Walter Benjamin and the Architecture of Modernity Andrew Benjamin, Charles Rice, 2009 Walter Benjamin is universally recognised as one of the key thinkers of modernity his writings on politics language literature media theology and law have had an incalculable influence on contemporary thought Yet the problem of architecture in and for Benjamin's work remains relatively underexamined Does Benjamin's project have an architecture and if so how does this architecture affect the explicit propositions that he offers us In what ways are Benjamin's writings centrally caught up with architectural concerns from the redevelopment of major urban centres to the movements that individuals can make within the new spaces of modern cities How can Benjamin's theses help us to understand the secret architectures of the present This volume takes up the architectural challenge in a number of innovative ways collecting essays by both well known and emerging scholars on time in cinema the problem of kitsch the design of graves and tombs the orders of road signs childhood experience in modern cities and much more Engaged interdisciplinary bristling with insights the essays in this collection will constitute an

indispensable supplement to the work of Walter Benjamin as well as providing a guide to some of the obscurities of our own present

Nelson Goodman and Modern Architecture Kasper Lægning, 2024-07-19 This book orchestrates a convergence of two discourses from the 1960s Nelson Goodman's aesthetic theory on one side and critiques of modern architecture articulated by figures like Peter Blake Charles Jencks and Robert Venturi Denise Scott Brown on the other Grounded in Goodman's aesthetic theory the book explores his conceptual framework within the context of modern architecture At the heart of the investigation lies Goodman's concept of exemplification While his notion of denotation pertains to representational elements often ornaments in architecture exemplification accentuates specific formal properties at the expense of others including color spatial orientation transparency seriality and the like Supplemented by findings from phenomenology the book traces these effects in buildings notably those by Ludwig Mies van der Rohe Walter Gropius Le Corbusier and Frank Lloyd Wright all key figures in the critiques of modern architecture Employing Goodman's framework the book aims to address accusations of emptiness and alienation directed at modern architecture in the postwar era It illustrates that modern architecture symbolizes aesthetically in a fundamentally different way than architecture from earlier periods This book will be of interest to architects artists researchers and students in architecture architectural history theory cultural theory philosophy and aesthetics

The SAGE Handbook of Architectural Theory C. Greig Crysler, Stephen Cairns, Hilde Heynen, 2012-01-20 Offers an intense scholarly experience in its comprehensiveness its variety of voices and its formal organization the editors took a risk experimented and have delivered a much needed resource that upends the status quo Architectural Histories journal of the European Architectural History Network Architectural theory interweaves interdisciplinary understandings with different practices intentions and ways of knowing This handbook provides a lucid and comprehensive introduction to this challenging and shifting terrain and will be of great interest to students academics and practitioners alike Professor Iain Borden UCL Bartlett School of Architecture In this collection architectural theory expands outward to interact with adjacent discourses such as sustainability conservation spatial practices virtual technologies and more We have in The Handbook of Architectural Theory an example of the extreme generosity of architectural theory It is a volume that designers and scholars of many stripes will welcome K Michael Hays Eliot Noyes Professor of Architectural Theory Harvard University The SAGE Handbook of Architectural Theory documents and builds upon the most innovative developments in architectural theory over the last two decades Bringing into dialogue a range of geographically institutionally and historically competing positions it examines and explores parallel debates in related fields The book is divided into eight sections Power Difference Embodiment Aesthetics Pleasure Excess Nation World Spectacle History Memory Tradition Design Production Practice Science Technology Virtuality Nature Ecology Sustainability City Metropolis Territory Creating openings for future lines of inquiry and establishing the basis for new directions for education research and practice the book is organized around specific case studies to provide a critical interpretive and speculative enquiry into

the relevant debates in architectural theory Handbook of Historical Sociology Gerard Delanty, Engin F Isin, 2003-06-03

