Record ,1996-05 **Biologising the Social Sciences** David Canter,David Turner,2015-02-20 You can hardly open a paper or read an academic journal without some attempt to explain an aspect of human behaviour or experience by reference to neuroscience biological or evolutionary processes This biologising has had rather a free ride until now being generally accepted by the public at large However there is a growing number of scholars who are challenging the assumption that we are little more than our bodies and animal origins This volume brings together a review of these emerging critiques expressed by an international range of senior academics from across the social sciences Their arguments are firmly based in the empirical scientific tradition They show the lack of logic or evidence for many biologising claims as well as the damaging effects these biological assumptions can have on issues such as dealing with dyslexia or treating alcoholism This important book originally published as a special issue of Contemporary Social Science contributes to a crucial debate on what it means to be human This collection of articles by David Canter and his colleagues rigorously argued and richly informative are of immense importance It is astonishing that as Canter puts it in his brilliant overview of biologising trends there are those in the humanities who need to be reminded that human beings can talk and interact with each other generating cultures and societies that have an existence that cannot be reduced to their mere mechanical parts Professor Raymond Tallis FRCP FMedSci DLitt LittD in the Preface **The British National Bibliography** Arthur James Wells,1996 **Addictions** William M. Meil,John A. Mills,2021-10-13 This book addresses the diagnosis and treatment of drug addiction Chapters in this book span biological psychological cultural and health based perspectives and emphasize meeting people as they really are in order to obtain tangible advances in clinical practice These works represent the integration of the past present and likely future directions of both diagnosis and treatment Addiction is an individual and systemic challenge to society and scientific advances and cultural diversity are highlighted here as paths forward towards addressing current diagnostic and treatment obstacles **Addictions** Barbara S. McCrady,Elizabeth E. Epstein,2013-10-03 Addictions A Comprehensive Guidebook Second Edition features a roster of senior scientists covering the latest findings in the study of alcohol and other drug use abuse and dependence *Translation of Addictions Science Into Practice* Peter M. Miller,David Kavanagh,2011-04-28 Recent advances in the understanding of the genetic neurochemical behavioral and cultural underpinnings of addiction have led to rapid advances in the understanding of addiction as a disease In fact advances in basic science and the development of new pharmacological and behavioral therapies associated with them are appearing faster than can be assimilated not only by clinical researchers but practitioners and policy makers as well Translation of science based addictions knowledge into improved prevention assessment and treatment and communication of these changes to researchers and practitioners are significant challenges to the field The general aim of Translation of Addictions Science Into Practice is to summarize current and potential linkages between advances in addiction science and innovations in clinical practice Whilst this book is primarily focused on translation it also encompasses some scientific advances that are relevant to dissemination and the book is itself a

tool for disseminating innovative thinking The goal is to generate interest in application opportunities from both recent research and theoretical advances Provides a much needed resource for translating current research into clinical practice Focuses upon alcohol tobacco and substance abuse addictions Addresses method of research and best dissemination techniques
