Minoan Architecture and Urbanism Quentin Letesson, Carl Knappett, 2017-06-30 Minoan Crete is rightly famous for its idiosyncratic architecture as well as its palaces and towns such as Knossos Malia Gournia and Palaikastro Indeed these are often described as the first urban settlements of Bronze Age Europe However we still know relatively little about the dynamics of these early urban centres How did they work What role did the palaces have in their towns and the towns in their landscapes It might seem that with such richly documented architectural remains these questions would have been answered long ago Yet analysis has mostly found itself confined to building materials and techniques basic formal descriptions and functional evaluations Critical evaluation of these data as constituting a dynamic

built environment has thus been slow in coming This volume aims to provide a first step in this direction It brings together international scholars whose research focuses on Minoan architecture and urbanism as well as on theory and methods in spatial analyses By combining methodological contributions with detailed case studies across the different scales of buildings settlements and regions the volume proposes a new analytical and interpretive framework for addressing the complex dynamics of the Minoan built environment *Essor Monumental et Dynamiques des Populations : la cité Maya de Naachtun (Guatemala) au Classique Ancien (150-550 apr. J.-C.)* Julien Hiquet, 2025-09-11 Naachtun was a major Maya capital during the Early Classic period 150 550 CE marked by impressive monumental architecture This book explores how such construction influenced urban demographics showing that architectural grandeur attracted and anchored a growing population
