Abstracting Reality:

Abstracting Reality Mark J. P. Wolf, 2000 Abstracting Reality considers the relationship between digital technology and culture and their mutual influences on each other The book begins with an examination of how everyday life became quantized over time setting the stage for digital technology which developed out of communication machine control and calculating machines From there the book explores how digital technology changed the nature of art inherent culture biases in digitization composite imagery machine mediated communication the metaphor of cyberspace virtual reality and finally the way in which digital technology and imaging changes the very nature of indexicality itself **Spirits in the Material**

World Gil Germain, 2009-10-26 In Spirits in the Material World The Challenge of Technology Gil Germain provocatively argues that humans are fast becoming spirit like creatures beings who assume their bodies are incidental to what it means to be human and the real world an accidental quality of the human condition Technology it is suggested authorizes such an understanding and legitimates a manner of action that obscures the centrality of embodiment Technology properly understood is thus an otherworldly or spiritual force Spirits in the Material World challenges the assumptions underpinning the technological world view through a reading of leading contemporary theorists who have addressed the interconnection between technology and embodiment The book both reveals and contests the multifarious ways in which technology s spiritual thrust is manifested in contemporary thought and practice While respecting technology s hold on modernity and its predisposition toward disembodiment Germain gives important reasons why this inclination toward spiritization ought to be resisted and what shape this resistance must take if it is to be meaningful Spirits in the Material World will appeal to a broad spectrum of scholars and students alike especially those interested in philosophy of technology postmodernism political theory phenomenology the end of history debate and deep ecology **Simulation Conceptual Modeling** Jeffrey

Strickland, 2011-10-27 Simulation Conceptual Modeling explores several system analysis methods and conceptual modeling techniques It also discusses appropriate tools that may be used to assist with conceptual modeling In addition it discusses how to evaluate the quality of a conceptual model Some commonly used conceptual modeling techniques and methods include Data Flow Modeling Entity Relationship Modeling Event Drive Process Chain Joint Application Development Place Transition Net Modeling State Transition Modeling Object Role Modeling and Unified Modeling Language UML

Strengthening U.S. Air Force Human Capital Management National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Human-Systems Integration, Committee on Strengthening U.S. Air Force Human Capital Management, 2021-03-02 The USAir Force human capital management HCM system is not easily defined or mapped It affects virtually every part of the Air Force because workforce policies procedures and processes impact all offices and organizations that include Airmen and responsibilities and relationships change regularly To ensure the readiness of Airmen to fulfill the mission of the Air Force strategic approaches are developed and

Simulation Modeling of Forest Landscape Disturbances Ajith H. Perera, Brian R. Sturtevant, Lisa J. Buse, 2015-07-27 Forest landscape disturbances are a global phenomenon Simulation models are an important tool in understanding these broad scale processes and exploring their effects on forest ecosystems This book contains a collection of insights from a group of ecologists who address a variety of processes physical disturbances such as drought wind and fire biological disturbances such as defoliating insects and bark beetles anthropogenic influences interactions among disturbances effects of climate change on disturbances and the recovery of forest landscapes from disturbances all from a simulation modeling perspective These discussions and examples offer a broad synopsis of the state of this rapidly evolving subject

Complexity and Organizational Reality Ralph D. Stacey, 2009-12-18 Approaches to leadership and management are still dominated by prescriptions usually claimed as scientific for top executives to choose the future direction of their organization The global financial recession and the collapse of investment capitalism surely not planned by anyone make it quite clear that top executives are simply not able to choose future directions Despite this current management literature mostly continues to avoid the obvious management s inability to predict or control what will happen in the future The key question now must be how we are to think about management if we take the uncertainty of organizational life seriously Ralph Stacey has turned to the sciences of uncertainty and complexity to develop an understanding of leadership and management as the ordinary politics of daily organizational life In presenting organizations as a series of complex responsive processes Stacey s new book helps us to see organizational reality for what it actually is human beings engaged in many many local conversational interactions and power relations in which they negotiate their ideologically based choices Organizational continuity and change emerge unpredictably rather than as a result of any overall plan This is a radically different picture from the one painted by most of the management literature which explains organizational continuity and change as the realization of the global plans and choices of a few powerful executives within an organization Providing a new foundation for understanding complexity and management this important book is required reading for managers and leaders wanting to understand the reality of complexity in organizations including those engaged

The Passion of Pier Paolo Pasolini Sam Rohdie, 2019-07-25 a keen and brilliant critical account of Pasolini s films and writings

Italic Rohdie's personal idiosyncratic critical style is backed up by serious scholarly research as the rich bibliography attests. This is one of the most original recent additions to the ever growing literature on Pasolini. Choice refreshingly personal and full of unpredictable tangents. *Film Quarterly* Sam Rohdie has written a personal wonderfully lucid account of Pier Paolo Pasolini's cinema and literature.

