discovered the location of Captain Charles Williamson's historic campsite by falling into a dug well. There is no way out for him until a Seneca Indian boy discovers his plight and skillfully rescues him. Danny's new friend explains why he and his family are living near Branchport. The boy's grandfather tells an emotional story about the Seneca Indian Chief Red Jacket. The men of the Lee family help to launch Uncle Philo's steamboat Cricket. During the season's exciting first ride on the lake, Danny is asked to pilot the large boat and is left alone in the pilothouse. Doubt at first overwhelms him but as he turns the steamboat away from the shore he knows he can do what is expected of him. This is a very thrilling and grownup responsibility. It seems that the thoughtless Mr Overhouser will purchase Grandpa Scott's property at the tip of Bluff Point. Sister Mary and Danny are needlessly placed in a dangerous position when the careless Mr Overhouser forces their wagon off the road while driving up the east side of the bluff.

Danny and Life on Bluff Point Revised Edition Mary Ellen Lee, 2008

Increasing knowledge of the biological is fundamentally transforming what life itself means and where its boundaries lie. New developments in the biosciences especially through the molecularisation of life are re-shaping healthcare and other aspects of our society. This cutting edge volume studies contemporary bio objects or the categories materialities and processes that are central to the configuring of life today as they emerge, stabilize and circulate through society. Examining a variety of bio objects in contexts beyond the laboratory, *Bio Objects: Life in the 21st Century* explores new ways of thinking about how novel bio objects enter contemporary life, analysing the manner in which among others the boundaries between human and animal, organic and non organic and being alive and the suspension of living are questioned, destabilised and in some cases re-established. Thematically organised around questions of changing boundaries, the governance and regulation of bio objects and changing social, economic and political relations, this book presents rich new case studies from Europe that will be of interest to scholars of science and technology studies, social theory, sociology and law.