The overall conception of the volume is absolutely splendid and the editors skilfully place the material in the context of disciplinary and post disciplinary developments in sociology This is a major contribution to the field as well as a comprehensive and reliable guide to its main components William Outhwaite Professor of Sociology School of European Studies University of Sussex It is hard to think of anything that has been left out in this masterly survey of contemporary historical sociology The editors have done a superb job in the selection of both themes and contributors We now at last have an up to date book to assign in our graduate courses on comparative historical sociology There s really nothing else like it out there The editors introduction is one of the best things I have read on how the field developed and the problems it has encountered Krishan Kumar William R Kenan Jr Professor of Sociology University of Virginia The range of topics covered and the number of distinguished scholars who have contributed to the handbook is impressive with leading figures such as Bryan S Turner John R Hall Gianfranco Poggi and Craig Calhoun among the contributors to a book that covers areas as diverse as post colonial historiography and the historical sociology of the city the handbook fills a void within the sizable literature on historical sociology and undoubtedly will be a useful addition to graduate reading lists The British Journal of Sociology What is important in historical sociology What are the main routes of development in the subject This Handbook consists of 26 chapters on historical sociology It is divided into three parts Part One is devoted to Foundations and covers Marx Weber evolutionary and functionalist approaches the Annales School Elias Nelson and Eisenstadt Part Two moves on to consider major approaches such as modernization approaches late Marxist approaches historical geography institutional approaches cultural history intellectual history postcolonial and genealogical approaches The third part is devoted to the major substantive themes in historical sociology ranging from state formation nationalism social movements classes patriarchy architecture religion and moral regulation to problems of periodization and East West divisions Each part includes an introduction that summarizes and contextualizes chapters A general introduction to the volume outlines the current situation of historical sociology after the cultural turn in the social sciences It argues that historical sociology is deeply divided between explanatory sociological approaches and more empirical and interpretative historical approaches Systematic and informative the book offers readers the most complete and authoritative guide to historical sociology **Encyclopedia of Twentieth Century Architecture** R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclopedic of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century s vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries

Valences of Historiography Gevork Hartoonian, 2024-12-30 The compiled essays offer various themes and ways of approaching historiography Each chapter probes the state of contemporary theorization of architecture histories working toward the theme of critically re writing history Essential to each author s contribution are specific traditions created by the mole of history burrowing through the past This book concerns the historian s conjectures towards capturing the past and present zeitgeist Temporality is the theme running through the narrative of this volume It raises the question of whether the ever growing body of work on architectural history should be considered as history More specifically what is the intersection between history and architectural history Furthermore can every text focused on architecture s past be considered categorically historiographic In what capacity does architectural history index history beyond contingencies and without reducing the text to empirical realities and the historian s interest in a specific subject including those collected through archival research itself an emblem of textuality This book upholds the conviction that the past should be recalled accurately and that there is no history but historical criticism the scope of which exceeds the historicity of Humanism Dialectically the timeline experienced across contemporary techno economic and cultural domains aesthetics offers an opportunity to explore architecture produced outside the Euro American continents *Valences of Historiography* offers a fresh take on architectural history that is useful for academics researchers and architecture students

Modernism in Late-Mao China Ke Song, 2023-04-28 This book investigates the architectural history of China in the Mao era 1949 1976 focusing on the rise of modernism in the last seven years of the Cultural Revolution from 1969 to 1976 It highlights the new architecture of this period exemplified by three clusters of buildings for foreign affairs namely buildings for foreign diplomacy in Beijing buildings for foreign trade in Guangzhou and China s foreign aid projects overseas The emergence of new architecture in the early 1970s is closely associated with China s political and diplomatic shift of the time from a radical emphasis on ideological struggle to a dynamic balance between leftist ideology and pragmatic concerns In this context China s relations with the West quickly improved culminating with American president Richard Nixon s visit to China in 1972 The increasing foreign affairs brought new opportunities to Chinese architects who referenced both Western modernism and Chinese architectural traditions to create a new version of Chinese modernism The book brings dimensions of form politics and knowledge to the analysis of architecture to construct an understanding of architectural design as an aesthetic political and intellectual practice *Modernism in Late Mao China* will be an enriching and useful reference for students and scholars who are interested in the global architectural history of the twentieth century especially Cold War modernism

