Hally, 2009-11-01 From 1933 to 1941 Macon was the site of the largest archaeological excavation ever undertaken in Georgia and one of the most significant archaeological projects to be initiated by the federal government during the depression The project was administered by the National Park Service and funded at times by such government programs as the Works Progress Administration Civilian Conservation Corps and Civil Works Administration At its peak in 1955 more than eight hundred laborers were employed in more than a dozen separate excavations of prehistoric mounds and villages The best known excavations were conducted at the Macon Plateau site the

area President Franklin D Roosevelt proclaimed as the Ocmulgee National Monument in 1936 Although a wealth of material was recovered from the site in the 1930s little provision was made for analyzing and reporting it Consequently much information is still unpublished The sixteen essays in this volume were presented at a symposium to commemorate the fiftieth anniversary of the founding of the Ocmulgee National Monument The symposium provided archaeologists with an opportunity to update the work begun a half century before and to bring it into the larger context of southeastern history and general advances in archaeological research and methodology Among the topics discussed are platform mounds settlement patterns agronomic practices earth lodges human skeletal remains Macon Plateau culture origins relations of site inhabitants with other aboriginal societies and Europeans and the challenges of administering excavations and park development

Institute of Environmental Studies, 1984 *Heritage Studies* Marie Louise Stig Sørensen, John Carman, 2009-09-18 This is the first volume specifically dedicated to the consolidation and clarification of Heritage Studies as a distinct field with its own means of investigation It presents the range of methods that can be used and illustrates their application through case studies from different parts of the world including the UK and USA The challenge that the collection makes explicit is that Heritage Studies must develop a stronger recognition of the scope and nature of its data and a concise yet explorative understanding of its analytical methods The methods considered fall within three broad categories textual discourse analysis methods for investigating people's attitudes and behaviour and methods for exploring the material qualities of heritage The methods discussed and illustrated range from techniques such as text analysis interviews participant observation to semiotic analysis of heritage sites and the use of GIS Each paper discusses the ways in which methods used in social analysis generally are explored and adapted to the specific demands that arise

when applied to the investigation of heritage in its many forms Heritage Studies is a seminal volume that will help to define the field The global perspective and the shared focus upon the development of reflexive methodologies ensure that the volume explores these central issues in a manner that is simultaneously case specific and of general relevance **The**
