Accounting And Financial Reporting In Life And Health Insurance Companies:

Accounting and Financial Reporting in Life and Health Insurance Companies Elizabeth A. Mulligan, Gene Stone, 1997

Provides a broad exposure to financial and managerial accounting in life and health insurance companies including the corporate and regulatory environment in which accounting functions occur *The Guide to National Professional Certification Programs* Philip M. Harris, 2001 The job market continues to change Highly skilled and specialized workers are in demand Traditional education cannot meet all the needs to create specialty skill workers Certification provides up to date training and development while promoting individual or professional skills and knowledge in a focused manner Certification as a way of continuing professional education can also be more cost effective Accounting and Financial Reporting in Life Insurance Companies Life Office Management Association, Inc. Staff, 2009-11-10 Provides a broad exposure to financial and managerial accounting in life insurance companies including the corporate and regulatory environment in which accounting functions occur **Group Insurance** William F. Bluhm, 2012 This text is a comprehensive treatment of all aspects of group insurance in the United States and Canada It addresses life and health insurance as well as government programs and more specialized forms of insurance Emphasis is placed on the actuarial aspects of this important field of insurance including pricing regulation underwriting financial reporting and modeling Since its original publication in 1992 Group Insurance has become the resource of choice for experts as well as beginners It is an essential tool for anyone who wishes to practice in the group benefits field The Sixth Edition has been updated for the industry and regulatory changes which have occurred since 2007 Of particular note is the impact that healthcare reform in the United States will have on all facets of this topic

Valuation of Life Insurance Liabilities Louis J. Lombardi, 2006 *The Future of Insurance Regulation in the United States* Martin F. Grace, Robert W. Klein, 2009-12-01 A Brookings Institution Press and Georgia State University publication Important changes have buffeted the insurance industry over the past decade The 1999 repeal of key provisions of the Glass Steagall Act unleashed a wave of conglomeration in financial services as bank holding companies acquired insurance and securities businesses and to a much lesser degree insurance companies acquired securities firms and banks Rivalry within the sector has intensified insurance companies have developed products that compete directly with the offerings of banks and securities firms and vice versa In addition the industry has become increasingly global Against this backdrop pressure has been building for fundamental changes to the structure of insurance regulation in the United States Despite several court challenges over the years insurance continues to be regulated by the states Many insurance companies view state regulation as an increasing drag on their efficiency and competitiveness and support a federal regulatory system However powerful stakeholders including state officials state and regional insurance companies and many insurance agents oppose federal regulation As a result proposals to establish an optional federal charter OFC for insurance companies and agents remain mired in fierce debate The Future of Insurance Regulation in the United States gathers some of the country's leading experts

on financial regulation to assess the case for an enhanced federal role in the insurance sector They pay particular attention to the merits of an OFC and how it might be designed They also consider the principles that should guide insurance regulatory policies regardless of the institutional framework and examine the implications of financial convergence and the internationalization of insurance markets for an optimal regulatory structure The debate over insurance regulation has only grown in complexity and intensity since the financial crisis began in the fall of 2008 This book will both inform and help to shape those critical discussions Contributors John A Cooke International Financial Services London Robert Detlefsen National Association of Mutual Insurance Companies Martin F Grace Georgia State University Robert W Klein Georgia State University Robert E Litan Ewing Marion Kauffman Foundation and Brookings Institution Phil O Connor PROactive Strategies Hal S Scott Harvard Law School Harold D Skipper Georgia State University Peter J Wallison American Enterprise Institute
