## Contemporary German Philosophy Volume 4:

**Contemporary German Philosophy**, 1984     The Limits of Disenchantment Peter Dews, 1995 In this book Peter Dews explores some of the most urgent problems confronting contemporary European thought the status of the subject after postmodernism the ethical and existential dimensions of critical theory the encounter between psychoanalysis and philosophy and the possibilities of a non foundational metaphysical thinking His approach cuts across the hostile boundaries which that usually separate different theoretical traditions Lacan and the Frankfurt School are brought into dialogue as are deconstruction and Ricoeur s hermeneutics Current questions of language communication and critique are located in a broader context as the author ranges back over the history of modern philosophy from poststructuralism via Nietzsche to German romanticism and idealism A wide variety of issues is discussed in the book including Habermas s views on the ethics of nature Lacan s theory of Oedipal crisis the relation between writing and the lifeworld in Derrida and Schelling s philosophy of the Ages of the World The volume is also enlivened by forceful critiques of a range of currently influential thinkers including Michel Foucault Richard Rorty Rodolphe Gasch and Slavoj Zizek     Critique of Forms of Life Rahel Jaeggi, 2018-12-03 For liberals the question Do others live rightly seems to demand a follow up question Who am I to judge Peaceful coexistence in this view is predicated on restraint from morally evaluating our peers But Rahel Jaeggi argues that criticizing is not only valid but also useful Moral judgment is no error the error lies in how we go about it     **Oakeshott on History** Luke O'Sullivan, 2015-10-15 This book challenges the common view that Michael Oakeshott was mainly important as a political philosopher by offering the first comprehensive study of his ideas on history It argues that Oakeshott s writings on the philosophy of history mark him out as the most successful of the philosophers who attempted to establish historical study as an autonomous form of thought during the twentieth century It also contends that his work on the history of political thought is best seen in the context of debates over the origins of the liberal state For the first time extensive use has been made of unpublished material in the collection of Oakeshott s papers at the LSE resulting in an intellectual biography that should be of interest both to first time students and those already familiar with his published works     The Reduction of Physical Theories Erhard Scheibe, 2022-06-30 Using simple physical examples this work by Erhard Scheibe presents an important and powerful approach to the reduction of physical theories Novel to the approach is that it is not based as usual on a single reduction concept that is fixed once and for all but on a series of recursively constructed reductions with which all reductions appear as combinations of very specific elementary reductions This leaves the general notion of theory reduction initially open and is beneficial for the treatment of the difficult cases of reduction from the fields of special and general relativity thermodynamics statistical mechanics and quantum mechanics which are treated in the second volume The book is systematically organized and intended for readers interested in philosophy of science as well as physicists without deep philosophical knowledge     **Goethe's Way of Science** David Seamon, Arthur Zajonc, Professor of Physics Arthur

Zajonc,1998-01-01 Examines Goethe's neglected but sizable body of scientific work considers the philosophical foundations of his approach and applies his method to the real world of nature      **Barth's Theology of Interpretation** Donald

Wood,2016-04-08 Through his single minded insistence on the priority of the Bible in the life of the church Karl Barth 1886-1968 decisively shaped the course of twentieth century Christian theology Drawing on both familiar texts and recently published archival material Barth's Theology of Interpretation sheds new light on Barth's account of just what it is that scripture gives and requires In tracing the movement of Barth's earlier thinking about scriptural reading the book also raises important questions about the ways in which Barth can continue to influence contemporary discussions about the theological interpretation of scripture      Psychology John Dewey,1893      **Moses Hess and Modern Jewish Identity** Ken

Koltun-Fromm,2001-07-31 Koltun-Fromm's reading of Hess is of crucial import for those who study the construction of self in the modern world as well as for those who are concerned with Hess and his contributions to modern thought a reading of Hess that is subtle judicious insightful and well supported David Ellenson Moses Hess a fascinating 19th century German Jewish intellectual figure was at times religious and secular traditional and modern practical and theoretical socialist and nationalist Ken Koltun-Fromm's radical reinterpretation of his writings shows Hess as a Jew struggling with the meaning of conflicting commitments and impulses Modern readers will realize that in Hess's life as in their own these commitments remain fragmented and torn As contemporary Jews negotiate multiple often contradictory allegiances in the modern world Koltun-Fromm argues that Hess's struggle to unite conflicting traditions and frameworks of meaning offers intellectual and practical resources to re-examine the dilemmas of modern Jewish identity Adopting Charles Taylor's philosophical theory of the self to uncover Hess's various commitments Koltun-Fromm demonstrates that Hess offers a rich textured though deeply conflicted and torn account of the modern Jew This groundbreaking study in conceptions of identity in modern Jewish texts is a vital contribution to the diverse fields of Jewish intellectual history philosophy Zionism and religious studies Jewish Literature and Culture Alvin H Rosenfeld editor Published with the generous support of the Koret Foundation      *The*