Special Effects on the Screen Martin Lefebvre, Marc Furstenau, 2025-10-01 Since the very first days of cinema audiences have marveled at the special effects imagery presented on movie screens. While long relegated to the margins of film studies special effects have recently become the object of a burgeoning field of scholarship. With the emergence of a digital cinema and the development of computerized visual effects film theorists and historians have been reconsidering the traditional accounts of cinematic representation recognising the important role of special effects. Understood as a constituent part of the cinema special effects are a major technical but also aesthetic component of filmmaking and an important part of the experience for the audience. In this volume new directions are charted for the exploration of this indispensable aspect of the cinematic experience. Each of the essays in this collection offers new insight into the theoretical and historical study of special effects. The contributors address the many aspects of special effects from a variety of perspectives considering them as a conceptual problem recounting the history of specific special effects techniques and analysing notable effects films.

Modelling Command and Control Neville A. Stanton, Chris Baber, 2017-10-23 Since its inception just after the Second World War Human Factors research has paid special attention to the issues surrounding human control of systems. Command and control environments continue to represent a challenging domain for human factors research. *Modelling Command and Control* takes a broad view of command and control research to include C2 command and control C3 command control and communication and C4 command control communication and computers as well as human supervisory control paradigms. The book presents case studies in diverse military applications for example land sea and air of command and control. The book explores the differences and similarities in the land sea and air domains the theoretical and methodological developments approaches to system and interface design and the workload and situation awareness issues involved. It places the role of humans as central and distinct from other aspects of the system. Using extensive case study material *Modelling Command and Control* demonstrates how the social and technical domains interact and why each require equal treatment and importance in the future.

Geoarchaeology Carlos Cordova, 2018-08-30 Geoarchaeology is traditionally concerned with reconstructing the environmental aspects of past societies using the methods of the earth sciences. The field has been steadily enriched by scholars from a diversity of disciplines and much has happened as the importance of global perspectives on environmental change has emerged. Carlos Cordova provides a fully up to date account of geoarchaeology that reflects the important changes that have occurred in the past four decades. Innovative features include the development of the human ecological approach and the impact of technology on this approach how the diversity of disciplines contributes to archaeological questions frontiers of archaeology in the deep past particularly the Anthropocene.

When the Gospel Grows Feet Thomas M. Kelly,2013 The Salvadoran priest Rutilio Grande SJ was killed in a hail of bullets on March 12 1977 along with two passengers in the car he drove The impact of this killing transformed his friend and archbishop Oscar Romero as well as the church in Latin America and throughout the world How could powerful forces within the overwhelmingly Catholic country of El Salvador execute a Roman Catholic priest and two innocent people in broad daylight in front of witnesses Why would this same government go to the extreme of murdering thousands of lay Catholic ministers dozens of priests and even the nation's archbishop Why would the government and the oligarchy that supported it believe it necessary to repress the church in such a brutal manner Thomas Kelly finds answers to these questions by exploring the church's identity and mission during the colonial period 1500-1820 and the transformative impact of Vatican II 1962-65 on the Latin American bishops He considers Grande's life formation ministry and death and his impact on Archbishop Romero Finally Kelly explains what Grande and the church of El Salvador can teach North American Catholics today

English Studies in Transition Piero Boitani,Robert Clark,2002-09-11 Bringing together twenty-five contributors from all over Europe this volume represents the vitality and diversity of the current transcultural European dialogue on English studies Topics addressed include the nature of the canon the poetics of language the representation of women and the notion of nationalism in post-colonial literature The significance of this volume lies not only in the quality of the individual contributions but also in the fact that it marks an important turning point in the history of English studies in Europe

The Cinema of Wim Wenders Alexander Graf,2002 The Cinema of Wim Wenders The Celluloid Highway is a new study of the films of this most prominent of German directors and penetrates the seductive sounds and images for which he is best known The book analyses the individual films in the context of a preoccupation central to all of Wenders' work and writings why modern cinema a recording art solely composed of sounds and images naturally developed into a primarily narrative medium a domain traditionally associated with words and sentences With its emphasis on analysing the films themselves this book identifies and critically elucidates Wenders' chief artistic motivation that the act of seeing can constitute a creative act in its own right
