Breast Cancer Screening:

Mammography and Early Breast Cancer Detection Alan B. Hollingsworth, M.D.,2016-08-22 Early detection of breast cancer is critical Yet efforts to cut back on mammography or even stop screening altogether have been gaining ground in the medical community s decades long debate over testing and treatment It is not a purely scientific debate back room politics and hidden agendas have played as much a role as clinical data leading to some surprising conclusions Written by one of the first physicians in the country to specialize in breast cancer risk assessment genetic testing and high risk interventions this book focuses on the screening controversy and explains the arguments used on both sides The author covers the history of screening from the first mobile unit on the streets of Manhattan to the cutting edge imaging technology of today

Breast Cancer Screening in California, 1995 **Breast Cancer Facts, Myths, and Controversies** Madelon L. Finkel, 2021-07-19 This book written for the layperson provides evidence based material explaining the complex and evolving evidence of the benefits and limitations of breast cancer screening and the advances in breast cancer treatment A diagnosis of breast cancer is one of the most emotionally charged statements a woman can hear from her doctor Understanding the rapid changes in breast cancer diagnosis and treatment is challenging especially for those without a medical background This book will help explain the strengths and weaknesses of breast cancer screening breast cancer treatment and ways of coping with the disease for oneself or a loved one Written for the layperson this text explains the history of disease

prevention with a specific emphasis on breast cancer detection and treatment. The main chapters weigh the pros and cons of well known but often mystifying screening tests such as mammograms, discuss the benefits and side effects of targeted hormone therapies, consider holistic regimens that complement traditional medicine and explore the mental, physical and emotional strain caused by breast cancer. Concluding with the current breast cancer screening guidelines recommended by leading organizations in disease prevention, *Breast Cancer Facts, Myths and Controversies* not only engages with the history of breast cancer screening, diagnosis and treatment, it looks ahead to a brighter future for survivors. *Saving Women's Lives* National Research Council, Institute of Medicine, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, National Cancer Policy Board, Committee on New Approaches to Early Detection and Diagnosis of Breast Cancer, 2005-04-18. The outlook for women with breast cancer has improved in recent years. Due to the combination of improved treatments and the benefits of mammography screening, breast cancer mortality has decreased steadily since 1989. Yet breast cancer remains a major problem, second only to lung cancer as a leading cause of death from cancer for women. To date, no means to prevent breast cancer has been discovered, and experience has shown that treatments are most effective when a cancer is detected early, before it has spread to other tissues. These two facts suggest that the most effective way to continue reducing the death toll from breast cancer is improved early detection and diagnosis. Building on the 2001 report *Mammography and Beyond*, this new book not only examines ways to improve implementation and use of new and current breast cancer detection technologies but also evaluates the need to develop tools that identify women who would benefit most from early detection screening. *Saving Women's Lives: Strategies for Improving Breast Cancer Detection and Diagnosis* encourages more research that integrates the development, validation and analysis of the types of technologies in clinical practice that promote improved risk identification techniques. In this way, methods and technologies that improve detection and diagnosis can be more effectively developed and implemented. *Breast Cancer Screening for Medicare Beneficiaries*, 1987. **National Institutes of Health Consensus Development Conference on Breast Cancer Screening for Women Ages 40-49**, 1997. [Breast Cancer Screening Recommendations](#) United States. Congress. House. Committee on Energy and Commerce. Subcommittee on Health, 2012. *Saving Women's Lives* National Research Council, Institute of Medicine, National Cancer Policy Board, Committee on New Approaches to Early Detection and Diagnosis of Breast Cancer, 2004-12-18. In this report, The Breast Cancer Research Foundation (BCRF) and the Institute of Medicine (IOM) present a one-day symposium that was held at the IOM to further disseminate the conclusions and recommendations of the joint IOM and National Research Council report *Saving Women's Lives: Strategies for Improving Breast Cancer Detection and Diagnosis*. The committee assembled for this event was asked to share insights and consider ways in which the objectives of the report could be achieved from the standpoint of what women need to know, the best models of screening programs, manpower, risk stratification, basic research and payment. This symposium seeks to provide continuing food for thought and ideas for actions.