*Foundation of the Unconscious* Matt Ffytche,2011-11-10 The unconscious cornerstone of psychoanalysis was a key twentieth century concept and retains an enormous influence on psychological and cultural theory Yet there is a surprising lack of investigation into its roots in the critical philosophy and Romantic psychology of the early nineteenth century long before Freud Why did the unconscious emerge as such a powerful idea And why at that point This interdisciplinary study traces the emergence of the unconscious through the work of philosopher Friedrich Schelling examining his association with Romantic psychologists anthropologists and theorists of nature It sets out the beginnings of a neglected tradition of the unconscious psyche and proposes a compelling new argument that the unconscious develops from the modern need to theorise individual independence The book assesses the impact of this tradition on psychoanalysis itself re-reading Freud's *The Interpretation of Dreams* in the light of broader post-Enlightenment attempts to theorise individuality      **The Intellectual Origins of**

**Modernity** David Ohana, 2019-03-21 The Intellectual Origins of Modernity explores the long and winding road of modernity from Rousseau to Foucault and its roots which are not to be found in a desire for enlightenment or in the idea of progress but in the Promethean passion of Western humankind. Modernity is the Promethean passion, the passion of humans to be their own master, to use their insight to make a world different from the one that they found and to liberate themselves from their immemorial chains. This passion created the political ideologies of the nineteenth century and made its imprint on the totalitarian regimes that arose in their wake in the twentieth. Underlying the Promethean passion there was modernity, humankind's project of self-creation and enlightenment, the existence of a constant tension between the actual and the desirable between reality and the ideal. Beneath the weariness, the exhaustion and the skepticism of post-modernist criticism is a refusal to take Promethean horizons into account. This book attests the importance of reason which remains a powerful critical weapon of humankind against the idols that have come out of modernity: totalitarianism, fundamentalism, the golem of technology, genetic engineering and a boundless will to power. Without it, the new Prometheus is liable to return the fire to the gods.

Self-Awareness and the Elusive Subject Robert J. Howell, 2023 Explores the fact that we are certain of the existence of a subject of experience despite its being objectively and subjectively elusive. Howell provides an account of basic self-awareness according to which we are most fundamentally aware of ourselves indirectly as the subject of our conscious states.

Indifference and Repetition; or, Modern Freedom and Its Discontents Frank Ruda, 2023-12-05 In capitalism human beings act as if they are mere animals. So we hear repeatedly in the history of modern philosophy. Indifference and Repetition examines how modern philosophy largely

coextensive with a particular boost in capitalism's development registers the reductive and regressive tendencies produced by capitalism's effect on individuals and society Ruda examines a problem that has invisibly been shaping the history of modern especially rationalist philosophical thought a problem of misunderstanding freedom Thinkers like Descartes Kant Hegel and Marx claim that there are conceptions and interpretations of freedom that lead the subjects of these interpretations to no longer act and think freely They are often unwillingly led into unfreedom It is thus possible that even freedom enslaves Modern philosophical rationalism whose conceptual genealogy the book traces and unfolds assigns a name to this peculiar form of domination by means of freedom indifference Indifference is a name for the assumption that freedom is something that human beings have a given a natural possession When we think freedom is natural or a possession we lose freedom Modern philosophy Ruda shows takes its shape through repeated attacks on freedom as indifference it is the owl that begins its flight so that the days of unfreedom will turn to dusk      Subject Index of Modern Books Acquired British Library, 1922

**Modern and Postmodern Crises of Symbolic Structures** Peter Šajda, 2020-10-20 In debates about philosophical anthropology human beings have been defined in different ways In Modern and Postmodern Crises of Symbolic Structures the contributors view the human being primarily as animal symbolicum They examine how the human being creates interprets and changes symbolic structures as well as how he is affected and impacted by them The focus lies on the context of modernity and postmodernity which is characterized by a number of interrelated crises of symbolic structures These crises have affected the realms of science religion art politics and education and thus provoked crucial changes in the human being's relations to himself others and reality The crises are not viewed merely as manifestations of dysfunctions but rather as complex processes of transformation that also provide new opportunities      **A Contextualistic Worldview** Lewis

Edwin Hahn, 2001 This selection of articles by Lewis E Hahn addresses the philosophical school of contextualism and four contemporary American philosophers John Dewey Henry Nelson Wieman Stephen C Pepper and Brand Blanshard Stressing the relatively recent contextualistic worldview which he considers one of the best world hypotheses Hahn seeks to achieve a broad perspective within which all things may be given their due place After providing a brief outline Hahn explains contextualism in relation to other philosophies In his opening chapter as in later chapters he expresses contextualism as a form of pragmatic naturalism In spite of Hahn's high regard for contextualism however he does not think it would be good if we were limited to a single worldview The more different views we have and the more different sources of possible light we have the better our chances that some of these cosmic maps will shed light on our world and our place in it      **Kierkegaard**
