Architecture And Power In The Ancient Andes:

Architecture and Power in the Ancient Andes Jerry D. Moore, 1996-08-22 An innovative 1996 discussion of architecture and its role in the culture of the ancient Andes

Power and Place in the Prehistoric Aegean and Beyond Susan E. Allen, R. Angus K. Smith, Robert Schon, 2025-04-30 This volume celebrates the contributions and impact of our mentor colleague and friend James C Wright on the field of Aegean Bronze archaeology in recognition of his retirement from Bryn Mawr College The title and thematic orientation reflect his scholarly attention to power inequalities in the past particularly as manifested through social access to architectural spaces and landscapes The title acknowledges that Jim's interests and contributions extend beyond the domain of Aegean Prehistory not only in terms of chronology and geography but also in terms of his methodological approaches that have wider application In addition to Jim's colleagues and collaborators more than half of the contributions to the volume are by his students who collectively are but one of many signs of his profound and lasting impact not only on our scholarship but on the discipline of archaeology itself

The Archaeology of Power and Politics in Eurasia Charles W. Hartley, G. Bike Yazicioğlu, Adam T. Smith, 2012-11-19 For thousands of years the geography of Eurasia has facilitated travel conquest and colonization by various groups from the Huns in ancient times to the Union of Soviet Socialist Republics in the past century This book brings together archaeological investigations of Eurasian regimes and revolutions ranging from the Bronze Age to the modern day from Eastern Europe and the Caucasus in the west to the Mongolian steppe and the Korean Peninsula in the east The authors examine a wide ranging series of archaeological studies in order to better understand the role of politics in the history and prehistory of the region This book re-evaluates the significance of power authority and ideology in the emergence and transformation of ancient and modern societies in this vast continent

Infrastructures of Religion and Power Edward Swenson, 2024-02-06 This book explores the central role of religion in place making and infrastructural projects in ancient polities It presents a trilectic approach to archaeological study of religious landscapes that combines Indigenous philosophies with the spatial and semiotic thinking of Lefebvre Peirce and proponents of assemblage theories Case studies from ancient Angkor and the Andes reveal how rituals of place making activated processes of territorialization and semiosis fundamental to the experience of political worlds that shaped power relations in past societies The perspectives developed in the book permit a reconstruction of how landscapes were variably conceived perceived and lived in the spirit of Henri Lefebvre and how these registers may have aligned or clashed In the end the examination of built environments infrastructures and rituals staged within specialized buildings demonstrates how archaeologists can better infer past ontologies cosmologies ideologies of time and place and historically specific political struggles The study will appeal to students and researchers interested in ritual infrastructures landscape archaeological theory political institutions semiotics human geography and the civilizations of the ancient Andes and Angkor

Polities and Power Steven E. Falconer, Charles L. Redman, 2022-09-13 This distinctive book is the first to address the topic of

landscape archaeology in early states from a truly global perspective It provides an excellent introduction to and overview of the discipline today The volume grew out of the Fifth Biennial Meeting of the Complex Societies Group whose theme States and the Landscape paid tribute to the work of Robert McC Adams When Adams began publishing in the 1960s the interdependence of cities and their countrysides and the information revealed through the spatial patterning of communities went largely unrecognized Today as this useful collection makes clear these interpretive insights are fundamental to all archaeologists who investigate the roles of complex polities in their landscapes Polities and Power features detailed studies from an intentionally disparate array of regions including Mesoamerica Andean South America southwestern Asia East Africa and the Indian subcontinent Each chapter or pair of chapters is followed by a critical commentary In concert these studies strive to infer social political and economic meaning from archaeologically discerned landscapes associated with societies that incorporate some expression of state authority The contributions engage a variety of themes including the significance of landscapes as they condition and reflect complex polities the interplay of natural and cultural elements in defining landscapes of state archaeological landscapes as ever dynamic entities and archaeological landscapes as recursive structures reflected in palimpsests of human activity Individually many of these contributions are provocative even controversial Taken together they reveal the contours of landscape archaeology at this particular evolutionary moment *Handbook of South American Archaeology* Helaine Silverman, William Isbell, 2008-04-04 Perhaps the contributions of South American archaeology to the larger field of world archaeology have been inadequately recognized If so this is probably because there have been relatively few archaeologists working in South America outside of Peru and recent advances in knowledge in other parts of the continent are only beginning to enter larger archaeological discourse Many ideas of and about South American archaeology held by scholars from outside the area are going to change irrevocably with the appearance of the present volume Not only does the *Handbook of South American Archaeology* HSAA provide immense and broad information about ancient South America the volume also showcases the contributions made by South Americans to social theory Moreover one of the merits of this volume is that about half the authors 30 are South Americans and the bibliographies in their chapters will be especially useful guides to Spanish and Portuguese literature as well as to the latest research It is inevitable that the HSAA will be compared with the multi volume *Handbook of South American Indians* HSAI with its detailed descriptions of indigenous peoples of South America that was organized and edited by Julian Steward Although there are heroic archaeological essays in the HSAI by the likes of Junius Bird Gordon Willey John Rowe and John Murra Steward states frankly in his introduction to Volume Two that archaeology is included by way of background to the ethnographic chapters *Theory and Practice in Mediterranean Archaeology* Richard M. Leventhal, John K. Papadopoulos, 2003-12-31 *Theory and Practice in Mediterranean Archaeology* Old World and New World Perspectives brings together leading scholars from the Old World and the Americas to discuss some of the most pressing issues facing archaeology today These topics include archaeology and text

