Olympiad examines these among other questions providing a range of original insights of interest to an array of scholars researchers and students from Sports Studies to Sociology Politics Economics International Relations and Legal Studies

English Lexicology Leonhard Lipka,2002 Ghosts in the Machine Christine Owen,2017-08-03 This book provides a socio cultural analysis of the ways in which air traffic controllers formally and informally learn about their work and the active role that organisational cultures play in shaping interpretation and meaning In particular it describes the significant role that organizational cultures have played in shaping what is valued by controllers about their work and its role as a filter in enabling or constraining conscious inquiry The premise of the book is that informal learning is just as important in shaping what people know and value about their work and that this area is frequently overlooked By using an interpretative research approach the book highlights the ways in which the social structure of work organisation culture and history interweaves with learning work to guide and shape what is regarded by controllers as important and what is not It demonstrates how this social construction is quite different from a top down corporate culture approach Technological and organizational reform is leading to changes in work practice and to changes in relationships between workers within the organization These have implications for anyone wishing to understand the dynamics of organizational life As such this study provides insights into many of the changes that are occurring in the nature of work in many different industries Previous research into learning in air traffic control has centred largely on cognitive individual performance performance within teams or more recently on performance at a systems level By tracing the role of context in shaping formal and informal learning this book shows why interventions at these levels sometimes fail The Concise Oxford Dictionary of Current English J.
