Crossroad of Magic, Science, and the Arts Massimo Ciavolella, Valeria Finucci, Megan Tomlinson, 2024-09-23 The essays examine how the study of facial features or expressions as indicative of character or ethnicity has evolved from the crossroad of magic religion and primitive medicine to present day cultural concern for wellness and beauty In this context the discoveries of cranio facial neurophysiology and psychology and the practice of cosmetic and reconstructive surgery have a centuries old relationship with physiognomy As the study of outward appearances evolved from its classical roots and self representations through 18th and 19th century adaptations in fiction and travelogues it gradually became a scientific discipline Along the way physiognomy was associated with phrenology and craniology and promoted eugenic policies Tainted with racial bigotry and biological determinism it was trapped within questions of delinquency monstrosity and posthumanism Throughout its history physiognomy played both positive and negative roles in the evolution of significant aspects of the socio cultural order in the West that merit update and in depth study The contributions follow a chronological and intertwining sequence to encompass physiognomic expressions in art literature spirituality science philosophy and cultural studies

Gray, 2021-05-17 The theologian Gregory of Nyssa wrote

biographies of his sister a local bishop and Moses Allison L Gray shows that he adapts techniques from Greco Roman biographical writing in these texts to create narratives that are suited to a specifically Christian form of education focused on virtue and scriptural interpretation *Venus and the Arts of Love in Renaissance Florence* Rebekah Compton,2021-03-11 In this volume Rebekah Compton offers the first survey of Venus in the art culture and governance of Florence from 1300 to 1600 Organized chronologically each of the six chapters investigates one of the goddess s alluring attributes her golden splendor rosy hued complexion enchanting fashions green gardens erotic anatomy and gifts from the sea By examining these attributes in the context of the visual arts Compton uncovers an array of materials and techniques employed by artists patrons rulers and lovers to manifest Venusian virtues Her book explores technical art history in the context of love s protean iconography showing how different discourses and disciplines can interact in the creation and reception of art Venus and the Arts of Love in Renaissance Florence offers new insights on sight seduction and desire as well as concepts of gender sexuality and viewership from both male and female perspectives in the early modern era **Articulating Difference** Sophie Salvo,2024-10-08 Enriches contemporary debates about gender and language by probing the histories of the philosophy and sciences of language Drawing on a wide range of texts from understudied ethnographic and scientific works to canonical literature and philosophy Sophie Salvo uncovers the prehistory of the inextricability of gender and language Taking German discourses on language as her focus she argues that we are not the inventors but rather the inheritors and adapters of the notion that gender and language are interrelated Particularly during the long nineteenth century ideas about sexual differences shaped how language was understood classified and analyzed As Salvo explains philosophers asserted the patriarchal origins of language linguists investigated women s languages and grammatical gender and literary Modernists imagined feminine sign systems and in doing so they not only deemed sex based divisions to be necessary categories of language but also produced a plethora of gendered tropes and fictions which they used both to support their claims and delimit their disciplines Articulating Difference charts new territory revealing how gendered conceptions of language make possible the misogynistic logic of exclusion that underlies arguments claiming for example that women cannot be great orators or writers While Salvo focuses on how male scholars aligned language study with masculinity she also uncovers how women responded highlighting the contributions of understudied nineteenth century works on language that women wrote even as they were excluded from academic opportunities *The Body as a Mirror of the Soul* Lisa Devriese,2021-10-05 Physiognomy the history of racial classifications and the interplay between natural philosophy medicine and ethics The idea of the body as a mirror of the soul has fascinated mankind throughout history Being able to see through an individual and drawing conclusions on their character solely based on a selection of external features is the subject of physiognomy and has a long tradition running well into recent times However the pre modern especially medieval background of this discipline has remained underexplored The selected case studies in this volume each contribute to a better understanding of the history of

physiognomy from antiquity to the Renaissance and offer discussions on unedited treatises and on the application development and reception of this field of knowledge as well as on visual sources inspired by physiognomic theory Contributors Enik B k s Hungarian Academy of Sciences Jo l Biard University of Tours Lisa Devriese KU Leuven Maria Fernanda Ferrini University of Macerata Christophe Grellard cole Pratique des Hautes tudes Lu s Campos Ribeiro University of Lisbon Maria Michela Sassi University of Pisa Oleg Voskoboynikov Higher School of Economics Moscow Steven J Williams New Mexico Highlands University Joseph Ziegler University of Haifa Gabriella Zuccolin University of Pavia

Worlds in Early Modern Italy Karen Hope Goodchild, April Oettinger, Leopoldine Prosperetti,2025-10-01 The green mantle of the earth This metaphor is a poetic image that borrows from the vocabulary of weaving and epitomizes the Renaissance interest in fashioning green worlds in art and poetry Here it serves as a motto for a cultural poetics that made representing living nature increasingly popular across Italy in the Early Modern period The explosion of landscape art in this era is often associated with the rise of interest in the literary pastoral narrowly defined but this volume expands that understanding to show Green's broad appeal as it intrigued audiences ranging from the ecclesiastic to the medical and scientific to the humanistic and courtly The essays gathered here explore the expanding technologies and varied cultural dimensions of verdure and verdancy in the Italian Renaissance and thus the role of visual art in shaping the poetics and expression of greenery in the arts of the 16th century and beyond Plant-Thinking Michael Marder,2013-02-19 The margins of

philosophy are populated by non human non animal living beings including plants While contemporary philosophers tend to refrain from raising ontological and ethical concerns with vegetal life Michael Marder puts this life at the forefront of the current deconstruction of metaphysics He identifies the existential features of plant behavior and the vegetal heritage of human thought so as to affirm the potential of vegetation to resist the logic of totalization and to exceed the narrow confines of instrumentality Reconstructing the life of plants after metaphysics Marder focuses on their unique temporality freedom and material knowledge or wisdom In his formulation plant thinking is the non cognitive non ideational and non imagistic mode of thinking proper to plants as much as the process of bringing human thought itself back to its roots and rendering it plantlike Routledge Encyclopedia of Philosophy: Index Edward Craig,1998 Volume seven of a ten volume set which provides full and detailed coverage of all aspects of philosophy including information on how philosophy is practiced in different countries who the most influential philosophers were and what the basic concepts are **The Routledge**
