There is 3-Cosmic Framework in the Universe Including Dark Matter and Dark Energy Hsien-Jung Ho, 2023-04-15 Based on String theory there is 3 cosmic framework of the Universe which has triple cosmoses in the whole of space that can find a dark planet located inside the Earth but in the other cosmos than ours Based on the 8 data of the cosmological parameters from the first year of WMAP observations to the Planck satellite observations in 2018 it can be speculated that the current dark energy should be taken as the residual energy of the Universe after the Big Bang Due to the rapid expansion of other high energy density cosmoses its dark matter should exert a gravitational pull on the stars of our low energy density cosmos that causes the effect of accelerating the expansion of our cosmos Color version A5 232 Pages

Between the Moon and Earth Jay Alfred, 2007-01-18 Are heavens and hells parallel realities in a multiverse What has plasma got to do with it Since the dawn of history various cultures have imagined heaven and the abode of gods to be literally located in some part of the sky and hell in the interior of the Earth From a modern scientific perspective these were the earliest concepts of parallel universes and the idea of a multiverse which is a serious area of research in cutting edge physics today This book presents a model supported by scientific evidence which can shed more light on the intuitive traditional view It appears that after the death of the ordinary matter body a plasma counterpart of that body will indeed find itself in an invisible higher energy plasmasphere which interpenetrates and co rotates with the familiar visible form of planet Earth Depending on their composition these plasma bodies will gravitate or levitate into particular shells that host their own communities in the relevant plasmasphere consistent with established scientific laws in plasma dynamics The higher shells coincide with the visible atmosphere and beyond The lower shells coincide mainly with the crust and upper mantle of the ordinary matter Earth This book takes a detailed look at the habitats of these human linked plasma life forms It is a companion volume to the author's book *Our Invisible Bodies* which focuses mainly on the nature of the bodies of these plasma life forms *Astronomy at the Frontiers of Science* Jean-Pierre Lasota, 2011-08-05 Astronomy is by nature an interdisciplinary activity it involves mathematics physics chemistry and biology Astronomers use and often develop the latest technology the fastest computers and the most refined software In this book twenty two leading scientists from nine
