Questions:

1. What is a Slide Transition?

During a presentation, a slide transition is the visual effect that occurs when you move from one slide to the next.

2. Why wouldn't you have your slides with different types of transitions?

When adding transitions, use the same one each time. If you use different transitions all the time, your presentation will look too busy and may not be appropriate for your audience.

3. What is an Animation?

Adding life to any object in a computer graphics is what animation is all about.

4. What is the Animation Pane?

The Animation Pane lets you edit manage all object effects on the current slide.

5. How many animation styles should be applied to a presentation? One style, 10 styles or 50 styles? Explain.

The PowerPoint animation feature allows you, the presenter, to deal with your most challenging presentations. You can accomplish this by combining a presentation in Slide Show mode.
