English Dry-bodied Stoneware Diana Edwards, Rodney Hampson, 1998 English dry bodied stoneware was the ultimate ceramic expression of the neoclassical wave which erupted in England and on the Continent in the mid eighteenth century Initially basalt commanded the scene with its imposing black stoneware forms imitating Greek vases However it was Wedgwood s invention of the jasper body which was to be the tour de force associated with his name Wedgwood s jasper vases purchased by gentry and nobility alike were soon imitated by a myriad of potters This book is the first to explore the vast subject of English dry bodied stoneware with discussions on the antecedents of the eighteenth century neoclassical wares the red stonewares of the seventeenth century as well as the other bodies produced by Wedgwood and his contemporaries caneware white felspathic stoneware and of course the flagship of the Wedgwood name jasper The authors have for the first time utilised Wedgwood s surviving sales records from 1774 1794 and these have made it possible to allow for more specific dating of body types and forms as they correspond to the Wedgwood Shapes Books Three hundred and fifty black and white illustrations with seventy five color plates many shown here for the first time provide an invaluable guide to the identification of these wares Detailed research into the more than sixty other potteries concerned with the production of these handsome ornamental and useful stonewares makes this the most comprehensive reference book ever produced on the subject *The Pottery Gazette* , 1921 *British Pottery: The First 3000 Years* Alex Gibson, 2024-12-15 First comprehensive account of the sequence development and use of early prehistoric pottery in over 20 years Pottery was at the heart of the Neolithic package appearing in Britain with the first farmers around 4000 BC It arrived as a mature technology and was essential to the new largely sedentary lifestyle and economy It transformed storage and cooking

practices and the earliest ceramics seem to have been essential equipment in the new practice of dairying The pottery changed over time and as a result ceramics have been fundamental to the construction of relative chronologies since the early days of modern archaeology Even with the development of absolute dating techniques the role of pottery as a dating tool has not diminished but instead has become refined and more accurate But pottery is not just a tool for dating the past it also represents a facet of prehistoric art and expression Starting simply ceramics became arguably the main medium for display with often complex designs Simple techniques motifs and panels are combined to create highly decorated vessels often of great individuality The use of inlays pastes and slips added contrasting colours to these vibrant designs By the end of the Neolithic ceramics became one of the major grave goods of British prehistory acting as accompaniments to those that warranted formal burial whether by inhumation or cremation This practice continued throughout the Early Bronze Age to the extents that lacking contemporary domestic sites most of the corpora of Early Bronze Age ceramics are largely sepulchral in context As we increasingly realise that burial rituals may have been varied and complex so the roles of these ceramics are becoming all the more questioned This book traces the 3000 years of ceramic use and development in Britain charting the changing forms and decorative techniques and the differing and changing roles that pottery played within its contemporary society