the future of large scale archaeological fieldwork at individual sites interpretation and preservation of archaeological sites and landscapes past trajectories and new approaches to regional survey and debates surrounding landscape and settlement archaeology Essays by Old World archaeologists provide an overview of these themes as well as a history of research over the last hundred years These scholars review the major successes and shortcomings of that work identifying critical issues that determine and define the field These essays serve as a springboard for discussion and response by archaeologists working in the Americas and in other parts of the world The combination of an Old World focus with responses from New World archaeologists provides a uniquely broad assessment of contemporary archaeological theory methods and practice throughout the world

Approaching Monumentality in Archaeology James F. Osborne, 2014-10-24 Interdisciplinary study of monumental art and architecture in human history Monumentality is a human phenomenon that has occurred in nearly all times and places Because of its ubiquity monumentality is something that has been studied by a large number of disciplines and individuals *Approaching Monumentality in Archaeology* explores the phenomenon of monumental art and architecture from humankind's most ancient past to recent history and does so using an interdisciplinary approach that incorporates the research of anthropological archaeologists art historians classicists and sociologists working in a wide variety of historical and cultural contexts The volume seeks to define what is meant by the terms monument and monumentality and to understand the social and political significance of monument building as it has manifested around the world By advocating for a relational approach to the topic that seeks to find monumentality in the ongoing relationship between object and person this book offers the opportunity to begin the process of uniting these varied interests into a unified discourse

The Fabric of Resistance Di Hu, 2022-02-22 *The Fabric of Resistance* documents the impact of Spanish colonial institutions of labor on identity and social cohesion in Peru Through archaeological and historical lines of evidence it examines the long term social conditions that enabled the large scale rebellions in the late Spanish colonial period in Peru 1780s 1820s Hu argues that despite the Spanish government's emphasis on divide and control workers of diverse backgrounds actively resisted proscriptions against intercaste mixing This cultural mixing underpinned the coordinated nature of late colonial rebellions Archaeological perspectives are lacking on what were the largest and most cosmopolitan indigenous led rebellions of the Americas so this book fills an important gap and provides fresh perspectives and arguments on a perennially important subject

Coming Together Attila Gyucha, 2019-02-28 The pursuit for universally applicable definitions of the terms urban and city has frequently distracted scholars from scrutinizing processes of how ancient nucleated settlements evolved and developed Based on the premise that similar social dynamics to a great extent governed nucleation trajectories throughout human history *Coming Together* focuses on both prehistoric aggregated and early urban settlements Drawing from a variety of theoretical and methodological approaches archaeologists anthropologists and classicists discuss how nucleation unfolded in strikingly different sociopolitical contexts in North America Europe and the Near East The major themes of the volume are

nucleation s origins pathways to sustainability and the transformative role of these sites in sociopolitical and cultural change

