formation and the emergence of civilization have been two of the major arenas of debate in Aegean prehistory for the last twenty five years The process of urbanization has therefore been at the forefront of scholarly debate Bronze Age towns however have largely been ignored particularly at a generalized level Research has usually focused on their architecture and particularly their elite or public architecture rather than their general nature and character and many studies have been restricted to a single town or even a single building This volume redresses the balance and draws attention and thought not only to urban settlements as a whole but to their social and economic roles their demographic significance and ultimately to their character and personality

Byzantium James Howard-Johnston, 2024-07-15 Byzantium was a strange entity a relic of classical antiquity which survived deep into the Middle Ages Drawing on a lifetime's work in the field of Byzantine studies James Howard Johnston aims to explain Byzantium's longevity first as a state geared to fighting a two centuries long guerrilla war of defence then as an increasingly confident regional power It is only by analysing its economic social and institutional structures that this strange medieval afterlife of the rump of the Roman empire can be understood This collection of linked essays outlines the fundamental features of Byzantium with a focus on the seventh to eleventh centuries The essays delve below the agitated surface of political religious and intellectual history to home in on 1 alterations in economic conditions

and 2 structural change in the social order and apparatus of government The economic foundations of society and state are examined over the long term with emphasis placed on mercantile enterprise throughout Howard Johnston identifies warfare as the prime driver of social and institutional change in a first phase seventh to eighth centuries when the peasant villager rose to a dominant position in the collective mindset and the administration was centralised and militarised as never before A second phase of change is then highlighted after the mid ninth century when Byzantium s security was assured Military and administrative arrangements were adapted as the empire expanded The service aristocracy which had developed in the dark centuries began to assert itself to the detriment of the peasantry but was Howard Johnston argues countered reasonably effectively by new legislation There was a renaissance in cultural life most marked in the intellectual sphere in the eleventh century Finally the sharp decline in Byzantium s military fortunes from the mid eleventh century is attributed to external factors rather than internal weakness

The Polis as an Urban Centre and as a Political Community Mogens Herman Hansen, 1997

An Archaeology of Land Ownership Maria Relaki, Despina Catapoti, 2013-10-23 Within archaeological studies land tenure has been mainly studied from the viewpoint of ownership A host of studies has argued about land ownership on the basis of the simple co existence of artefacts on the landscape other studies have tended to extrapolate land ownership from more indirect means Particularly noteworthy is the tendency to portray land ownership as the driving force behind the emergence of social complexity a primordial ingredient in the processes that led to the political and economic expansion of prehistoric societies The association between people and land in all of these interpretive schemata is however less easy to detect analytically Although various rubrics have been employed to identify such a connection most notable among them the concepts of cultures regions or even households they take the links between land and people as a given and not as something that needs to be conceptually defined and empirically substantiated An Archaeology of Land Ownership demonstrates that the relationship between people and land in the past is first and foremost an analytical issue and one that calls for clarification not only at the level of definition but also methodological applicability Bringing together an international roster of specialists the essays in this volume call attention to the processes by which links to land are established the various forms that such links take and how they can change through time as well as their importance in helping to forge or dilute an understanding of community at various circumstances

Human Development in Sacred Landscapes Lutz Käppel, Vassiliki Pothou, 2015-06-17 Holy Landscape is a term frequently used to describe a multidimensional phenomenon What this actually comprises is hard to define Precisely this question is addressed in this volume The holy landscape depends on people s Weltanschauung and is influenced by their respective culture and ethos It is not just a question of religious buildings and rituals nor is a mere matter of explicating terms such as pure and impure magic and myths it is about an expressive space in which the ceremony and mood of rites and cults take place The contributions also deal with the emergence and continuing development of the term holy landscape and the changing expressions of

religious mood South by Southeast: The History and Archaeology of Southeast Crete from Myrtos to Kato Zakros Emilia Oddo, Konstantinos Chalikias, 2022-09-29 Contributions investigate the settlement patterns maritime connectivity and material culture of the southeast of Crete in a diachronic fashion in an attempt to define it as a region and trace its history Papers focus primarily on the archaeology of the sites along the coastal strip spanning between the Myrtos Valley and Kato Zakros *An Inventory of Archaic and Classical Poleis* Mogens Herman Hansen, Thomas Heine Nielsen, Københavns universitet. Polis centret, 2004-11-11 This is the first ever documented study of the 1 035 identifiable Greek city states poleis of the Archaic and Classical periods c 650 325 BC Previous studies of the Greek polis have focused on Athens and Sparta and the result has been a view of Greek society dominated by Sophokles Plato s and Demosthenes view of what the polis was This study includes descriptions of Athens and Sparta but its main purpose is to explore the history and organization of the thousand other city states The main part of the book is a regionally organized inventory of all identifiable poleis covering the Greek world from Spain to the Caucasus and from the Crimea to Libya This inventory is the work of 47 specialists and is divided into 46 chapters each covering a region Each chapter contains an account of the region a list of second order settlements and an alphabetically ordered description of the poleis This description covers such topics as polis status territory settlement pattern urban centre city walls and monumental architecture population military strength constitution alliance membership colonization coinage and Panhellenic victors The first part of the book is a description of the method and principles applied in the construction of the inventory and an analysis of some of the results to be obtained by a comparative study of the 1 035 poleis included in it The ancient Greek concept of polis is distinguished from the modern term city state which historians use to cover many other historic civilizations from ancient Sumeria to the West African cultures absorbed by the nineteenth century colonializing powers The focus of this project is what the Greeks themselves considered a polis to be
