionalist research programmes with a discussion of functionalism not primarily as a worldview but as systematic knowledge generating research strategies In addition to descriptive and causal questions the importance of a further research question is demonstrated i.e. the identification of crucial problems of social organisation Functionalist research strategies and functional analysis are of interest for social scientists and students in sociology political science and social anthropology Moreover the book is relevant for researchers and students of philosophy of science and social science methodology

Coral Gardens and Their Magic Bronislaw Malinowski, 1935 **Language Topics** Ross Steele, Terry Threadgold, 1987-01-01 This second volume in honour of Michael Halliday contains three sections The Design of Language Text and Discourse and Exploring Language as Social Semiotic and concludes with a recent interview conducted by Paul Thibault in which Halliday provides further insights in his theory of language The essential design features of language are semantic lexico grammatical and phonological Text for Halliday is a semantic unit expressed by the lexico grammatical and phonological patterns in language The papers in the first section study aspects of these three strata of language and the relation between them The second section deals with units higher than the clause complex and the papers there attempt to integrate the analysis of the lexico grammatical and phonological systems into higher level discourse units The papers in the third section develop the notion of language as social semiotic which is central to Halliday's model of language
