Control of Complex and Uncertain Systems Stanislav V. Emelyanov, Sergey K. Korovin, 2012-12-06 Control of Complex and Uncertain Systems examines feedback controller design for dynamical systems It gives a compact presentation of the evolution of feedback theory and feedback design methods before presenting a new theoretical approach to feedback control Traditionally the lack of standard procedures for the design of feedback controls that will be subject to uncertain conditions coupled with a limited understanding of how feedback mechanisms will react to those uncertain conditions has presented a problem This book presents a standard principle as well as concrete methods for feedback design It equally aims to increase our understanding of how feedback controllers react to uncertain forces In doing so it lays the theoretical basis for a new generation of perfect automatic systems Topics covered include Synthesis of Nonlinear Controllers Higher Degree Sliding Modes Theory of Coordinate Operator Feedback Theory of Operator Coordinate Feedback Physical Foundations of the Compensation for Disturbances and Stabilization of Forced Motion in Binary Systems Signal Differentiation Suboptimal Stabilization of an Uncertain Object Advances in Computer, Communication, Control and Automation Yanwen Wu, 2011-11-20 The volume includes a set of selected papers extended and revised from the 2011 International Conference on Computer Communication Control and Automation 3CA 2011 2011 International Conference on Computer Communication Control and Automation 3CA 2011 has been held in Zhuhai China November 19 20 2011 This volume topics covered include signal and Image processing speech and audio Processing video processing and analysis artificial intelligence computing and intelligent systems machine learning sensor and neural networks knowledge discovery and data mining fuzzy mathematics and Applications knowledge based systems hybrid systems modeling and design risk analysis and management system modeling and simulation We hope that researchers graduate students and other interested readers benefit scientifically from the proceedings and also find it stimulating in the process **Advanced Research on Computer Science and Information Engineering** Gang Shen, Xiong Huang, 2011-05-09 This two volume set CCIS 152 and CCIS 153 constitutes the refereed proceedings of the International Conference on Computer Science and Information Engineering CSIE 2011 held in Zhengzhou China in May 2011 The 159 revised full papers presented in both volumes were carefully reviewed and selected from a large number of submissions The papers present original research results that are broadly relevant to the theory and applications of Computer Science and Information Engineering and address a wide variety of topics such as algorithms automation artificial intelligence bioinformatics computer networks computer security computer vision modeling and simulation databases data mining e learning e commerce e business image processing knowledge management multimedia mobile computing natural computing open and innovative education pattern recognition parallel computing robotics wireless networks and Web applications Sliding Modes after the first Decade of the 21st Century Leonid Fridman, Jaime Moreno, Rafael Iriarte, 2011-09-10 The book presents the newest results of the major world research groups working in the
