

Death in Adolescence

- **Adolescents' views of death are also unrealistic & often highly romantic.**

- Personal Fable (beliefs that they are unique & special) lead to a sense of invulnerability**

- **The most frequent cause of adolescent death is accidents (usually motor vehicle)**

- **Other frequent causes include homicide, suicide, cancer, AIDS**

- **Adolescents tend to feel invulnerable so confronting a terminal illness can be difficult; they often feel angry and "cheated".**

Death, Anxiety, and Future Time Perspectives in Adolescence: Following the Death of a Classmate or Peer Elizabeth Ann DeRath, 1991

Children and Death John E. Schowalter, 1987-11-17. Bringing together the views of numerous distinguished scholars, *Children and Death* investigates the child's concept of death from both academic and clinical points of view. The contributors have aimed at developing practical guidelines for a multidisciplinary approach to the care and support of the dying child, the child's family unit, and staff who work with dying children. The findings presented here are also applicable to care of children with life-threatening illness. Topics discussed include children's concepts of death, emotional impact of disease, perspectives on children's death and dying, and coping with a child's death.

Encyclopedia of Adolescence Roger J.R. Levesque, 2011-09-05. The *Encyclopedia of Adolescence* breaks new ground as an important central resource for the study of adolescence. Comprehensive in breadth and textbook in depth, the *Encyclopedia of Adolescence* with entries presented in easy-to-access A to Z format serves as a reference repository of knowledge in the field as well as a frequently updated conduit of new knowledge long before such information trickles down from research to standard textbooks. By making full use of Springer's print and online flexibility, the *Encyclopedia* is at the forefront of efforts to advance the field by pushing and creating new boundaries and areas of study that further our understanding of adolescents and their place in society. Substantively, the *Encyclopedia* draws from four major areas of research relating to adolescence. The first broad area includes research relating to Self-Identity and Development in Adolescence. This area covers research relating to identity from early adolescence through emerging adulthood, basic aspects of development, e.g., biological, cognitive, social, and foundational developmental theories. In addition, this area focuses on various types of identity: gender, sexual, civic, moral, political, racial, spiritual, religious, and so forth. The second broad area centers on Adolescents' Social and Personal Relationships. This area of research examines the nature and influence of a variety of important relationships, including family, peer, friends, sexual, and romantic, as well as significant nonparental adults. The third area examines Adolescents in Social Institutions. This area of research centers on the influence

and nature of important institutions that serve as the socializing contexts for adolescents These major institutions include schools religious groups justice systems medical fields cultural contexts media legal systems economic structures and youth organizations Adolescent Mental Health constitutes the last major area of research This broad area of research focuses on the wide variety of human thoughts actions and behaviors relating to mental health from psychopathology to thriving Major topic examples include deviance violence crime pathology DSM normalcy risk victimization disabilities flow and positive youth development

Encyclopedia of Death and Dying Glennys Howarth, Oliver Leaman, 2003-12-16 In recent years there has been a massive upsurge in academic professional and lay interest in mortality This is reflected in academic and professional literature in the popular media and in the proliferation of professional roles and training courses associated with aspects of death and dying Until now the majority of reference material on death and dying has been designed for particular disciplinary audiences and has addressed only specific academic or professional concerns There has been an urgent need for an authoritative but accessible reference work reflecting the multidisciplinary nature of the field This Encyclopedia answers that need The Encyclopedia of Death and Dying consolidates and contextualizes the disparate research that has been carried out to date The phenomena of death and dying and its related concepts are explored and explained in depth from the approaches of varied disciplines and related professions in the arts social sciences humanities medicine and the sciences In addition to scholars and students in the field from anthropologists and sociologists to art and social historians the Encyclopedia will be of interest to other professionals and practitioners whose work brings them into contact with dying dead and bereaved people It will be welcomed as the definitive death and dying reference source and an essential tool for teaching research and independent study
