Contested Issues Of Ecosystem Management:

Contested Issues of Ecosystem Management Piermaria Corona, Boris Zeide, 2000-02-17 Contested Issues of Ecosystem Management provides park rangers forestry students and personnel with a unique discussion of the premise goals and concepts of ecosystem management You will discover the need for you to maintain and enhance the quality of the environment on a global scale while meeting the current and future needs of an increasing human population This unique book includes ways to tackle the fundamental causes of environmental degradation so you will be able to respond to the problem and not merely the symptoms *Towards Sustainable Management of the Boreal Forest* Philip Joseph Burton, 2003 Presenting a summary of the development in boreal forest management this book provides a progressive vision for some of the world's northern forests It includes a selection of chapters based on the research conducted by the Sustainable Forest Management Network across Canada It includes a number of case histories

Environmental Services of Agroforestry Systems Yale University, Florencia Montagnini, 2024-11-01 Get cutting edge agroforestry research and data Deforestation and the rampant use of fossil fuels are major contributors to increases in atmospheric carbon dioxide and are enormous influences on global warming Agroforestry systems and tree plantations can help mitigate the resulting climate change and degradation of biodiversity and accelerating climate change Environmental Services of Agroforestry Systems addresses these global concerns with an essential collection of presentations on biodiversity and climate change from the First World Congress in Agroforestry Orlando Florida 2004 Respected experts discuss the latest research and data on how agroforestry systems can help solve environmental problems through carbon sequestration and biodiversity conservation Years ago agroforestry's environmental benefits were mainly seen as being soil amelioration erosion control microclimate control and the alleviation of the effects of drought in semiarid areas Environmental Services of Agroforestry Systems goes beyond the regional considerations of years past to focus on the challenges of today's most pressing global environmental concerns The contributors describe the latest research and concepts in agroforestry systems reforestation efforts soils vegetation and agriculture while reviewing their economic aspects Incentives for reforestation and agroforestry are explored in detail Each chapter is carefully referenced and includes tables to clarify ideas and data Environmental Services of Agroforestry Systems addresses advantages of mixed species plantations tropical pasture and silvo pastoral systems tropical forest ecosystem management research on the economic feasibility of various land use systems socio economic considerations of coffee growing ecosystems agroforestry systems in Costa Rica Environmental Services of Agroforestry Systems is essential reading for researchers and scientists as well as professionals in agroforestry forestry soils global change climate change and environmental studies educators and graduate and undergraduate students

Frontiers of Forest Biology A K Mitchell, Pasi Puttonen, M Stoehr, Barbara J Hawkins, 2021-05-30 Discover new approaches to promote a viable forest industry while protecting non timber values Frontiers of Forest Biology Proceedings of the 1998 Joint Meeting of the North American

Forest Biology Workshop and the Western Forest Genetics Association gives you significant new insights on current initiatives in forest biology Because the field is changing rapidly you need to keep aware of current trends as the emphasis in forest research shifts from productivity based goals to sustainable development of forest resources In this volume you will find a comprehensive summary of the state of the art of forest science in North America Whether your focus is on genetics or on the environmental aspects of forest science plant physiology or silviculture you will find helpful chapters by practitioners as well as cutting edge research by scientists This integrated approach is unique in the field Based on the 1998 Joint Meeting of the North American Forest Biology Workshop and the Western Forest Genetics Association **Frontiers of Forest Biology** addresses changing priorities in forest resource management This important book contains fascinating research studies complete with tables and diagrams on topics such as biodiversity research the productivity of commercial species conserving adaptive variation in forest ecosystems and the effect of harvesting trees on nutrient leaching The book maps the frontiers of this fast changing science with chapters on the social biological and industrial context of forest biology new directions for research into genetics physiology plant silviculture and conservation the impact of genetics on sustainable forestry the effects of cold and disease on plant physiology regeneration of various species after logging new species adapted for agroforestry the impact and management of exotic weeds **Frontiers of Forest Biology** offers solid information on a broad spectrum of topics and suggests fresh avenues for your investigations in all aspects of forest biology

