Argument Structure Its Syntax And Acquisition:

Argument Structure; Its Syntax and Acquisition 〇〇〇〇,〇〇〇〇〇,1993 *The Acquisition of Verbs at the Syntax-Semantics Interface* Paolo Lorusso,2018-06-11 This book presents theoretical and experimental analyses of the nature of early verbs At around the age of two years old children start to combine words and produce their first verbs Verbal items appear later than nouns in a child s speech and refer to the relational concepts in the world that are represented in syntax through the argument structure The central set of data investigated here is based on the analysis of the features of first verbal productions in Italian Since the appearance of verbs implies the mastery of a mapping procedure between syntactic positions and semantic roles the syntactic regularities found for each lexical verb class suggest that the relation at the syntax semantics interface is well established early on The non adult like sentences are those which involve the mastery of the scope discourse semantic interface or higher functional syntactic categories The analysis of the delay in the production and comprehension of some constructions here uncovers some general characteristics of language acquisition devices *The Syntax of Argument Structure* Leonard H. Babby,2009-03-26 This book proposes an intriguing theory of argument structure Babby puts forward the theory that this set of arguments the verb s argument structure has a universal hierarchical composition which directly determines the sentence s case and grammatical relations **The L2 Acquisition of Tense Aspect Morphology** M. Rafael Salaberry,Yasuhiro Shirai,2002-10-24 The present volume provides a cross linguistic perspective on the development of tense aspect in L2 acquisition Data based studies included in this volume deal with the analysis of a wide range of target languages Chinese English Italian French Japanese and Spanish Theoretical frameworks used to evaluate the nature of the empirical evidence range from generative grammar to functional typological linguistics Several studies focus on the development of past tense markers but other issues such as the acquisition of a future marker are also addressed An introductory chapter outlines some theoretical and methodological issues that serves as relevant preliminary reading for most of the chapters included in this volume Additionally a preliminary chapter offers a substantive review of first language acquisition of tense aspect morphology The analysis of the various languages included in this volume significantly advances our understanding of this phenomenon and will serve as an important basis for future research *Language Processing and Acquisition in Languages of Semitic, Root-Based, Morphology* Joseph Shimron,2003-04-28 This book puts together contributions of linguists and psycholinguists whose main interest here is the representation of Semitic words in the mental lexicon of Semitic language speakers The central topic of the book confronts two views about the morphology of Semitic words The point of the argument is Should we see Semitic words morphology as root based or word based The proponents of the root based approach present empirical evidence demonstrating that Semitic language speakers are sensitive to the root and the template as the two basic elements bound morphemes of Semitic words Those supporting the word based approach present arguments to the effect that Semitic word formation is not based on the merging of roots

and templates but that Semitic words are comprised of word stems and affixes like we find in Indo European languages The variety of evidence and arguments for each claim should force the interested readers to reconsider their views on Semitic morphology

Language Learnability and Language Development Steven Pinker, 2009-07-01 In this influential study Steven Pinker develops a new approach to the problem of language learning Now reprinted with new commentary by the author this classic work continues to be an indispensable resource in developmental psycholinguistics

The Semantic Salience Hierarchy Model Jingyu Zhang, 2007 This empirical study examines the learning problem of the argument structure of psych predicates such as The dog frightens John and the related V ing adjectives such as The dog is frightening to John The problem is theoretically interesting because of the marked nature of the thematic role mapping of these sentences in relation to the principle of the Uniformity of Theta Assignment Hypothesis UTAH The problem is highly relevant to our understanding of second language acquisition as this is known to be a prevalent difficulty among language learners The author has framed the learning problem within a coherent parametric framework drawing on a sophisticated critical review of the syntax semantics literature and theories of L2 development The author has specifically developed a theory the Semantic Salience Hierarchy Model SSHM to explain the learning process The significance of the model is not confined only to this particular study as the issues related to the L2 acquisition of other causative verbs can also be examined within this model The findings of this study also bear implications to TESOL

Preferred Argument Structure John W. Du Bois, Lorraine Edith Kumpf, William J. Ashby, 2003-01-01 Preferred Argument Structure offers a profound insight into the relationship between language use and grammatical structure In his original publication on Preferred Argument Structure Du Bois 1987 demonstrated the power of this perspective by using it to explain the origins of ergativity and ergative marking systems Since this work the general applicability of Preferred Argument Structure has been demonstrated in studies of language after language In this collection the authors move beyond verifying Preferred Argument Structure as a property of a given language They use the methodology to reveal more subtle aspects of the patterns for example to look across languages diachronically or synchronically to examine particular grammatical relations and to examine special populations or particular genres This volume will appeal to linguists interested in the relationship of pragmatics and grammar generally in the typology of grammatical relations and in explanations derived from data and corpus based approaches to analysis

The Acquisition of Syntactic Structure Misha Becker, 2014-04-03 This book explains how children s early ability to distinguish between animate and inanimate nouns helps them acquire complex sentence structure The theoretical claims of the book expand the well known hypotheses of syntactic and semantic bootstrapping resulting in greater coverage of the core principles of language acquisition

The Expression of Time Wolfgang Klein, Ping Li, 2009-03-26 Time is the most fundamental category of human cognition and action and all human languages have developed many devices to express it These include verbal categories such as tense and aspect but also adverbials particles and principles of discourse

organisation This book is intended as a tutorial for the study of how time is expressed in natural languages Its chapters take the reader through a number of foundational issues such as the various notions of time and the various means to express it other chapters are devoted to more specific questions such as the acquisition of time its modelling in formal semantics and in computational linguistics or how its expression can be empirically investigated

Computational Modeling of Human Language Acquisition Afra Alishahi,2011 In doing so computational modeling provides insight into the plausible mechanisms involved in human language acquisition and inspires the development of better language models and techniques This book provides an overview of the main research questions in the field of human language acquisition It reviews the most commonly used computational frameworks methodologies and resources for modeling child language learning and the evaluation techniques used for assessing these computational models The book is aimed at cognitive scientists who want to become familiar with the available computational methods for investigating problems related to human language acquisition as well as computational linguists who are interested in applying their skills to the study of child language acquisition
