Arctic Unfolding:

Arctic unfolding Nicholas Vladimir Polunin,1905

Arctic Bibliography Arctic Institute of North America,1953

Arcticologies Lowell Duckert,2025-08-26 Exploring the frozen past to rethink our warming future Do we really know what cold is In Arcticologies Lowell Duckert delves into early modern European texts to trace how representations of frigidity from the sixteenth and seventeenth centuries have contributed to historical understandings of climate and contemporary debates on climate change Arguing that human culture and science are in fact indebted to the cold Duckert suggests that these early depictions offer critical terms for advancing the aims of climate change activism and assisting in counterapocalyptic thinking An imaginative and intellectual journey Arcticologies reveals the enduring role of cold in wide ranging storytelling traditions It draws on Shakespeare s Hamlet and Othello and the works of Thomas Dekker Ren Descartes and Thomas Hobbes and is informed throughout by contemporary Indigenous writing including that of Sheila Watt Cloutier and Leanne Betasamosake Simpson In reflecting on these assorted accounts Duckert sees cold as not only an environmental hardship but a source of cultural creativity and resilience highlighting moments of collaboration between humans and the icy world from arctic exploration to urban fairs on frozen rivers Cold Duckert makes clear is more than the absence of warmth Situating our contemporary obsession with impending planetary meltdown within the mazelike arcticologies of the past Duckert shows how early modern cold brought about forms of curiosity vocabulary and interspecies relationality that can serve us today In doing so he asks us to identify what has been lost and who is at risk in today s thinning cold while also urging us to imagine alternative futures focused not on inevitable and total collapse but on adaptation and preserving what remains

Cold Waters Markku Lehtimäki,Arja Rosenholm,Elena Trubina,Nina Tynkkynen,2022-11-01 This book addresses the Arctic and the northern regions by exploring cold waters and northern seascapes It focuses on cultural discourses and artistic representations concerning the human experience and imagination of how the Arctic Ocean has been explored and used It aims to assess what is specific to the northern waters vis vis other sea and water areas in the world The contextual background is provided by the fundamental shift from terra based thinking towards aqua based thinking including the histories of the northern waters and the innovative ocean studies of the last decades This book will be of interest to readers in Arctic studies and Sea and Ocean studies including those with interests in literature history cultural and film studies anthropology and politics Environmental History and Cultural studies as well as in Russian studies The book has been assembled with a view towards upper level undergraduate and post graduate students and scholars and will also be appropriate for courses in the fields mentioned above The book will be of interest to specialists working in and with Arctic environmental issues There is a broad array of international academic networks environmental governance and cultural associations outside academia whose members may also find the book of interest

Research Memorandum Rand Corporation,1947

The Adaptive Challenge of Climate Change Karen L. O'Brien,Elin Selboe,2015-08-07 This book

