Continuum Guide to Media Education Pat Brereton, 2005-07-01 Presented in an A Z format this is an authoritative guide to media education in all its aspects **Media Education in Asia** Chi-Kim Cheung, 2009-06-12 Media education in Asia is a relatively young but rapidly developing part of the curriculum Research has been conducted and papers have been written on various issues concerning media education in Asia The dominant models of media education in the world are broadly Western and most are drawn from English speaking countries The question is whether a similar pattern exists in Asia where there may be differences in culture heritage beliefs values education policy as well as curriculum and pedagogy Are educators in Asia following the Western model in developing and implementing media education or are they devising their own models With this question in mind this book sets out to understand the prevailing perspectives regarding media education in various Asian societies While most debates about media education are carried out in Western contexts this book hopes to provide a platform for readers to examine this issue in an Asian context **Advances in Foundational Mass Communication**

Theories Ran Wei, 2018-02-02 Providing leading edge perspectives on the legacy theories of mass media and society this collection advances the foundational theories of mass communications which have sustained the field of study over the past fifty years Many of these contributions were originally published as a Deutschmann Scholarly Essay in the Mass Communication and Society journal and together they comprise a remarkable source of knowledge equipped to lead mass communications theory through the emergence of new technologies and the evolution of communications in the 21st century Moreover the contributions gathered in this volume contradict any critics who may claim the theories of the 20th century have outlived their usefulness for these prove to guide contemporary research as forcefully as ever in the digital era Validating the classic media theories across time and their various forms constitute the second focal section of this volume Finally senior media scholars offer their views on the future directions in which mass communication theories can be advanced

Reporting Political Islam and Democracy Mohammed-Ali Abunajela, Nael Jebril, 2020-05-14 For over a decade Al Jazeera Arabic occupied an unprecedented position among Arab audiences and families Its attractive and daring news coverage has inspired millions of Arabs and led other news channels to follow suit by changing their reporting narrative and presentational style However in the aftermath of the Arab uprisings in 2011 the close adoption of the Arab uprisings in general and the Egyptian one in particular made the channel fall into the eye of the public storm through its extensive 24 hour coverage This book assesses whether the channel systematically provided a platform for certain ideologies or ignored

others and if and how Al Jazeera's language had shifted after the 2011 Arab uprisings. It also explores the rationale behind adopting particular editorial principles featured in the analyses and scrutinises the findings within the framework of media, religion and democratisation.

Handbook of Research on Deconstructing Culture and Communication in the Global South Okocha, Desmond Onyemehi, Yousaf, Muhammad, Onobe, Melchizedec J., 2023-07-10. There are inequalities in global knowledge production in communication outlets, cultural practices and governance problems. Under this symbiotic relationship, they reinforce the cultural ideas, values and governance systems operating in the Western countries as an ideal and role model for the Global South countries. Media is regarded as the agent of change for communication and cultural values. Indigenous knowledge production and dissemination is an essential feature to get a better insight into Global South countries. Likewise, de-westernizing and demystifying societal culture and governance issues are pertinent in this age of information. The Handbook of Research on Deconstructing Culture and Communication in the Global South focuses on local production practices, keeping in view the local needs of communication outlets and societal and cultural sensitivities. This Indigenous knowledge would provide deeper and richer insights into the problems and sensitivities of Global South countries. To achieve this end, this book adopts a broader approach encompassing development issues, democratic values, digitalization practices, gender equality issues and more. Covering topics such as biocultural activism, language ideology and religiocentrism, this major reference work is a valuable resource for graduate students, sociologists, government officials, students and educators of higher education, librarians, development organization leaders, religious scholars, policymakers, researchers and academicians.