The Archaeology of Politics Andrew M. Bauer, Peter G. Johanson, 2011-05-25 The Archaeology of Politics is a collection of essays that examines political action and practice in the past through studies and analyses of material culture from the perspective of anthropological archaeology Contributors to this volume explore a variety of multi scalar relationships between past peoples places objects and environments At stake in this volume is what it is that constitutes politics its social and cultural location fields of analysis its materiality and sociology and especially its position and possibilities as a conceptual and analytical category in archaeological investigations of past socio cultural worlds Our primary goals are twofold the problematization and re conceptualization of politics from its understanding as a reified essence or structure of political forms e g a State to a fluid dynamic and culturally inflected set of practices and second to consider politics entanglement with the materiality of socio cultural worlds at multiple scales through the demonstration of innovative analytical approaches to the material record The volume is a tightly integrated group of essays exploring an assortment of case studies that offer new theoretical insight to archaeological and historical analyses of politics

Music & Ritual Mark Howell, Raquel Jimenez, Rupert Till, Arnd Adje Both, 2013-12-31 The ICTM Study Group on Music Archaeology was founded in the early 1980s by Ellen Hickmann John Blacking Mantle Hood and Cajsa S Lund This is the first volume of the new anthology series published by the study group turning to the topic of music and religion in past cultures Each volume of the series is composed of concise case studies bringing together the world s foremost researchers on a particular subject reflecting the wide scope of music archaeological research world wide The series draws in perspectives from a range of different disciplines including newly emerging fields such as archaeoacoustics but particularly encouraging both music archaeological and ethnomusicological perspectives

Politics of the Maya Court Sarah E. Jackson, 2013-06-24 In recent decades advances in deciphering Maya hieroglyphic writing have given scholars new tools for understanding key aspects of ancient Maya society This book the first comprehensive examination of the Maya royal court exemplifies the importance of these new sources Authored by anthropologist Sarah E Jackson and richly illustrated with drawings photographs and maps Politics of the Maya Court uses hieroglyphic and iconographic evidence to explore the composition and social significance of royal courts in the Late Classic period a d 600 900 with a special emphasis on the role of courtly elites As Jackson explains the Maya region of southern Mexico and Central America was not a unified empire but a loosely aggregated culture area composed of independent kingdoms Royal courts had a presence in large central communities from Chiapas to Yucatan and the highlands of Guatemala and western Honduras Each major polity was ruled by a k u h u l a j a w or holy lord who embodied intertwined aspects of religious and political authority The hieroglyphic texts that adorned walls furniture and portable items in these centers of power provide specific information about the positions roles and meanings of the courts Jackson uses these documents as keys to understanding Classic Maya political hierarchy and specifically the institution of the royal court

Within this context she investigates the lives of the nobility and the participation of elites in court politics By identifying particular individuals and their life stories Jackson humanizes Maya society showing how events resulted from the actions and choices of specific people Jackson s innovative portrayal of court membership provides a foundation for scholarship on the nature functions and responsibilities of Maya royal courts *Belief in the Past* David S Whitley,Kelley Hays-Gilpin,2016-09-16 Human actions are often deeply intertwined with religion and can be understood in a strictly religious context Yet many volumes and articles pertaining to discussions of religion in the archaeological past have focused primarily on the sociopolitical implications of such remains The authors in this volume argue that while these interpretations certainly have a meaningful place in understanding the human past they provide only part of the picture Because strictly religious contexts have often been ignored this has resulted in an incomplete assessment of religious behavior in the past This volume considers exciting new directions for considering an archaeology of religion offering examples from theory tangible archaeological remains and ethnography *Rituals of the Past* Silvana Rosenfeld,Stefanie Bautista,2017-04-01 Rituals of the Past explores the various approaches archaeologists use to identify ritual in the material record and discusses the influence ritual had on the formation reproduction and transformation of community life in past Andean societies A diverse group of established and rising scholars from across the globe investigates how ritual influenced permeated and altered political authority economic production shamanic practice landscape cognition and religion in the Andes over a period of three thousand years Contributors deal with theoretical and methodological concerns including non human and human agency the development and maintenance of political and religious authority ideology cosmologies and social memory and relationships with ritual action The authors use a diverse array of archaeological ethnographic and linguistic data and historical documents to demonstrate the role ritual played in prehispanic colonial and post colonial Andean societies throughout the regions of Peru Chile Bolivia and Argentina By providing a diachronic and widely regional perspective Rituals of the Past shows how ritual is vital to understanding many aspects of the formation reproduction and change of past lifeways in Andean societies Contributors Sarah Abraham Carlos Angiorama Florencia Avila Camila Capriata Estrada David Chicoine Daniel Contreras Matthew Edwards Francesca Fernandini Matthew Helmer Hugo Ikehara Enrique Lopez Hurtado Jerry Moore Axel Nielsen Yoshio Onuki John Rick Mario Ruales Koichiro Shibata Hendrik Van Gijseghem Rafael Vega Centeno Verity Whalen *Andean Civilization* Joyce Marcus,Patrick Ryan Williams,2009-12-31 This volume brings together exciting new field data by more than two dozen Andean scholars who came together to honor their friend colleague and mentor These new studies cover the enormous temporal span of Moseley s own work from the Preceramic era to the Tiwanaku and Moche states to the Inka empire And like Moseley s own studies from Maritime Foundations of Andean Civilization to Chan Chan The Desert City to Cerro Baul s brewery these new studies involve settlements from all over the Andes from the far northern highlands to the far southern coast An invaluable addition to any Andeanist s library the papers in this book demonstrate the