presents a new perspective on climate change for researchers and policymakers in the environmental social sciences and humanities *The Climate-Conflict-Displacement Nexus from a Human Security Perspective* Mohamed Behnassi, Himangana Gupta, Fred Kruidbos, Anita Parlow, 2022-04-01 Climate change is reshaping the planet its ecosystems and the evolution of human societies Related impacts and disasters are triggering significant shifts in the inextricably interconnected human and ecological systems with unprecedented potential implications These shifts not only threaten survival at species and community levels but are also emerging drivers of conflicts human insecurity and displacement both within and across national borders Taking these shifting dynamics into account particularly in the Anthropocene era this book provides an analysis of the climate conflict migration nexus from human security and resilience perspectives The core approach of the volume consists of unpacking the key dynamics of the nexus between climate change conflict and displacement and exploring the various local and global response mechanisms to address the nexus assess their effectiveness and identify their implications for the nexus itself It includes both conceptual research and empirical studies reporting lessons learned from many geographical environmental social and policy settings *The Northern Silence* Andrew Mellor, 2022-01-01 An essential exploration of Nordic composers and musicians and the distinctive culture that continues to shape them Once considered a musical backwater the Nordic region is now a musical powerhouse Conductors from Denmark and Finland dominate the British and American orchestral scene Interest in the old masters Sibelius and Grieg is soaring and progressive pop artists like Björk continue to fascinate as much as they entertain Andrew Mellor journeys to the heart of the Nordic cultural psyche From Reykjavik to Rovaniemi he examines the success of Nordic music s performers the attitude of its audiences and the sound of its composers past and present celebrating along the way some of the most remarkable music ever written Mellor peers into the dark side of the Scandinavian utopia from xenophobia and alcoholism to parochialism and the twilight of the social democratic dream Drawing on a range of genres and firsthand encounters he reveals that our fascination with Nordic societies and our love for Nordic music might be more intertwined than first thought *Polar Winds* Danielle Metcalfe-Chenail, 2014-09-10 With historical research and rare interviews explore the highs and lows of aviation north of the 60th parallel This journey takes readers from hot air balloons above the Klondike gold fields to international bids for the North Pole to high profile crashes and search and rescue operations *The Ocean and Us* Farah Obaidullah, 2023-02-02 The Ocean and Us provides an overview of our contemporary understanding of the ocean and all the ways our lives interact with it It is intended for everyone with an interest in our blue planet The book brings together the expertise of over 35 ocean specialists from around the world It explores a wide variety of themes including the importance of a healthy ocean in the fight to halt and contain climate change It covers issues such as overfishing and pollution as well as emerging themes such as the blue economy marine animal welfare and how we can leverage innovation to protect the ocean The book provides an overview of some of the world s iconic threatened and at risk ocean ecosystems and outlines current

governance structures and ocean management tools It also discusses the important social dimensions between people and the ocean such as ocean and human wellbeing communities and the ocean and who gets to participate in the ocean space The book aims to enhance ocean literacy by making specialist concepts accessible to non experts with a view to empowering concerned citizens everywhere to come into action for the ocean and pave a better way forward for humanity

GlobalArctic Gunnar Rekvig,Matthias Finger,2025-06-13 The third volume in the Global Arctic series examines the transformation of Arctic governance following the 2022 outbreak of war in Ukraine This conflict has disrupted the post Cold War cooperative circumpolar order upending decades of multilateral collaborations The book traces the Arctic s evolution from Cold War great power competition to a focus on human security and cooperation highlighting the Arctic Council s establishment and the growth of the Arctic family with non Arctic actors It explores how climate change became a key driver for Arctic re engagement opening new opportunities and challenges The 2022 invasion of Ukraine has dramatically altered this landscape ending the post Cold War era of collaboration and ushering in the post post Cold War era raising critical questions about regional cooperation climate change mitigation and global security This book brings together diverse expert perspectives to analyze the rapidly changing geopolitical dynamics of the Arctic It explores the tension between collaboration needs and resurgent great power competition offering valuable insights for policymakers scholars and students As global power dynamics shift and climate change threatens understanding Arctic governance challenges becomes imperative This book serves as an essential resource for navigating the complex Arctic political landscape and examining how new divisions are reshaping the region s future

Getting to Zero Tony Clarke,2018-10-02 Canadians have been coming to a greater understanding of the threat posed by global warming and the need for urgent action by governments industry and the public at large The Trudeau government has more or less taken up the cause Provinces are recognizing the need for action even as they fight over what that should be Some multinational corporations are suddenly promoting themselves as environmental stewards Concerned citizens are looking for ways to effectively reduce their carbon footprint Yet progress has been slow and limited In this book long time social and environmental activist Tony Clarke provides the hard to find information and analysis about what Canada is and is not doing right now to get to zero He documents the key initiatives that are moving Canada towards a lower carbon future But he also spells out how contradictory government decisions and policies are enabling a business as usual approach by the oil and gas industry In doing so he examines how the Trudeau government promotes measures to reduce greenhouse gases but then also promotes pipelines that permit further expansion of Alberta s oil sands and new liquified natural gas plants with enormous greenhouse gas outputs As a participant in events surrounding the 2016 Paris climate summit and as a critic of Alberta s heedless oil sands expansion in his book Tar Sands Showdown Tony Clarke combines a deep understanding of environmental issues with knowledge of how Canada s economic and political systems operate He identifies many positive initiatives organized by various civil society groups taking us on the path to zero

emissions For him effective citizen engagement and action are key to the serious changes needed to get Canada to zero