Transboundary Protected Areas Yale University, 2003-05-21 Top researchers share their expertise on conservation and sustainability in areas that extend across national borders This informative and insightful book examines strategies being used by governments and NGOs to protect wild areas that cross national borders and cultural linguistic and socioeconomic boundaries In addition to presenting case studies from five continents **Transboundary Protected Areas The Viability of Regional Conservation Strategies** provides several theoretical overviews that suggest viable approaches to conserving biodiversity in these difficult to protect areas From the editors Historically the borders of protected areas have been defined by convenient social political or proprietary boundaries rather than by ecological boundaries Today many scientists and practitioners are in agreement that the world's biodiversity and other natural resources can best be conserved on an ecosystem or regional scale which may or may not be consistent with political boundaries Efforts to protect land on an ecosystem scale have led to the creation of numerous transboundary protected areas also referred to as international peace parks or transfrontier conservation areas These areas which often cross linguistic socioeconomic and cultural boundaries as well as national borders represent regional conservation at its most complex While many scientists and practitioners promote eco regional approaches to conservation many also advocate pursuing conservation goals on local or community scales Conservationists therefore endeavor to achieve a seemingly incongruous mandate to pursue top down regional goals using bottom up local approaches **Transboundary Protected Areas The Viability of Regional Conservation Strategies** addresses the

vital questions associated with this mandate Is it reasonable and realistic to approach regional conservation this way What strategies have been employed to achieve these goals and how successful have they been Who benefits from transboundary conservation and what are the costs Reflecting the information delivered at the 2001 conference of the Yale chapter of the International Society of Tropical Foresters ISTF this book provides you with the best answers available at this time The contributors include social and natural scientists resource managers policymakers and community leaders Transboundary Protected Areas The Viability of Regional Conservation Strategies brings them together for an interdisciplinary exploration of these questions and other critical issues related to conservation in and around transboundary protected areas Specific cases that are thoughtfully examined in Transboundary Protected Areas The Viability of Regional Conservation Strategies include the public reaction to the Yellowstone to Yukon Y2Y Conservation Initiative the ways in which the establishment of southern Africa s existing and proposed Transfrontier Conservation Areas TFCAs can help conserve biodiversity aid socioeconomic development and promote international peace development and conservation efforts in the Maloti Drakensberg mountains of southern Africa which straddle the borderlands between South Africa and Lesotho the cultural aspects of protected area management in Venezuela and Guyana the impact of transfrontier collaboration as evidenced by the International Gorilla Conservation Programme IGCP in the Virunga Bwindi region of Africa Uganda Rwanda and the Democratic Republic of Congo how the Nepalese have addressed the problems of poaching commercial logging illegal harvesting and smuggling of forest products and illegal trade of wildlife and wildlife products in the eastern Himalayas by implementing a transboundary biodiversity conservation initiative Helpful maps tables and figures make geographical regions and conservation information easy to assimilate

Yellowstones Survival Susan G. Clark,2021-05-15 This book focuses on Yellowstone the park the larger ecosystem and even more so the idea of Yellowstone In presenting a case for a new conservation paradigm for the Greater Yellowstone Ecosystem GYE including Yellowstone National Park the book at its heart is about people and nature relationships This new paradigm will be truly committed to a healthy sustainable environment rich in other life forms and one

that affords dignity for all humans and nonhumans The new story or paradigm must be about living such a commitment and future for GYE in real time The book presents a well developed theory for interdisciplinary problem solving that is grounded in practice

Illegal Logging in the Tropics Ramsay M Ravenel, Ilmi M E Granoff, Carrie A Magee, 2005-01-18 Examine why illegal logging is so pervasive and how this problem can be addressed In March 2002 the Yale chapter of the International Society of Tropical Foresters brought together social and natural scientists resource managers policymakers community leaders and other interested parties to share experiences strategies successes and failures in addressing illegal logging and corruption The results were the conference Illegal Logging in Tropical Forests Ecology Economics and Politics of Resource Misuse and this book which brings together analyses from the perspectives of anthropology economics forestry law political science and sociology Illegal Logging in the Tropics Strategies for Cutting Crime suggests specific policy interventions aimed at curbing illegal logging and identifying solutions to forest crime It presents both thematic analyses of illegal logging at the global level and case studies on both the local and national levels in African Latin American and Asian countries The contributors draw on their experiences in Benin Brazil Cameroon India Indonesia Mexico and Vietnam Illegal Logging in the Tropics Strategies for Cutting Crime examines global governance with a cross country regression analysis of deforestation and various aspects of governance global forest trade with extensive reviews of data on global trade in forest products community perspectives on illegal logging including a system dynamics model of villagers willingness to log a description of community involvement in broader networks of illegal trade and a chapter that challenges the credibility of illegality as defined by a corrupt government or agency the efforts of NGOs to combat illegal logging how illegal logging is typically symptomatic of broader failures of governance Specific chapters in Illegal Logging in the Tropics Strategies for Cutting Crime investigate the role of monitoring in cutting forest crime whether illegal logging is better combated via law enforcement or by local communities with pros and cons for each approach the proximate causes of illegal logging including access to forests and equipment and economic factors the efforts of Transparency International a widely lauded organization combating corruption to address illegal logging at the international policy level In addition this valuable resource provides you with an essential overview of the literature on illegal logging an in depth analysis of the incentive structures that bring local residents to commit forest crimes and a great deal more Let Illegal Logging in the Tropics Strategies for Cutting Crime be your guide to the intricacies of this increasingly urgent issue

