Learning Country in Landscape Architecture David S. Jones,2021-02-27 This book strategically focuses upon the feasibility of positioning Indigenous Knowledge Systems into tertiary built environment education and research in Australia Australian tertiary education has little engaged with Indigenous peoples and their Indigenous Knowledge Systems and the respectful translation of their Indigenous Knowledge Systems into tertiary education learning In contrast while there has

been a dearth of discussion and research on this topic pertaining to the tertiary sector the secondary school sector has passionately pursued this topic There is an uneasiness by the tertiary sector to engage in this realm overwhelmed already by the imperatives of the Commonwealth s Closing the Gap initiative to advance Aboriginal and Torres Strait Islander tertiary education successes and appointments of Indigenous academics As a consequence the teaching of Indigenous Knowledge Systems relevant to professional disciplines particularly landscape architecture where it is most apt is overlooked and similarly little addressed in the relevant professional institute education accreditation standards

Diversity in Visual Representations of the Past Jo Zalea Matias,Nicola Scheyhing,Doris Gutsmedl-Schumann,2025-09-26 This volume presents an overview of the diversity or lack thereof in visual representations of the European past that are found in archaeology museums and media While publications discussing gender stereotypes in European archaeological media exist other identities remain underrepresented namely Black Indigenous and People of Color BIPOC those with visible and invisible disabilities and very young and very old This volume offers insight into these gaps in European media and archaeology while

also providing alternative explanations for interpreting these often stereotyped identities and methodologies for inclusion. The chapters within this volume are divided into four themes. Themes cover the development of images of the past and discusses how images are chosen in museums. The book identifies who is missing in images of the past with topics on representing individuals with disabilities, children in museums, the Other in Roman art and Scythians in museums and books, and critiques approaches to representation and diversity in media such as in textbooks, popular media, and children's books. Finally, the book challenges the lack of diversity and a proliferation of stereotypes in images of the past and asks how do we improve on them and create new ones. Overall, this book addresses the need for diversity in images both within academic archaeology and with the broader public. The Engineer, 1904
