Transfer of Missile and Satellite Technology to China: A Summary of H.Res. 463 Authorizing a House Select Committee

Stephen W. Stathis
Specialist in American National Government
Government Division

On June 18, 1998, the House voted 409-10 to create a Select Committee on U.S. National Security and Military/Commercial Concerns with the People's Republic of China. The select committee will investigate, among other matters, allegations that the Clinton Administration allowed the Chinese government to acquire sensitive missile technology in exchange for campaign contributions, focusing on the national security consequences of those actions. This fact sheet provides a brief summary of H.Res. 463, which was reported by the Rules Committee (H.Rept. 105-582) on June 16. The resolution was considered under procedures that permitted no floor amendments.

Jurisdiction. H.Res. 463 charges the select committee with determining whether the transfer of technology, information, advice, goods, or services to the People's Republic of China enhanced:

- the accuracy, reliability, or capability of China's nuclear long-range missiles or other weapons;
- its domestic or foreign intelligence capabilities; and
- its manufacture of weapons of mass destruction, missiles, or other armaments.

The committee will also investigate, with respect to these transfers and enhancements:

- effects on the regional and national security of the United States;
- the conduct and decision-making of the executive branch, defense contractors, weapons manufacturers, satellite manufactures, and other firms;
- the enforcement of U.S. statutes, regulations, or executive orders;
- efforts by the Chinese government or other entities to influence these matters; and
- efforts to conceal or withhold relevant information or documents, obstruct justice, or obstruct any investigation of these matters.

Committee Structure and Rules. The select committee consists of nine members. Republican members include Representative Christopher Cox, chair, and Representatives Porter J. Goss, Douglas Bereuter, James V. Hansen, and Curt Weldon. Democratic members include Representative Norman D. Dicks, ranking minority member, and Representatives John M. Spratt, Jr., Lucille Roybal-Allard, and Robert C. Scott.

Congress. Senate. Committee on Appropriations. Subcommittee on the Legislative Branch, 1995 **Risk, Language, and Power** Jeffery T. Morris, 2012-02-09 Risk Language and Power explores discourse around the environmental risks of nanotechnology making the case that the dominance in risk discourse of regulatory science is a limiting policy debate on environmental risks and that specific initiatives should be undertaken to broaden debate not just on nanotechnology but generally on the risks of new technologies. Morris argues that the treatment of environmental risk in public policy debates has failed for industrial chemicals is failing for nanotechnology and most certainly will fail for synthetic biology and other new technologies unless we change how we describe the impacts to people and other living things from the development and deployment of technology. However, Morris also contends that the nanotechnology case provides reason for optimism that risk can be given different and better treatment in environmental policy debates. Risk Language and Power proposes specific policy initiatives to advance a richer discourse around the environmental implications of emerging technologies. Morris believes that evidence of enriched environmental policy debates would be a decentering of language concerning risk by developing within discourse language and practice directed toward enriching the human and environmental condition. Threshold Ieva Jusionyte, 2018-11-09 Jusionyte explores the sister towns bisected by the border from many angles in this illuminating and poignant exploration of a place and situation that are little discussed yet have significant implications for larger political discourse. Publishers Weekly STARRED Review Emergency responders on the US Mexico border operate at the edges of two states. They rush patients to hospitals across country lines, tend to the broken bones of migrants who jump over the wall, and put out fires that know no national boundaries. Paramedics and firefighters on both sides of the border are tasked with saving lives and preventing disasters in the harsh terrain at the center of divisive national debates. Ieva Jusionyte's firsthand experience as an emergency responder provides the background for her gripping examination of the politics of injury and rescue in the militarized region surrounding the US Mexico border. Operating in this area, firefighters and paramedics are torn between their mandate as frontline state actors and their responsibility as professional rescuers between the limits of law and pull of ethics. From this vantage, they witness what unfolds when territorial sovereignty, tactical infrastructure, and the natural environment collide. Jusionyte reveals the binational brotherhood that forms in this crucible to stand in the way of catastrophe. Through beautiful ethnography and a uniquely personal perspective, Threshold provides a new way to understand politicized issues ranging from border security and undocumented migration to public access to