Non-Timber Forest Products Marla R Emery, Rebecca J Mclain, 2001-09-18 Balance the culture of wildcrafting with the demands of sustainable forest management This comprehensive book documents the current use research and policy concerns relating to harvesting non timber forest products NTFPs It provides a state of the art review of historical and contemporary wildcrafting ongoing research on economically useful forest products and sociopolitical and environmental considerations for NTFP management The implications of harvesting NTFPs are usually considered in the context of the Third World but this unique book offers an

analysis of current conditions in North America and integrates the historical social ecological and policy aspects of NTFP use It addresses the issues that arise when the primeval practice of gathering wild plants fungi leaves and bark occurs in a post industrial world Non Timber Forest Products Medicinal Herbs Fungi Edible Fruits and Nuts and Others *Governmental Response to Environmental Challenges in Global Perspective* Joseph G. Jabbar, O. P. Dwivedi, 1998 In our drive to improve human standards of living we have paradoxically paid scant attention to the need for clean air and water the impact of acid rain on agriculture lakes and rivers the effect of pollutants on the ozone layer the safe disposal of hazardous wastes and the relationship between population growth and the environment It seems that every time governments are faced with an apparent choice between economic development and the protection of the environment priority is always given to the former Short term plans dictated by canons of political survival and expediency always seem to take precedence over long term strategies with politicians and decision makers deftly relegating environmental concerns to the realm of rhetoric This book is an effort to better understand the problems faced by our global ecosystems It is also the result of the authors deep commitment to urge both citizens and their leaders the world over to work together for a better protection of the environment so that our planet may be saved for the present and for future generations Sustainable Forestry in Southern Sweden Kristina Blennow, Mats Niklasson, 2006-05-22 The latest findings about the environmental social and economic impact of sustainable forestry Forestry is one of the most important foundations of the Scandinavian economies Sustainable Forestry in Southern Sweden The SUFOR Research Project closely reviews the findings from the eight year research program first launched in 1997 that searched for ways to maintain sustainable forestry in the region Respected scholars and experts discuss ways to bridge the chasm separating the world of research with the world of trade and industry Biodiversity the impact of humans environmental conditions and other facets of sustainability are all presented and discussed in detail Sustainable Forestry in Southern Sweden begins with an overview of Swedish forestry and the sustainability debate in Sweden The full range of human impact is examined in detail with an eye on biodiversity issues Other research includes the effect of deer browsing on forest development the importance of root distribution nutrient sustainability fresh strategies for long term forest sustainability active risk management and important policy issues The book is extensively referenced and includes several tables to ensure clarity of data Sustainable Forestry in Southern Sweden discusses in detail the background of the SUFOR program the impact of lower fire frequency on forest biodiversity transforming research results into useful knowledge for forest practitioners balancing costs and benefits related to deer and moose population density effects of adverse environmental conditions on sensitive trees nutrient availability in plant productivity applicability of mixed stands in sustainable forestry weathering rates of forest soils analysis of sustainability conditions from environmental social and economic standpoints multi objective forest landscape projection models risk management in sustainable forestry moving from policy to implementation of sustainability and biodiversity policy implications resulting from the SUFOR program

