Contemporary Issues in The Balkans, Middle East, Asia & Africa Nesrin Kenar,2022-08-22

This book entitled Contemporary Issues in The Balkans Middle East Asia Africa consists of various topics and intends to focus on contemporary issues in The Balkans Middle East Asia Africa The content of this book was created on a regional basis because the crises and conflicts in the international arena are mostly experienced between the states in the same region and emerge as a result of the regional balance of power and regional dynamics in the region which is also called the geographical subsystem *Global Issues in Language, Education and Development* Naz Rassool,Kathleen Heugh,Sabiha

Mansoor,2007-01-01 This book examines the role that language in education policy historically has played in shaping possibilities for development within countries in the Sub Saharan and South Asian regions This discussion takes account also of the complex ways in which language education and development are linked to the changing global labour market Key questions are raised regarding the impact of international policy imperatives on development possibilities *The Contemporary Commonwealth* James Mayall,2009-09-25 This collection of essays has been assembled to mark the centenary of The Round Table It provides an analysis of the modern Commonwealth since the establishment of the Secretariat in 1965 Providing an overview of the contemporary Commonwealth this book places the organization in its rich historical context while assessing its achievements failures and prospects The volume is divided into two parts Part I concentrates on a series of themes dealing with the structure and functioning of the Commonwealth and its major activities including the work of the secretary general and secretariat its championing of the interests of small states human rights and the world economy Part II adopts a regional perspective identifying the impact of the Commonwealth on regional relations generally and particular problems that affect these relations It also examines the ways in which the Commonwealth sometimes reinforces regional loyalties and interests but also the extent to which these have also reduced the importance of the Commonwealth in the foreign policy of its member states The Contemporary Commonwealth will be of interest to students and scholars of international politics and international organisations practitioners journalists and those working in NGOs involved in Commonwealth affairs This collection of essays is intended as a companion volume to *The Commonwealth and International Affairs* edited by Alex May marking the centenary of The Round Table **New Perspectives on Pakistan's Political**

Economy Matthew McCartney,S. Akbar Zaidi,2019-09-19 This volume makes a major intervention in the debates around the nature of the political economy of Pakistan focusing on its contemporary social dynamics This is the first comprehensive academic analysis of Pakistan s political economy after thirty five years and addresses issues of state class and society examining gender the middle classes the media the bazaar economy urban spaces and the new elite The book goes beyond

the contemporary obsession with terrorism and extremism political Islam and simple civilian military relations and looks at modern day Pakistan through the lens of varied academic disciplines It not only brings together new work by some emerging scholars but also formulates a new political economy for the country reflecting the contemporary reality and diversification in the social sciences in Pakistan The chapters dynamically and dialectically capture emergent processes and trends in framing Pakistan s political economy and invite scholars to engage with and move beyond these concerns and issues

Contemporary Issues in African Administration and Development Politics ,1990 *Contemporary Issues in Politics & International Relations* Nesrin Kenar,2021-12-26 Conflict is a phenomenon as old as human history Although the actors and reasons have changed conflicts have occurred in every period of history In the pre Cold War era conflicts in the international system were experienced between states The conflicts during the Cold War mainly were interstate conflicts arising from the rivalry between the two blocs In this period it was expected that the threat to the security of a state would come from outside the borders of the state and from other states For this reason all the regulations made by the League of Nations which was established at the end of the First World War and the United Nations which was established after the Second World War to protect international peace and security included the measures to be taken against the attack or threat of attack by one state against another state However the developments that took place right after the end of the Cold War confirmed that the risk of interstate conflict decreased and new security threats emerged in this period The conflicts that emerged in the post Cold War period were separatist conflicts due to ethnic and religious reasons such as the former Yugoslavia and Georgia or intra border conflicts that occurred for other reasons such as in Syria Upon the inadequacy of international organizations and international law to intervene in intra border conflicts the concept of security was redefined and a transformation from the security of the state to the security of the individual took place New security threats such as environmental security human security food security terrorism weapons of mass destruction and pandemics have been identified One of the reasons for the decrease in conflicts between states in the post Cold War period is that states mostly use soft power instead of military force in achieving their foreign policy goals The structure of the international system is also a dynamic that affects conflicts After the end of the bipolar system the transformation of the international system is not yet complete One of the most critical problems in today's world is the competition and struggle between states to become the future superpower While the US wants the current status quo to continue China is trying to change the status quo in its favour The European Union is to become the dominant power in the international system after its transformation in the post Cold War period

Saha,2004-01-01 Today new and ever more pernicious forms of terrorist violence threaten the world Because these new forms of violence are so often linked to religious radicalism modern terrorism has challenged the secular ethics of contemporary civil society There is a pressing need to understand modern religious movements that have added militancy and belligerence as fundamental elements of religious practice Contributors to this volume painstakingly tackle the question of how to define the contours of current religious fundamentalism as they examine the private and public postures of fundamentalist rhetoric the importance of its regional variants and the damage it can do to regional and national education systems Their analysis tracks trends in religious movements that aspire to radicalize reform and violently topple governments and nations while highlighting the difference between fundamentalist interpretations and other longstanding juridical political and intellectual traditions
