Anthropologists and Indians in the New South Rachel Bonney, J. Anthony Paredes, 2001-10 Choice Outstanding Academic Title for 2002 A clear assessment of the growing mutual respect and strengthening bond between modern Native Americans and the researchers who explore their past Southern Indians have experienced much change in the last half of the 20th century In rapid succession since World War II they have passed through the testing field of land claims litigation begun in the 1950s played upon or retreated from the civil rights movement of the 1960s seen the proliferation of wannabe Indian groups in the 1970s and created innovative tribal enterprises such as high stakes bingo and gambling casinos in the 1980s The Native American Graves Protection and Repatriation Act of 1990 stimulated a cultural renewal resulting in tribal museums and heritage programs and a rapprochement with their western kinsmen removed in Old South days Anthropology in the South has changed too moving forward at the cutting edge of academic theory This collection of essays reflects both that which has endured and that which has changed in the anthropological embrace of Indians from the New South Beginning as an invited session at the 30th anniversary meeting of the Southern Anthropological Society held in 1996 the collection includes papers by linguists archaeologists and physical anthropologists as well as comments from Native Americans This broad scope of

inquiry ranging in subject from the Maya of Florida presumed biology and alcohol related problems to pow wow dancing Mobilian linguistics and the lost Indian ancestor myth results in a volume valuable to students professionals and libraries Anthropologists and Indians in the New South is a clear assessment of the growing mutual respect and strengthening bond between modern Native Americans and the researchers who explore their past

Physical Anthropology Peter Neal Peregrine, Carol R. Ember, Melvin Ember, 2002 The carefully selected works in this collection help readers understand the methods practices and experiences of some of the top physical anthropologists working in the field today Each article reflects the contributors experiences insights and opinions in a lively semi autobiographical manner Conveys not only what contributors found but how they found it and what the experience was like Brings the experiences and insights of active scholars to practical research matters Introduces basic concepts of biological evolution and evolutionary theory Explores our australopithecine and early human ancestors and considers how and why humans evolved Considers both the nature and causes of physical variation among contemporary peoples For anyone interested in learning more about physical anthropology its methods and discoveries

The Soul of Theological Anthropology Joshua R. Farris, 2016-11-25 Recent research in the philosophy of religion anthropology and philosophy of mind has prompted the need for a more integrated comprehensive and systematic theology of human nature This project constructively develops a theological accounting of human persons by drawing from a Cartesian as a term of art model of anthropology which is motivated by a long tradition As was common among patristics medievals and Reformed Scholastics Farris draws from philosophical resources to articulate Christian doctrine as he approaches theological anthropology Exploring a substance dualism model the author highlights relevant theological texts and passages of Scripture arguing that this model accounts for doctrinal essentials concerning theological anthropology While Farris is not explicitly interested in thorough critique of materialist ontology he notes some of the significant problems associated with it Rather the present project is an attempt to revitalize the resources found in Cartesianism by responding to some common worries associated with it

Shakespeare / Skin Ruben Espinosa, 2024-07-11 This volume offers a comprehensive array of readings of skin in Shakespeare's works a term that embraces the human and animal noun and verb Shakespeare Skin departs from previous studies as it deliberately and often explicitly engages with issues of social and racial justice Each of the chapters interrogates and centres skin in relation to areas of expertise that include performance studies aesthetics animal studies religious studies queer theory Indigenous studies history food studies border studies postcolonial studies Black feminism disease studies and pedagogy By considering contemporary understandings of skin this volume examines how the literature of the early modern past creates paths to constructing racial hierarchies With contributors from the USA UK South Africa India Sri Lanka Singapore and Australia chapters are informed by an array of histories shedding light on how skin was understood in Shakespeare's time and at key moments during the past 400 years in different media and cultures Chapters include considerations of plays such as Titus Andronicus The

Tempest and A Midsummer Night's Dream and work by Borderlands Theater Los Colochos and Satyajit Ray among many others For researchers and instructors this book will help to shape teaching and inform research through its modelling of antiracist critical practice Collectively the chapters in this collection allow us to consider how sustained attention to skin via cross historical and innovative approaches can reveal to us the various uses of Shakespeare that shed light on the fraught nature of our interrelatedness They set a path for readers to consider how much skin they have in the game when it comes to challenging structures of racism

Introductory Readings in Anthropology Hilary Callan, Brian Street, Simon Underdown, 2013-05 Anthropology seeks to understand the roots of our common humanity the diversity of cultures and world views and the organisation of social relations and practices As a method of inquiry it embraces an enormous range of topics and as a discipline it covers a multitude of fields and themes as shown in this selection of original writings As an accessible entry point for upper level students and first year undergraduates new to the study of anthropology this reader also offers guidance for teachers in exploring the subject's riches with their students That anthropology is an immensely expansive inquiry of study is demonstrated by the diversity of its topics from nature conservation campaigns to witchcraft beliefs from human evolution to fashion and style and from the repatriation of indigenous human remains to research on literacy There is no single story of anthropology Taken together these fundamental readings are evidence of a contemporary vibrant subject that has much to tell us about all the worlds in which we live

Synesthesia Lynn C. Robertson, Noam Sagiv, 2005 Owing to its bizarre nature and its implications for understanding how brains work synesthesia has recently received a lot of attention in the popular press and motivated a great deal of research and discussion among scientists The questions generated by these two communities are intriguing Does the synesthetic phenomenon require awareness and attention How does a feature that is not present become bound to one that is Does synesthesia develop or is it hard wired Should it change our way of thinking about perceptual experience in general What is its value in understanding perceptual systems as a whole This volume brings together a distinguished group of investigators from diverse backgrounds among them neuroscientists novelists and synesthetes themselves who provide fascinating answers to these questions Although each approaches synesthesia from a very different perspective and each was curious about and investigated synesthesia for very different reasons the similarities between their work cannot be ignored The research presented in this volume demonstrates that it is no longer reasonable to ask whether or not synesthesia is real we must now ask how we can account for it from cognitive neurobiological developmental and evolutionary perspectives This book will be important reading for any scientist interested in brain and mind not to mention synesthetes themselves and others who might be wondering what all the fuss is about

Africa in World History Erik Gilbert, Jonathan T. Reynolds, 2004 This groundbreaking text is the first to examine Africa in the wider context of world history The authors show that Africans not only have shaped their own destiny but also have played a central role in a number of grand narratives of global history In doing so the text encourages readers to reconsider

many popular or oversimplified myths regarding Africa and Africans and to explore the many issues controversies and debate within the field of African study With numerous maps full color photos primary sources timelines and a lively engaging narrative Africa in World History is as vibrant and multifaceted as the continent itself [Catalog of Copyright Entries.
