Exchanging Peoples Catherine Gousseff, 2024-12-30 The exchange of populations between Poland and Ukraine which took place in the context of the modification of territories and the establishment of the new Soviet border in 1944-45 has never been addressed as such The reconstruction of this migratory crossroads of one and a half million people sheds light on the ways in which the two states were involved and on the lived experience of displacement according to the places destinations and temporalities of this period of upheaval This book is based on research into the central archives of the Soviet State the Soviet Republic of Ukraine and the Republic of Poland It approaches the topic on different scales from the most local to the international context It allows us to disentangle the different geostrategic and political stakes of the period to distinguish the role of logistical obstacles and inter state disputes in the conduct of migrations and to trace the very asymmetrical trajectories of the two minorities Polish and Ukrainian between constraints and expectations In the light of this violent past that has durably separated the two peoples the phenomenal presence of Ukrainian refugees in Poland since February 2022 marks a real inversion of history which manifests itself in contemporary issues

Law in Transition Ruth Buchanan, Peer Zumbansen, 2014-12-01 Law has become the vehicle by which countries in the developing world including post conflict states or states undergoing constitutional transformation must steer the course of social and economic legal and political change Legal mechanisms in particular the instruments as well as concepts of human rights play an increasingly central role in the discourses and practices of both development and transitional justice These developments can be seen as part of a tendency towards convergence within the wider set of discourses and practices in global governance While this process of convergence of formerly distinct normative and conceptual fields of theory and practice has been both celebrated

and critiqued at the level of theory the present collection provides through a series of studies drawn from a variety of contexts in which human rights advocacy and transitional justice initiatives are colliding with development projects programmes and objectives a more nuanced and critical account of contemporary developments The book includes essays by many of the leading experts writing at the intersection of development rights and transitional justice studies Notwithstanding the theoretical and practical challenges presented by the complex interaction of these fields the premise of the book is that it is only through engagement and dialogue among hitherto distinct fields of scholarship and practice that a better understanding of the institutional and normative issues arising in contemporary law and development and transitional justice contexts will be possible The book is designed for research and teaching at both undergraduate and graduate levels

ENDORSEMENTS An extraordinary collection of essays that illuminate the nature of law in today's fragmented and uneven globalized world by situating the stakes of law in the intersection between the fields of human rights development and transitional justice Unusual for its breadth and the quality of scholarly contributions from many who are top scholars in their fields this volume is one of the first that attempts to weave the three specialized fields and succeeds brilliantly For anyone working in the fields of development studies human rights or transitional justice this volume is a wake up call to abandon their preconceived ideas and frames and aim for a conceptual and programmatic restart Professor Balakrishnan Rajagopal Ford International Associate Professor of Law and Development Massachusetts Institute of Technology This superb collection of essays explores the challenges possibilities and limits faced by scholars and practitioners seeking to imagine forms of law that can respond to social transformation Drawing together cutting edge work across the three dynamic fields of law and development transitional justice and international human rights law this volume powerfully demonstrates that in light of the changes demanded of legal research education and practice in a globalizing world all law is law in transition Anne Orford Michael D Kirby Chair of International Law and Australian Research Council Future Fellow University of Melbourne A terrific volume Leading scholars of human rights development policy and transitional justice look back and into the future What has worked Where have these projects gone astray or conflicted with one another Law will only contribute forcefully to justice development and peaceful sustainable change if the lessons learned here give rise to a new practical wisdom We all hope law can do better the essays collected here begin to show us how David Kennedy Manley O Hudson Professor of Law Director Institute for Global Law and Policy Harvard Law School