The Figure of Knowledge Sebastiaan Loosen, Rajesh Heynickx, Hilde Heynen, 2020-10-01 It is a major challenge to write the history of post WWII architectural theory without boiling it down to a few defining paradigms An impressive anthologising effort during the 1990s charted architectural theory mostly via the various theoretical frameworks employed such as critical theory critical regionalism deconstructivism and pragmatism Yet the intellectual contours of what constitutes architectural theory have

been constantly in flux It is therefore paramount to ask what kind of knowledge has become important in the recent history of architectural theory and how the resulting figure of knowledge sets the conditions for the actual arguments made The contributions in this volume focus on institutional geographical rhetorical and other conditioning factors They thus screen the unspoken rules of engagement that postwar architectural theory ascribed to

On Power in Architecture Mateja Kurir, 2024-09-30 Architecture has always been a decisive manifestation of power This volume represents an attempt to question and reflect on the relationship between power and architecture from three philosophical perspectives materialistic phenomenological and post structuralist This collection opens an interdisciplinary investigation that aims to reflect on architecture and its interconnectedness with power within philosophy and cultural theory at large while presenting these concepts using practical examples from the built environment Internationally recognised authors philosophers architectural theorists and historians Andrew Benjamin Andrew Ballantyne Mladen Dolar Hilde Heynen Nadir Lahiji Jeff Malpas Dean Komel Elke Krasny Robert Pfaller Gerard Reinmuth Luka Skansi Douglas Spencer Teresa Stoppani and Sven Olov Wallenstein present their reflections in original unpublished essays and interviews In the presented works architecture is combined and transgressed by philosophy in a new discussion that focuses only on power The contributions in this collection open a variety of architectural questions one of the central among them being the impact of neoliberal capitalism on architecture Architecture with its implications on the complex contemporary political and social reality is severely changing our space and more globally our environment A reflection on the multilayered relation between architecture and power has never been as topical as it is today This book will therefore be of interest to students researchers and academics or professionals within the fields of architecture philosophy sociology political sciences and cultural sciences

Constructing a Place of Critical Architecture in China Guanghui Ding, 2016-03-09 For the past 30 years The Chinese journal Time Architecture Shidai Jianzhu has focused on publishing innovative and exploratory work by emerging architects based in private design firms who were committed to new material theoretical and pedagogical practices In doing so this book argues that the journal has engaged in the presentation and production of a particular form of critical architecture described as an intermediate criticality as a response to the particular constraints of the Chinese cultural and political context The journal s publications displayed a dual critique a resistant attitude to the dominant modes of commercial building practice characterised by rapid and large scale urban expansion and an alternative publishing practice focusing on emerging independent architectural practitioners through the active integration of theoretical debates architectural projects and criticisms This dual critique is illustrated through a careful review and analysis of the history and programme of the journal By showing how the work of emerging architects including Yung Ho Chang Wang Shu Liu Jiakun and Urbanus are situated within the context of the journal s special thematic editions on experimental architecture exhibition group design new urban space and professional system the book assesses the contribution the journal has made to the emergence of a critical

architecture in China in the context of how it was articulated debated presented and perhaps even produced within the pages of the publication itself The protagonists of critical architecture have endeavoured to construct an alternative mode of form and space with strong aesthetic and socio political implications to the predominant production of architecture under the current Chinese socialist market economy To rebel against certain forms of domination and suppression by capital and power is by no means to completely reject them rather it is to use them

