Contributions To The Analysis Of The Sensations:

Contributions to the Analysis of the Sensations Ernst Mach, 1897 The Philosophical Review Jacob Gould Schurman, James Edwin Creighton, Frank Thilly, Gustavus Watts Cunningham, 1909 An international journal of general philosophy **Contributions to the Analysis of the Sensations** Ernst Mach, 1998 Insisting that sensation constitutes the data for all science physical and psychological Mach articulated an early form of scientific positivism that provided K lpe and Titchener with an epistemological framework for their emerging views Conceiving of space and time not as Kantian categories but as the immediate data of experience Mach also helped lay the groundwork for the gestaltists later recognition of the phenomenal status of extension and duration **The Analysis of Sensations, and the Relation of the Physical to the Psychical** Ernst Mach, 1914 Physicist and philosopher Ernst Mach investigates the physical sensations of sight sound motion and the perceptions of space and time Mach is frank about his book incorporating both scientific and philosophical ideas While acknowledging his investigations were on the border of what science had helped humans comprehend he defends his work by stating that the manifold sensations a person experiences each day are the result of a complex interplay of biology and physics As such philosophical enquiries on the sensory experience are merited for science alone cannot encompass or quantify the various sensations with a view to explaining their precise effects on the human mind and its thought processes An example investigated by Mach is that of time how certain sensory experiences appear to make time pass slower or faster Often vivid experiences a shocking sight produce the sensation of time slowing why this occurs and how it affects the mind is discussed at length Though Mach met with both praise and opposition with the successive editions of this work he is cheerful at having aroused such debate he had appropriated aspects of science to philosophic ends

The Philosophy of Joseph Petzoldt Chiara Russo Krauss,2023-01-12 This volume is the first English resource to shed light on the philosophy of Joseph Petzoldt 1862 1929 the main pupil of Ernst Mach and founder of the Gesellschaft für wissenschaftliche Philosophie later the association of Berlin logical positivists A central figure in the early debate on the theory of relativity his work was praised by Einstein himself Tracing the development of Petzoldt's ideas starting from his early acceptance of materialism and Kantian agnosticism Chiara Russo Krauss presents a comprehensive reconstruction of his philosophy in the context of the German milieu She examines his attempt to develop a new philosophy following Gustav Fechner and the empiriocriticism of Richard Avenarius and Ernst Mach In the final chapter she sets out how Petzoldt proposed relativistic positivism as the official interpretation of Einstein's relativity By illuminating key elements of Petzoldt's work this is a valuable case study for students and scholars of philosophy of science and late 19th century and early 20th century philosophy It reveals the complex interplay of two different tendencies of the time neo Kantianism and its struggle to overcome the notion of thing in itself as well as the need for an epistemological foundation for the new advances of science

Empfindungen I am under profound obligations to The Open Court Publishing Company Not a little of the progress of psychology is owing to the strenuous efforts which the promoters of the science have made to find the main explanation of its problems in the principle of association and these investigations have received a fresh impulse from the results of neural anatomy and neural physiology I am of opinion however that the idea advanced in the present work agreeably to which as many physico chemical neural processes are to be assumed as there are distinguishable qualities of sensation is also possessed of heuristic value and that there is reasonable hope that at some future time it too will receive elucidation from the side of physiological chemistry Admittedly this idea which is but a consistent monistic conception of Muller's principle of the specific energies is not in accord with prevailing notions By the example and influence of a great authority it has become the custom to relegate the explanation of different qualities of sensation to unknown domains and to regard all neural processes as absolutely alike qualitatively and only quantitatively different About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Grete Meisel-Hess Helga Thorson, 2022 This first book in English on Meisel Hess an early feminist voice in modernist discourse illustrates the dynamic interplay between gender sexuality and race ethnicity in Austrian and German modernism Grete Meisel Hess 1879 1922 a contemporary of Freud Schnitzler and Klimt was a feminist voice in early twentieth century modernist discourse Born in Prague to Jewish parents and raised in Vienna she became a literary presence with her 1902 novel *Fanny Roth* Influenced by many of her contemporaries she also criticized their notions of gender and sexuality Relocating to Berlin she continued to write fiction and began publishing on sexology and the women's movement Helga Thorson's book combines a literary cultural exploration of modernism in Vienna and Berlin with a biography of Meisel Hess and a critical analysis of her works Focusing on Meisel Hess's negotiations of feminism modernism and Jewishness it illustrates the dynamic interplay between gender sexuality and race ethnicity in Austrian and German modernism Analyzing Meisel Hess's fiction as well as her sexological studies Thorson argues that Meisel Hess posited herself as both a New Woman and the writer of the New Woman The book draws on extensive archival research that uncovered a large number of new sources including an unpublished drama and a variety of documents and letters scattered in collections across Europe Until now there have been only limited secondary sources about Meisel Hess most containing errors and omissions regarding her biography This is the first book on Meisel Hess in English

Hipkiss,2014-07-10 The subject of semantics has been appropriated by various disciplines including linguistic philosophy logic cognitive psychology anthropological linguistics and computer technology As a result it is difficult to define the study of semantics as an actual discipline without discovering what each field using a semantic approach to its subject matter has contributed to the understanding of what words mean This volume is a result of those discoveries Primarily an introductory work this volume outlines the approaches that various disciplines have taken to the subject attempts to show their relationships and their limitations and presents the more important aspects of each approach from psychosemantics to artificial intelligence using pertinent source material from psychology philosophy logic linguistics and sociology For individuals coming to the study of semantics for the first time or those who are interested in what the overall study may offer beyond their specialization this volume will provide a helpful overview of the subject **Otto Weininger** Chandak Sengoopta,2000-07 Sengoopta shows

BOOK JACKET **Philosophy of Meaning I** Geoffroy de Clisson, 2025-04-05

The philosophy of meaning is structured around four main axes: knowledge, aesthetics, ethics, and identity. By engaging with the question of the emergence of consciousness, it examines the logical limits of materialism and reductionism and offers a critique of physicalist monism in favor of a reimagined dualism, one grounded in the discontinuity between matter and meaning, a discontinuity that alone makes possible the emergence of objective discourse. At the heart of this approach lies the idea of an original openness of being to the world, a silent exposure to what is external to it, preceding language, logic, and any form of representation. Three central dimensions of experience can thus be explored on the basis of this primordial structure: aesthetics through music as an immediate access to the articulation between the sensible and the significant; ethics as a fundamental questioning of the relationship to otherness that precedes the normative concerns of morality and identity, conceived as a dynamic dialectic between openness and the gathering of being. These domains are not separate fields but each in its own mode expresses the structure of a radical dualism, the condition for any formal production, any act of thought, and any possibility of understanding the world. Underlying it all is an attempt to reconcile science and humanism through a philosophy of form, freedom, and spirit.
