Advance Medical Transcription A Modular Approach:

Advanced Medical Transcription Cindy Destafano, Cynthia Destafano, Fran M. Federman, 2003 This innovative hands on text guides readers through progressively more difficult scenario drills and office simulations helping them gain confidence as they master valuable transcription skills Using a building block format the first unit presents fundamental skills and knowledge that are essential to medical transcription practice and the second unit lets readers take on the role of a medical transcriptionist working at an outpatient health care center Students gain real world feedback on their transcription skills with interactive exercises on CD ROM with a Production for Pay Summary feature that calculates their adjusted earnings per hour for each document they complete An Error Analysis chart categorizes and tracks undetected errors by noting the occurrence of repeated types of mistakes so students can track their own progress and learn more effectively The modular building block approach presents segments of information followed immediately by exercises that reinforce material so students can continually progress to new topics Competency based programmed learning approach makes it easy to clearly identify and measure the student s progress Real world practice scenarios place the student in a simulated employee role providing a sense of on the job training for a fictitious health care center with its own rules and procedures An Error Analysis chart for each document categorizes and tracks undetected errors by noting the occurrence of repeated types of mistakes differentiating between medical language errors and English language errors so students can identify problem areas and improve performance Production for Pay Summary feature replaces the traditional evaluation process recording how quickly the document was created subtracting credit for errors and calculating the student s adjusted earnings per hour for that document just like earning a paycheck A Microsoft Word compatible CD ROM offers pre tests and post tests proofreading exercises and actual transcription exercises plus an office simulation program that offers additional transcription practice with a self correcting feature that gives automatic feedback on the student s accuracy

Essentials of Medical Transcription Cindy Destafano,Fran M. Federman,2000-01-01 *Thông báo sách mới* ,2007 [Advances and Insights in the Diagnosis of Viral Infections and Vaccines Development in Animals](#) Jingqiang Ren,Hongliang Chai,Lihua Wang,Jianke Wang,Hewei

Zhang,2024-07-09 Viral infections in animals occasionally develop potentially fatal diseases that affect almost all organs Especially in zoonotic diseases the causative agents that usually exist in animals can be transmitted between animal species to humans directly or via a vector Throughout recent history disease outbreaks and pandemics including SARS H7N9 Ebola and COVID 19 have led to a dramatic loss of human life worldwide and harmed economic growth The most effective strategies for the control of disease are vaccination and early diagnosis Vaccines directed against viral and bacterial pathogens prevent catastrophic losses of life in humans other animals and plants and are considered among the greatest public health achievements Rapid and accurate detection of pathogens and identification of the aetiologic agent play a crucial role at every step of disease management In the case of zoonotic illnesses early detection of wildlife aids in the establishment of a surveillance system allowing for the introduction of efficient and timely disease control interventions to prevent transmission from animal to human At present variations and deletions in the genome of the virus are of common occurrence during evolution coupled with the new emerging disease and cross species disease transmission which are increasing the potential for the transmissibility and severity of the disease For this reason developing safe and effective

vaccines and enhancing the sensitivity and specificity of the diagnostic methods are urgently required The scope of this research topic will share and discuss findings in the areas of diagnosis of viral diseases or vaccine development for all animal species including terrestrial and aquatic mammals fishes insects birds etc **Resources in Education** ,1996-10