Sustainable Forestry in Southern Sweden is enlightening informative reading for scholars students and practitioners in land management issues *Plantations and Protected Areas in Sustainable Forestry* William C. Price,Naureen Rana,Alaric Sample,2024-11-01 Understand the social economic and environmental impacts of the development of forest plantationsand the conservation involved Controversy surrounds the question of how to best protect forests of high conservation value while meeting the growing demands for wood and wood fiber based products Plantations and Protected Areas in Sustainable Forestry presents the views of a diverse group of conservationists and natural resource professionals who examine important social and economic as well as ecological aspects of the debate The goal of sustainable forest management is kept at the forefront of the discussions while alternative strategies to meet economic and social needs are explored in light of the need to conserve biological diversity and protect other important ecological services and environmental values in key forest areas For developed nations there is an ethical responsibility to consider sensible development as well as environmental conservation Plantations and Protected Areas in Sustainable Forestry discusses many of the prominent issues that are raised when considering intensively managed forests plantations and or strict protection of high conservation value forests protected areas in the United States and elsewhere These issues include the role of plantations and their management forest management certification to ensure sustainability job creation from plantations the effects of intensive forest management on society and the environment and the protection of biodiversity This book provides a solid foundation on which to form a consensus that addresses the needs of economics and society as well as forest conservation Topics in Plantations and Protected Areas in Sustainable Forestry include the future of forest plantations forest management certification community benefits derived from intensively managed industrial roundwood plantations the extent to which intensive forest management practices on plantations prevent degradation of natural forests positive and negative impacts of plantations on environmental and social values alternative approaches for investment in wood production global policy perspectives on intensive forest production global strategies for biodiversity conservation Plantations and Protected Areas in Sustainable Forestry provides a diversity of perspectives on one of today s most important developments in international forest policy and international trade in the forest sector It is intended to contribute to better informed decision making and is an important book for policymakers forest resource management professionals and business leaders working to develop practical and effective strategies for sustainable forest management *Naturally Challenged: Contested Perceptions and Practices in Urban Green Spaces* Nicola Dempsey,Julian Dobson,2020-08-04 This book aims to understand how the wellbeing benefits of urban green space UGS are analysed and valued and why they are interpreted and translated into action or inaction into success and or failure The provision care and use of natural landscapes in urban settings e g parks woodland nature reserves riverbanks are under researched in academia and under resourced in practice Our growing knowledge of the benefits of natural urban spaces for wellbeing contrasts with asset management approaches in practice that view public green spaces as liabilities Why is there a

mismatch between what we know about urban green space and what we do in practice What makes some UGS more successful than others And who decides on this measure of success and how is this constituted This book sets out to answer these and related questions by exploring a range of approaches to designing planning and managing different natural landscapes in urban settings

The Oxford Handbook of U.S. Environmental Policy Sheldon Kamieniecki, Michael Kraft, 2013 Prior to the Nixon administration environmental policy in the United States was rudimentary at best Since then it has evolved into one of the primary concerns of governmental policy from the federal to the local level As scientific expertise on the environment rapidly developed Americans became more aware of the growing environmental crisis that surrounded them Practical solutions for mitigating various aspects of the crisis air pollution water pollution chemical waste dumping strip mining and later global warming became politically popular and the government responded by gradually erecting a vast regulatory apparatus to address the issue Today politicians regard environmental policy as one of the most pressing issues they face The Obama administration has identified the renewable energy sector as a key driver of economic growth and Congress is in the process of passing a bill to reduce global warming that will be one of the most important environmental policy acts in decades The Oxford Handbook of U S Environmental Policy will be a state of the art work on all aspects of environmental policy in America Over the past half century America has been the world's leading emitter of global warming gases However environmental policy is not simply a national issue It is a global issue and the explosive growth of Asian countries like China and India mean that policy will have to be coordinated at the international level The book will therefore focus not only on the U S but on the increasing importance of global policies and issues on American regulatory efforts This is a topic that will only grow in importance in the coming years and this will serve as an authoritative guide to any scholar interested in the issue

Risk and Social Theory in Environmental Management Tom Measham, Stewart Lockie, 2012 Risk and Social Theory in Environmental Management marks a timely contribution given that environmental management is no longer just about protecting pristine ecosystems and endangered species from anthropogenic harm it is about calculating and managing the risks to human communities of rapid environmental and technological change First the book provides a solid foundation of the social theory underpinning the nature of risk then presents a rethinking of key concepts and methods in order to take more seriously the biophysical embeddedness of human society Second it presents a rich set of case studies from Australia and around the world drawing on the latest applied research conducted by leading research institutions In so doing the book identifies the tensions that arise from decision making over risk and uncertainty in a contested policy environment and provides crucial insights for addressing on the ground problems in an integrated way First volume to address environmental risk from a social science perspective Latest theoretical developments In depth case studies of contemporary issues e g climate change water shortages