Bibliography of Natural History Travel Narratives Anne S. Troelstra, 2017-06-01 Anne Troelstra's fine bibliography is an outstanding and ground breaking work He has provided the academic world with a long needed bibliographical record of human endeavour in the field of the natural sciences The travel narratives listed here encompass all aspects of the natural world in every part of the globe but are especially concerned with its fauna flora and fossil remains Such eyewitness accounts have always fascinated their readers but they were never written solely for entertainment fragmentary though they often are these narratives of travel and exploration are of immense importance for our scientific understanding of life on earth providing us with a window on an ever changing and often vanishing natural world Without such records of the past we could not track document or understand the significance of changes that are so important for the study of zoogeography With this book Troelstra gives us a superb overview of natural history travel narratives The well over four thousand detailed entries ranging over four centuries and all major western European languages are drawn from a wide range of sources and include both printed books and periodical contributions While no subject bibliography by a single author can attain absolute completeness Troelstra's work is comprehensive to a truly remarkable degree The entries are arranged alphabetically by author and chronologically by the year of first publication under the author's name A brief biography with the scope and range of their work is given for each author every title is set in context the contents including illustrations are described and all known editions and translations are cited In addition there is a geographical index that cross refers between authors and the regions visited and a full list of the bibliographical and biographical sources used in compiling the bibliography

The Alaskan Beaufort Sea Peter W. Barnes, Donald M. Schell, Erk Reimnitz, 2013-09-17 The Alaskan Beaufort Sea Ecosystems and Environments provides an interdisciplinary view into almost all aspects of the environment with a detailed survey of the background literature This book focuses on the Alaskan Beaufort Shelf environment Organized into four parts encompassing 20 chapters this book begins with an overview of the characteristics and history of the region in which the research took place and defines the objectives of the studies program This text then examines the subsynoptic meteorological networks along the Beaufort Sea coast and shelf Other chapters consider the thermally generated mesoscale effects on surface winds and the orographic mesoscale effects on surface winds This book discusses as well the phytoplankton associations and relative phytoplankton production in the area between the 20 m depth contour and the edge of the ice in summer The final chapter deals with the characteristics of the ice cover and oil ice interactions that will affect cleanup activities after blowout This book is a valuable resource for scientists and conservationists

A Research Agenda for Environmental Geopolitics Shannon O'Lear, 2020-02-28 Challenging the mainstream view of the environment as either threatening or valuable this book considers how geographic knowledge can be applied to offer a more nuanced understanding Framed within geopolitics and using a range of methodologies the chapters encapsulate different approaches to demonstrate how

selective forms of knowledge measurement and spatial focus both embody and stabilize power shaping how people perceive and respond to changing features of human environment interactions *Ice Age* Nakoa Rainfall, AI, 2025-03-06 *Ice Age* transports readers to the Pleistocene epoch a dramatic period marked by glacial cycles and plummeting temperatures This era profoundly shaped Earth's landscapes affecting both flora and fauna The book emphasizes the interplay between Earth sciences geography and history to reveal how mammoths saber toothed cats and early humans adapted and evolved A key insight is that the Ice Age wasn't a uniformly cold period but a series of glacial and interglacial phases each with distinct impacts on the environment and life The book explores how early humans migrated across continents adapted to harsh conditions and developed tools and social structures to survive *Ice Age* also delves into the Milankovitch cycles explaining how variations in Earth's orbit influenced solar radiation and consequently climate patterns By synthesizing geological paleontological and archaeological evidence the book offers a comprehensive understanding of the period The book progresses by first introducing glacial geology then explores environmental transformations and the story of early humans This book is valuable because it presents complex scientific concepts in an accessible style making it suitable for a broad audience interested in environmental history and human evolution By understanding the past we gain insights into addressing current environmental concerns and promoting resilience in the face of climate change Disaster Risk

