

From the broad field of implicit cognition to
The automatic affective processing

Can be defined as the capacity for an organism to automatically distinguish external stimuli into two large dichotomic categories, good or bad, pleasant or unpleasant, positive or negative.

Many authors state that, at first, we can automatically evaluate stimuli of any kind

Le Doux (1996) call it "A quick and dirty process"

(Bargh, Litt, Pratto & Spielman, 1989; Fazio e al. 1986, Klauer, 1998; Öhman, 1987; Zajonc, 1980)

Automatic Affective Processing:

Automatic Affective Processing Jan De Houwer, 2001 This special issue provides an overview of some of the paradigms that are available to study automatic affective processing and presents the knowledge about affective processing that has been gained in recent years

Cognition and Emotion Jan De Houwer, Dirk Hermans, 2010-05-09 This book assembles a collection of state of the art reviews of the most important topics in cognition and emotion research emotion theories the perception and expression of emotion emotion regulation emotion and memory and emotion and attention

Cognition & Emotion Jan De Houwer, Dirk Hermans, 2010-05-09 Emotions are complex and multifaceted phenomena Although they have been examined from a variety of perspectives the study of the interaction between cognition and emotion has always occupied a unique position within emotion research Many philosophers and psychologists have been fascinated by the relationship between thinking and feeling During the past 30 years research on the relationship between cognition and emotion has boomed and so many studies on this topic have been published that it is difficult to keep track of the evidence This book fulfils the need for a review of the existing evidence on particular aspects of the interplay between cognition and emotion The book assembles a collection of state of the art reviews of the most important topics in cognition and emotion research emotion theories feeling and thinking the perception of emotion the expression of emotion emotion regulation emotion and memory and emotion and attention By bringing these reviews together this book presents a unique overview of the knowledge that has been generated in the past decades about the many and complex ways in which cognition and emotion interact As such it provides a useful tool for both students and researchers alike in the fields of social clinical and cognitive psychology

An Investigation of Automatic Affective Processing Elizabeth Amanda Martin, 2013 An important mechanism in emotional functioning is automatic affective processing In Study 1 people with schizophrenia n 48 and a non psychiatric comparison group n 28 completed an affective priming and cognitive priming task Relative to controls people with schizophrenia exhibited decreased affective priming but increased cognitive priming In addition decreased affective priming was associated with increased anhedonia In contrast increased cognitive priming was associated with increased disorganized and negative speech symptoms Overall these results suggest that there is an automatic affective processing deficit in schizophrenia and this deficit is related to anhedonia In Study 2 the neural correlates of automatic affective priming were investigated Undergraduate participants n 21 completed the affective priming task with 2 different consistency proportions CP 80 and 50 For the 50 CP condition there appeared to be evidence of increased controlled processing In particular comparing congruent trials in the 80 and 50 CP conditions there was less priming related decreases in inferior frontal and inferior temporal regions and increased activation in the dmPFC emotional conflict region for the 50 CP condition Overall these results suggest that automatic affective processing is associated with increased semantic priming and decreased emotional conflict

Forgas, 2013-12-19

This provocative book provides the first comprehensive and informative overview of the role of various subjective experiences in social cognition and behavior and argues that the study of such experiences may be one of the key unifying themes of social psychology Based on recent theoretical and empirical developments in the discipline this select group of leading international researchers surveys extensive evidence and shows that subjective experiences play a key role in most aspects of social cognition and social behavior The book contains five main sections discussing the role of subjective experiences in social information processing Part 1 their influence on memory Part 2 and their role in intergroup contexts Part 3 The role of affective experiences in social thinking and behavior is analyzed Part 4 and the influence of subjective experiences on the development and change of attitudes and stereotypes is also addressed Part 5 **The Handbook of Attitudes** Dolores Albarracín, Blair T. Johnson, Mark P. Zanna, 2014-04-04

This new handbook presents synthesizes and integrates the existing knowledge of methods theories and data in attitudes The editors goal is to promote an understanding of the broader principles underlying attitudes across several disciplines Divided into three parts one on definitions and methods another on the relations of attitudes with beliefs behavior and affect and a final one that integrates these relations into the broader areas of cognitive processes communication and persuasion social influence and applications the handbook also features an innovative chapter on implicit versus explicit attitudes With contributions from the top specialists this handbook features unique collaborations between researchers some who have never before worked together Every writer was encouraged to work from as unbiased a perspective as possible A must have for researchers in the areas of social political health clinical

counseling and consumer psychology marketing and communication the handbook will also serve as an excellent reference for advanced courses on attitudes in a variety of departments

Social Psychology and the Unconscious John A. Bargh, 2013-05-13 Evidence is mounting that we are not as in control of our judgments and behavior as we think we are. Unconscious or automatic forms of psychological and behavioral processes are those of which we tend to be unaware that occur without our intention or consent yet influence us on a daily basis in profound ways. Automatic processes influence our likes and dislikes for almost everything as well as how we perceive other people such as when we make stereotypic assumptions about someone based on their race or gender or social class. Even more strikingly, the latest research is showing that the aspects of life that are the richest experience and most important to us such as emotions and our close relationships as well as the pursuit of our important life tasks and goals also have substantial unconscious components.

Social Psychology and the Unconscious: The Automaticity of Higher Mental Processes offers a state of the art review of the evidence and theory supporting the existence and the significance of automatic processes in our daily lives with chapters by the leading researchers in this field today across a spectrum of psychological phenomena from emotions and motivations to social judgment and behavior. The volume provides an introduction and overview of these now central topics to graduate students and researchers in social psychology and a range of allied disciplines with an interest in human behavior and the unconscious such as cognitive psychology, philosophy of mind, political science and business.
