Making of Modern Chinese Medicine, 1850-1960 Bridie Andrews, 2014-04-01 Medical care in nineteenth century China was spectacularly pluralistic herbalists shamans bone setters midwives priests and a few medical missionaries from the West all competed for patients This book examines the dichotomy between Western and Chinese medicine showing how it has been greatly exaggerated As missionaries went to lengths to make their medicine more acceptable to Chinese patients modernizers of Chinese medicine worked to become more scientific by eradicating superstition and creating modern institutions Andrews challenges the supposed superiority of Western medicine in China while showing how traditional Chinese medicine was deliberately created in the image of a modern scientific practice *Contemporary Chinese Medicine and the Influence of the West* David Nauen, 1994 Chinese Medicine in Contemporary China Volker Scheid, 2002-06-12

This ethnography of contemporary Chinese medicine that covers both Chinese medical education and practice

Encyclopedia of Contemporary Chinese Culture Edward Lawrence Davis, 2005 First Published in 2009 Routledge is an imprint of Taylor Francis an informa company **Chinese Medicine in Contemporary China** Volker Scheid, 2002 This ethnography of contemporary Chinese medicine that covers both Chinese medical education and practice **Historical epistemology and the making of modern Chinese medicine** Howard Chiang, 2015-07-01 This collection expands the history of Chinese medicine by bridging the philosophical concerns of epistemology and the history and cultural politics of transregional medical formations Topics range from the spread of ginkgo s popularity from East Asia to the West to the appeal of acupuncture for complementing in vitro fertilisation regimens from the modernisation of Chinese anatomy and forensic science to the evolving perceptions of the clinical efficacy of Chinese medicine The individual essays cohere around the powerful theoretical methodological approach historical epistemology which challenges the seemingly constant and timeless status of such rudimentary but pivotal dimensions of scientific process as knowledge reason argument objectivity evidence fact and truth In studying the globalising role of medical objects the contested premise of medical authority and legitimacy and the syncretic transformations of metaphysical and ontological knowledge contributors illuminate how the breadth of the historical study of Chinese medicine and its practices of knowledge making in the modern period must be at once philosophical and transnational in scope *Chinese Medicine in Contemporary China* Volker Scheid, 2002
