Programming - CP 2010 David Cohen, 2010-08-30 The 16th annual International Conference on the Principles and Practice of Constraint Programming CP 2010 was held in St Andrews Scotland during September 6 10 2010 We would like to thank our sponsors for their generous support of this event This conference is concerned with all aspects of computing with constraints including theory algorithms applications environments languages models and systems We received a wide variety of submissions each of which was reviewed by at least three referees Referees were chosen for each submission by an initial bidding process where Program Committee members chose papers from their area of interest The range of expertise represented by the large Program Committee meant that almost all submissions were reviewed by subject experts on the Program Committee or by colleagues chosen by members of the Program Committee for their particular expertise Papers were solicited either as long 15 page or short 8 page submissions Short paper submissions were refereed to exactly the same

high standards as long paper submissions but naturally were expected to contain a smaller quantity of new material Thus there is no distinction in these proceedings between short and long papers I used the excellent EasyChair conference management system to support this process of reviewing and for the collation and organization of these proceedings Submissions were made either to the applications track or to the research track There were 101 23 short research track submissions of which 36 8 short were accepted which is a 36% 35% of short acceptance rate Application track submissions received special consideration and the acceptance rate was significantly higher than for the research track
