How one mother challenged the medical establishment and misconceptions about autistic children and their parents. In the early 1960s Massachusetts writer and homemaker Clara Park and her husband took their 3-year-old daughter Jessy to a specialist after noticing that she avoided connection with others. Following the conventional wisdom of the time, the psychiatrist diagnosed Jessy with autism and blamed Clara for Jessy's isolation. Experts claimed Clara was the prototypical refrigerator mother: a cold intellectual parent who starved her children of the natural affection they needed to develop properly. Refusing to accept this, Clara decided to document her daughter's behaviors and the family's engagement with her. In 1967 she published her groundbreaking memoir challenging the refrigerator mother theory and carefully documenting Jessy's development. Clara's insights and advocacy encouraged other parents to seek education and support for their autistic children. Meanwhile, Jessy would work hard to expand her mother's world and ours. Drawing on previously unexamined archival sources and firsthand interviews, science historian Marga Vicedo illuminates the story of how Clara Park and other parents fought against medical and popular attitudes toward autism while presenting a rich account of major scientific developments in the history of autism in the US. *Intelligent Love* is a fierce defense of a mother's right to love intelligently, the value of parents' firsthand knowledge about their children, and an individual's right to be valued by society *ChildDance* Diane Lynch Fraser, 2000. Imagine there is no one in the world with whom you can communicate. All your attempts to reach out and make sense in the world are thwarted because there is no one who understands your language. This is a normal event in child development. Yet the child with disabilities has less adaptive skills than other children her age. Attempts are more frustrating. To make matters worse, the whole circle of communication between adult and child becomes thwarted as parents and therapists, instead of reading nonverbal cues accurately, misjudge them and send the whole communication circle spiraling downward. The character, the pacing, the whole theatre of our play and movement with young children is extremely important. As we believe children must learn to speak, we adults, parents, and therapists must learn to play. It's not that adults are not well-meaning. Very many are. It's just that most adults have no idea how to be in the child's preverbal world. It is to this preverbal task that *ChildDance* is addressed. It describes one therapist's encounter with six different children with special needs, how child development theory and practice is woven together to form a fabric for preverbal communication **The Positive Side of Special Education**

Kenneth A. Kavale, Mark P. Mostert, 2004-06-21 This book provides a description of special education practices that have had significant impact but lacked scientific validation **Transition and Change in the Lives of People with Intellectual Disabilities** David May, 2000 This book presents the lives of people with intellectual disabilities as a series of transitions and offers us a view of the world that is as complex as any other The contributors have extensive research experience in this field and provide a comprehensive review of their research drawing out the implications for policy and practice **Books in Print** , 1994 Imagining Autism Sonya Freeman Loftis, 2015-12-01 A disorder that is only just beginning to find a place in disability studies and activism autism remains in large part a mystery giving rise to both fear and fascination Sonya Freeman Loftis's groundbreaking study examines literary representations of autism or autistic behavior to discover what impact they have had on cultural stereotypes autistic culture and the identity politics of autism Imagining Autism looks at fictional characters and an author or two widely understood as autistic ranging from Conan Doyle's Sherlock Holmes and Harper Lee's Boo Radley to Mark Haddon's boy detective Christopher Boone and Steig Larsson's Lisbeth Salander The silent figure trapped inside himself the savant made famous by his otherworldly intellect the brilliant detective linked to the criminal mastermind by their common neurology these characters become protean symbols stand ins for the chaotic forces of inspiration contagion and disorder They are also part of the imagined lives of the autistic argues Loftis sometimes for good sometimes threatening to undermine self identity and the activism of the autistic community
