Labyrinths of Reason William Poundstone, 2011-07-20 This sharply intelligent consistently provocative book takes the reader on an astonishing thought provoking voyage into the realm of delightful uncertainty a world of paradox in which logical argument leads to contradiction and common sense is seemingly rendered irrelevant **The Labyrinths of Reason** William Poundstone, **Labyrinths of Exemplarity** Irene E. Harvey, 2012-02-01 Labyrinths of Exemplarity presents the first comprehensive in depth study of the problem of exemplarity or how we move between the general and the particular in order to try to understand our world The author's focus ranges from the most basic and fundamental issues of what examples are and where they come from to the complex key issues of how examples function in the discourses they inhabit and what this functioning tells us about the nature of examples or exemplarity itself The problem is treated especially in connection to Rousseau and Aristotle with reference to deconstruction especially Derrida and the range of Western metaphysics Ultimately a new theory of examples is offered one not drawn from the assumptions made by earlier philosophers but rather from the usage and functioning of examples in philosophical discourse **Haunting Modernity and the Gothic Presence in British Modernist Literature** Daniel Darvay, 2016-09-02 This book explores the complex relationship between British modernism and the Gothic tradition over several centuries of modern literary and cultural history Illuminating the blind spots of Gothic criticism and expanding the range of cultural material that falls under the banner of this tradition Daniel Darvay focuses on how late nineteenth and early twentieth century British writers transform the artifice of Gothic ruins into building blocks for a distinctively modernist architecture of questions concerns images and arguments To make this argument Darvay takes readers back to early exemplars of the genre thematically rooted in the English Reformation tracing it through significant Victorian transformations to finally the modernist period Through writers such as Oscar Wilde Joseph Conrad Virginia Woolf E M Forster and D H Lawrence this book ultimately expands the boundaries of the Gothic genre and provides a fresh new approach to better understanding the modernist movement A Star-crossed Golden Age Frederick A. Heidegger and Leibniz R. Cristin, 1998-07-31 Cristin philosophy U of Trieste begins by analyzing the concept of foundation reason as a different option made by the two German philosophers He characterizes Heidegger's critique as a reflection on the meaning and essence of reason and the foundation representing a considerable displacement of them such that infallible theoretical mechanisms and indubitable phenomenal substrata no longer exist He then discusses what the two think about thinking and suggests that they may come close to agreeing on what Heidegger calls meditating Finally he ponders the hypothesis that Heidegger's thinking on Being contains an original mingling of rational and meditating thought that echoes inchoate concepts in Leibniz No subject index Annotation copyrighted by Book News Inc Portland OR

The Idea of the Labyrinth from Classical Antiquity through the Middle Ages Penelope Reed Doob, 2019-03-15 Ancient and medieval labyrinths embody paradox according to Penelope Reed Doob Their structure allows a double perspective the baffling fragmented prospect confronting the maze treader within and the comprehensive vision available to those without Mazes simultaneously assert order and chaos artistry

and confusion articulated clarity and bewildering complexity perfected pattern and hesitant process In this handsomely illustrated book Doob reconstructs from a variety of literary and visual sources the idea of the labyrinth from the classical period through the Middle Ages Doob first examines several complementary traditions of the maze topos showing how ancient historical and geographical writings generate metaphors in which the labyrinth signifies admirable complexity while poetic texts tend to suggest that the labyrinth is a sign of moral duplicity She then describes two common models of the labyrinth and explores their formal implications the unicursal model with no false turnings found almost universally in the visual arts and the multicursal model with blind alleys and dead ends characteristic of literary texts This paradigmatic clash between the labyrinths of art and of literature becomes a key to the metaphorical potential of the maze as Doob's examination of a vast array of materials from the classical period through the Middle Ages suggests She concludes with linked readings of four labyrinths of words Virgil's Aeneid Boethius Consolation of Philosophy Dante's Divine Comedy and Chaucer's House of Fame each of which plays with and transforms received ideas of the labyrinth as well as reflecting and responding to aspects of the texts that influenced it Doob not only provides fresh theoretical and historical perspectives on the labyrinth tradition but also portrays a complex medieval aesthetic that helps us to approach structurally elaborate early works Readers in such fields as Classical literature Medieval Studies Renaissance Studies comparative literature literary theory art history and intellectual history will welcome this wide ranging and illuminating book

[Centaurs, Rioting in Thessaly: Memory and the Classical World](#) Martyn Hudson, 2018-01-07 This book treads new paths through the labyrinths of our human thought It meanders through the darkness to encounter the monsters at the heart of the maze Minotaurs Centaurs Automata Makers Humans One part of our human thought emerges from classical Ionia and Greek civilisation more generally We obsessively return to that thought tread again its pathways re enact its stories repeat its motifs and gestures We return time and time again to construct and re construct the beings which were part of its cosmology and mythology stories enacted from a classical world which is itself at once imaginary and material The Never Never Lands of the ancient world contain fabulous beasts and humans and landscapes of desire and violence We encounter the rioting Centaurs there and never again cease to conjure them up time and time again through our history The Centaur mythologies display a fascination with animals and what binds and divides human beings from them The Centaur hints ultimately at the idea of the genesis of civilisation itself The Labyrinth constructed by Daedalus is itself a prison and a way of thinking about making designing and human aspiration Designed by humans it offers mysteries that would be repeated time and time again a motif which is replicated through human history Daedalus himself is an archetype for creation and mastery the designer of artefacts and machines which would be the beginning of forays into the total domination of nature Centaurs Labyrinths Automata offer clues to the origins and ultimately the futures of humanity and what might come after it Martyn Hudson is the coordinator of the Co Curate North East digital archives and machines project at Newcastle University in the School of Arts
