 Nontraditional Threats to Security The events of September 11 2001 have sharpened the debate over the meaning of being
 secure Before 9 11 there were warnings in all parts of the world that social and environmental changes were occurring While
 there was prosperity in North America and Western Europe there was also increasing recognition that local and global
 effects of ecosystem degradation posed a serious threat Trekking from Cairo to Cape Town thirty years after living in Africa
 as a young teacher for example travel writer Paul Theroux concluded that development in sub Saharan Africa had failed to
 improve the quality of life for 300 million people Africa is materially more decrepit than it was when I first knew it hungrier
 poorer less educated more pessimistic more corrupt and you can t tell the politicians from the witch doctors 2002 While
 scholars and historians will debate the causes of 9 11 for some time one message is clear An often dizzying array of
 nontraditional threats and complex vulnerabilities define security today We must understand them and deal with them or
 suffer the consequences Environmental security has always required att tion to nontraditional threats linked closely with
 social and economic well being **Livestock System Research Manual** ,
