Contributions To Differential Psychology Selected Papers:

Contributions to Differential Psychology Anne Anastasi, 1982 *Foundations for A Psychology of Education* Alan M. Lesgold, Robert Glaser, 2012-11-12 The chapters in this collection illustrate how current concepts and principles from various disciplines can be viewed from the perspective of their value to educational process thinking While not providing specific prescriptions for educational problems the articles provide relevant experimental and theoretical knowledge has accumulated in many fields including learning theory cognitive development motivation and intellectual abilities and attitudes Portraits of Pioneers in Psychology Gregory A. Kimble, Michael Wertheimer, 2003-06-20 This book offers glimpses into the personal and scholarly lives of 20 giants in the history of psychology As in the earlier volumes prominent scholars were invited to prepare chapters on a pioneer who had made important contributions in their own area of expertise Some of the psychologists described may be the teachers of the instructors who will be the users of this book potentially providing a personal connection of the pioneers to the students A special section provides brief portraits of the editors and authors containing interesting information about the relationship between the pioneers and the psychologists who describe them Utilizing an informal personal sometimes humorous style of writing the book will appeal to students and instructors interested in the history of psychology Each of the five volumes in this series contains different profiles thereby bringing more than 100 of the pioneers in psychology more vividly to life **Models of Achievement** Agnes N. O'Connell, Nancy Felipe Russo, 2014-03-18 Providing role models of excellence for contemporary women and men and contributing to the understanding of the educational and career development of high achieving women these autobiographical essays of seventeen women and their achievements generate a deeper appreciation of the vital role of women in the development of contemporary psychology Books in Series , 1985 Vols for 1980 issued in three parts Series Authors and Titles Women in Psychology Agnes O'Connell, Nancy Felipe Russo, 1990-08-13 These insightful essays remarkably free of the jargon endemic to the social sciences will enrich academic libraries psychology reference collections Wilson Library Bulletin Women in Psychology is unique in that it is the first bio bibliographic sourcebook on historical and contemporary women in psychology It documents preserves and makes visible the diversity and excellence of women s contributions to the discipline Separate chapters evaluate and provide a critical lens through which to view the contributions of 36 women to the evolution of psychology Women in Psychology is an especially rich bibliographic resource not only through references at the end of each chapter but through a separate five part bibliographic chapter that identifies the most important books and other sources of information on women in psychology and references to autobiographical and biographic information on 185 women contributors The book contains an overview chapter describing the rigorous selection process employed a chapter on award winning contributions of women as recognized by the American Psychological Association and the American Psychological Foundation and appendices on birth years place of birth and major fields This volume will be useful to historians of

psychology to scholars of women's history and the psychology of women and to all psychologists and students of psychology. It will also be well received by public and private libraries.

Didactics of Mathematics as a Scientific Discipline Rolf Biehler, Roland W. Scholz, Rudolf Strässer, Bernard Winkelmann, 1993-11-30. Didactics of Mathematics as a Scientific Discipline describes the state of the art in a new branch of science. Starting from a general perspective on the didactics of mathematics, the 30 original contributions to the book, drawn from 10 different countries, go on to identify certain subdisciplines and suggest an overall structure or topology of the field. The book is divided into eight sections: 1. Preparing Mathematics for Students, 2. Teacher Education and Research on Teaching, 3. Interaction in the Classroom, 4. Technology and Mathematics Education, 5. Psychology of Mathematical Thinking, 6. Differential Didactics, 7. History and Epistemology of Mathematics and Mathematics Education, 8. Cultural Framing of Teaching and Learning Mathematics. Didactics of Mathematics as a Scientific Discipline is required reading for all researchers into the didactics of mathematics and contains surveys and a variety of stimulating reflections which make it extremely useful for mathematics educators and teacher trainers interested in the theory of their practice. Future and practising teachers of mathematics will find much to interest them in relation to their daily work, especially as it relates to the teaching of different age groups and ability ranges. The book is also recommended to researchers in neighbouring disciplines such as mathematics itself, general education, educational psychology, and cognitive science.