enormous breadth and influence of Moseley's work and the vibrant range of exciting new work by his former students and collaborators in fieldwork

Archaeology of Performance Takeshi Inomata, Lawrence S. Coben, 2006-03-09 Performances in the premodern communities shaped identities created meanings generated and maintained political control But unlike other social scientists archaeologists have not worked much with these concepts Archaeology of Performance shows how the notions of theatricality and spectacle are as important economics and politics in understanding how ancient communities work Without sacrificing conceptual rigor the contributors draw on the wide ranging literature on performance Without sacrificing material evidence they try to see how performance creates meaning and ideology Drawing on evidence from societies large and small Archaeology of Performance offers an important new way of understanding ancient theaters of power

The Oxford Handbook of the Archaeology of Ritual and Religion Timothy Insoll, 2011-10-28 The Oxford Handbook of the Archaeology of Ritual and Religion provides a comprehensive overview by period and region of the relevant archaeological material in relation to theory methodology definition and practice Although as the title indicates the focus is upon archaeological investigations of ritual and religion by necessity ideas and evidence from other disciplines are also included among them anthropology ethnography religious studies and history The Handbook covers a global span Africa Asia Australasia Europe and the Americas and reaches from the earliest prehistory the Lower and Middle Palaeolithic to modern times In addition chapters focus upon relevant themes ranging from landscape to death from taboo to water from gender to rites of passage from ritual to fasting and feasting Written by over sixty specialists renowned in their respective fields the Handbook presents the very best in current scholarship and will serve both as a comprehensive introduction to its subject and as a stimulus to further research

Building an Archaeology of Maya Urbanism Damien B. Marken, M. Charlotte Arnauld, 2023-07-23 Building an Archaeology of Maya Urbanism tears down entrenched misconceptions of Maya cities to build a new archaeology of Maya urbanism by highlighting the residential dynamics that underwrote one of the most famous and debated civilizations of the ancient Americas Exploring the diverse yet interrelated agents and processes that modified Maya urban landscapes over time this volume highlights the adaptive flexibility of urbanization in the tropical Maya lowlands Integrating recent lidar survey data with more traditional excavation and artifact based archaeological practices chapters in this volume offer broadened perspectives on the patterns of Maya urban design and planning by viewing bottom up and self organizing processes as integral to the form development and dissolution of

Classic lowland cities alongside potentially centralized civic designs Full of innovative examples of how to build an archaeology of urbanism that can be applied not just to the lowland Maya and across the region Building an Archaeology of Maya Urbanism simultaneously improves interpretations of lowland Maya culture history and contributes to empirical and comparative discussions of tropical non Western cities worldwide Contributors Divina Perla Barrera Arianna Campiani Cyril Castanet Adrian S Z Chase Lydie Dussol Sara Dzul G ngora Keith Eppich Thomas Garrison Mar a Rocio Gonz lez de la Mata Timothy Hare Julien Hiquet Takeshi Inomata Eva Lemonnier Jos Francisco Osorio Le n Marilyn Masson Elsa Damaris Men ndez Timothy Murtha Philippe Nond d o Keith M Prufer Louise Purdue Francisco P rez Ru z Julien Sion Travis Stanton Rodrigo Liendo Stuardo Karl A Taube Marc Test Amy E Thompson Daniela Triadan