Journal of the Society of Architectural Historians Society of Architectural Historians,2005 Includes special issues *Spaces of Crisis and Critique* Anthony Faramelli,David Hancock,Robert G. White,2018-09-20 In *Of Other Spaces* Foucault coined the term heterotopias to signify all the other real sites that can be found within the culture which are simultaneously represented contested and inverted For Foucault heterotopic spaces were first of all spaces of crisis or transformative spaces however these have given way to heterotopias of deviation and spaces of discipline such as psychiatric hospitals or prisons Foucault's essay provokes us to think through how spaces of crisis and critique function to open up disruptive subversive or minoritarian fields within philosophical political cultural or aesthetic discourses This book takes this interdisciplinary and international approach to the spatial challenging existing borders boundaries and horizons from Claire Colebrook's chapter unpacking the heterotopic spaces of America and Mexico that lie beyond reductive ideological spaces of light and darkness to a Foucauldian reading of the Zapatista resistance With essays on politics philosophy literature post colonial studies and aesthetics from established and emerging academics this book answers Foucault's call to give us a better understanding of our present cultural epoch

Colin Rowe's Gospel of Modern Architecture Braden R. Engel,2022-05-11 Colin Rowe is recognized as one of the most influential architecture teachers of the twentieth century yet he is more popularly known for his critical essays This book investigates the methods that made Rowe such an influential teacher Paralleling the promises of the modernists to biblical prophecies of salvation Rowe led his students into the temptations of modern architecture in order to test their convictions in architectural design Everything Rowe did taught and beyond his published writing this book uniquely pulls from his personal notes sketches talks and thoughts This analysis of Rowe's use of irony paradox ambiguity and subversion will benefit educators and designers interested in the roles of mischief and curiosity in creative endeavors The book offers a more balanced appreciation of Colin Rowe while rethinking attitudes to pedagogy historical interpretation and meaning in the arts

Mies at Home Xiangnan Xiong,2022-06-16 *Mies at Home* is a radical rereading of one of the most significant periods in Mies van der Rohe's career from the mid to late 1920s when he was developing his seminal spatial ideas ideas that would culminate in his celebrated design of the Tugendhat House The book examines how Mies's experience of residing in his apartment doubling as a studio in central Berlin had an impact on his spatial concepts It uncovers one of the most profound but virtually untold aspects of Mies's development how his visions of an ideal lifestyle came out of his own living experience and how they in turn informed his domestic architecture Mies's quest featured two breakthroughs In the Weissenhof apartment building he

conveyed a flexible and manifold lifestyle that many of the avant garde artists including himself were practicing Later in the Tugendhat House he put forward an alternative way of living that centered on contemplation Beautifully illustrated throughout Mies at Home offers a fresh investigation of the diverse intentions and strategies the architect used in creating his iconic open spaces It will be an insightful read for researchers academics and students in architectural history and theory

Making a New World Tom Avermaete,2012 A heavily illustrated study of the foundations and working mechanisms of modern communities Rethinking Modernity and National Identity in Turkey Sibel Bozdogan,Resat Kasaba,2011-11-15 In the first two decades after W W II social scientist heralded Turkey as an exemplar of a modernizing nation in the Western mold Images of unveiled women working next to clean shaven men healthy children in school uniforms and downtown Ankara s modern architecture all proclaimed the country s success Although Turkey s modernization began in the late Ottoman era the establishment of the secular nation state by Kemal Ataturk in 1923 marked the crystallization of an explicit elite driven project of modernity that took its inspiration exclusively from the West The essays in this book are the first attempt to examine the Turkish experiment with modernity from a broad interdisciplinary perspective encompassing the fields of history the social sciences the humanities architecture and urban planning As they examine both the Turkish project of modernity and its critics the contributors offer a fresh balanced understanding of dilemmas now facing not only Turkey but also many other parts of the Middle East and the world at large The Persistence of Modernity Albrecht Wellmer,2018-03-12 In this timely new book Wellmer intervenes in the highly topical debates on modernity and post modernity Discussing the work of Adorno Habermas Peter Burger and Jean Fran ois Lyotard among others he offers a penetrating analysis of the aesthetic ethical and philosophical dimensions of the modern era In opposition to those who view post modernity as a sign of post enlightenment Wellmer makes a reasoned plea for a re examination of the goals of emancipatory Enlightenment and explores its implications for the appreciation of modern art forms **The Structurist** ,1999