Mapping Wildfire Hazards and Risks R Neil Sampson, R. Dwight Atkinson, Joe W. Lewis, 2000-10-10 Develop accurate computer models to determine wildfire risks and controlled burn

benefits Although scientists now recognize that fire is essential to many ecosystems the ecological and political issues of managing wildfire continue to be vexing Mapping Wildfire Hazards and Risks offers multiple perspectives on using a Geographic Information System GIS for more effective wildfire management This innovative technology is the ideal tool to organize and display all the information available so authorities can make informed judgments based on all the facts Because the authors are not merely theorizing but discussing the GIS they are actually building and using Mapping Wildfire Hazards and Risks offers practical ideas and perspectives including specific information on the modeling approach and kinds of data utilized valuable discussions of the social and environmental factors included in the model techniques for predicting the effects of wildfire on neighborhoods soil erosion sedimentation and air quality predictions of long term ecosystem recovery given wildfires of different sizes and intensities maps charts tables and formulas to make the process of building a GIS understandable and accessible Mapping Wildfire Hazards and Risks is a compilation of the ideas of federal and state agencies universities and non governmental organizations on how to rank and prioritize forested watershed areas that are in need of prescribed fire This book provides the essential information for deciding how to set priorities for wildfire management that might reduce risks or lower future damages International Handbook of Urban Policy: Contentious global issues H. S. Geyer, 2007-01-01 This first Handbook in a series of three original reference works looks at globally contentious urban policy issues from a wide variety of different angles and perspectives Matters related to urban densification population mobility urban inequality and sustainability are analysed in a manner that will not only interest the advanced student but also the novice Urban policy covers a vast field This first volume combines chapters covering three broad themes policy issues pertaining to the spatial aspects of the city social and mobility issues and issues of urban governance The spotlight initially falls on urban structure urban densification the disappearing urban rural divide the urban economic landscape and the transformation of socialist economies The Handbook then goes on to focus on migration social mobility crime terrorism and social inequality Finally urban sustainability and urban governance come under the spotlight Integration of the planning process flexibilities in infrastructure and areas of neglect in environmental management feature strongly in this section of the Handbook Books of this nature are often slanted in one particular direction however this Handbook s approach is different Not only has the editor avoided shying away from politically sensitive issues but contributions have also been included that reflect distinct differences of opinion on politically sensitive issues hence the volume s subtitle of contentious global issues As a Handbook the chapters have been written not only for the advanced student and academics but also with undergraduate students in mind The Handbook will appeal to scholars and researchers of geography and urban and development planning demography and social science and environmental scientists for the focus on urban sustainability issues Ecosystem Services Mark Everard, 2021-12-30 Revised and fully updated this textbook provides a detailed yet accessible introduction to the key aspects of ecosystem services Ecosystem services is one of the most

powerful guiding principles for ecology biodiversity conservation and the management of natural resources It provides the basis of assessing the multiple values and services that ecosystems can provide to humankind including diverse issues such as carbon sequestration flood control crop pollination and aesthetic and cultural services The second edition of Ecosystem Services Key Issues has been fully revised and updated to address policy and scientific developments as well as new and emerging issues such as nature based solutions zoonotic diseases and environmental justice It includes new and updated case studies from across the world and each chapter contains further reading learning objectives and discussion questions to aid student learning The book details the historical roots of ecosystem services in the second half of the twentieth century through initiatives such as the Millennium Ecosystem Assessment The Common International Classification of Ecosystem Services CICES and the United Nations Sustainable Development Goals It shows how ecosystem goods and services can be categorised and valued in economic as well as non monetary terms while also highlighting some of the difficulties and limitations of valuation techniques The author describes how themes such as systems thinking social ecological resilience and natural capital relate to ecosystem services and how these can contribute to more sustainable and equitable development This book will be essential reading for students and scholars of ecosystem services ecology environmental science biodiversity conservation environmental economics natural resource management and sustainable development It will also be of use to professionals and policymakers who are looking to integrate ecosystems and their services into their decision making processes

Forestland Tax Programs :b Aid Or Impediment to Ecosystem Management John Gregory Clendenning,2000 *Contesting the Foreshore* Jeremy Boissevain,Tom Selwyn,2025-10-01 This collection of essays is about tourism and social political and economic relations in coastal locations in various parts of the world The starting point of each chapter is the ethnographic study of one particular place However the authors are also concerned with wider regional national and global forces which shape and influence the local economies and societies under review Although most of the essays focus on the European coastline the book is intended to have implications for other geographical areas In most parts of the world coastal settlements and contexts are changing rapidly and markedly These contexts are routinely characterised by conflict between different interest groups contesting the ownership and control of the foreshore and its resources One of the threads running through the volume is that coastal regions are often sites of fishing and related traditional activities The chapters discuss the relationships between traditional stakeholders such as fishermen and local residents and new stakeholders including new residents second home owners tourists and tourism property developers and fish farm managers as they vie for status influence and ultimately for space on the foreshore The underlying preoccupation of the volume as a whole is the extent of penetration and transformation resulting from the onward march of capitalism and the market system in the coastal locations studied This is the second publication in the MARE Publication Series A collection of essays studying the rapid changes in coastal settlements due to the conflicting interests of traditional and new stakeholders