Reduction for Resilience Saeid Eslamian, Faezeh Eslamian, 2022-09-30 This book is part of a six volume series on Disaster Risk Reduction and Resilience The series aims to fill in gaps in theory and practice in the Sendai Framework providing additional resources methodologies and communication strategies to enhance the plan for action and targets proposed by the Sendai Framework The series will appeal to a broad range of researchers academics students policy makers and practitioners in engineering environmental science and geography geoscience emergency management finance community adaptation atmospheric science and information technology This volume focuses on the concepts of economic and development vulnerability discussing the roles of physical social cultural political economic technological and development factors that contribute to disaster impacts and threat levels on vulnerable populations This approach explores how the resilience of individuals and communities can be increased in the face of future hazard threats and how post disaster efforts are planned for and implemented to manage risk reduction and the potential outcomes of hazard threats Topics addressed in the book include disaster recovery reform and resilience recovery and development programs place based reconstruction policies resilient and sustainable disaster relief and recovery programs sustainable community development and disaster recovery and post hazard recovery strategies *Ireland at a Crossroads* Ty Murphy LLM, 2025-05-29 Is Ireland still a neutral nation or is that just a comforting illusion In *Ireland at a Crossroads* The Triple Lock and Neutrality legal scholar Ty Murphy exposes how foreign lobbying NATO pressure and expanding EU military entanglements are eroding one of the nation's most cherished principles neutrality At the heart of this book lies the Triple Lock a constitutional safeguard

requiring approval from the United Nations the Irish Government and the D il before any overseas deployment of Irish troops But this safeguard is now under siege As international alliances deepen Ireland risks being pulled into a geopolitical orbit that threatens its sovereignty its democracy and its moral stance on the world stage This isn t just a policy debate it s a wake up call Murphy cuts through the jargon to expose what s really at stake and presents a bold actionable blueprint to protect Irish neutrality including a proposed constitutional referendum and critical legal reforms Written for citizens not bureaucrats this is a book for anyone who believes that peace is strength and that independence must be defended not just on the battlefield but at the ballot box Timely Urgent Unflinching This is the definitive guide to Ireland s crossroads moment Ty Murphy LLB Hons LPC LLM is a former investigator and is a leading Art Lawyer and advisor specializing in Art Law due diligence AML KYC CTF compliance and sanctions advisory services for ultra high net worth individuals and family office clients His expertise has been featured in outlets such as Forbes CNN and CNBC and he is a frequent speaker at international art wealth and family office events He is the author of several books on art related issues and serves as the publisher of Family Office Magazine and Art Museum Magazine *The Geographical Journal* ,1912 Includes the Proceedings of the Royal geographical society formerly pub separately *Frozen Flames: Unveiling the Arctic's Fiery Transformation* Russ Stevenson, Arctic amplification delves deep into the dramatic swift heating of the Arctic zone and its far reaching consequences on the intricate web of global climate mechanisms

Arctic Unfolding Book Review: Unveiling the Power of Words

In some sort of driven by information and connectivity, the energy of words has become more evident than ever. They have the capacity to inspire, provoke, and ignite change. Such is the essence of the book **Arctic Unfolding**, a literary masterpiece that delves deep into the significance of words and their effect on our lives. Compiled by a renowned author, this captivating work takes readers on a transformative journey, unraveling the secrets and potential behind every word. In this review, we shall explore the book's key themes, examine its writing style, and analyze its overall affect readers.
