Resources in Education ,1996-07 **Hearings on Secondary Schools Basic Skills Act** United States. Congress. House. Committee on Education and Labor. Subcommittee on Elementary, Secondary, and Vocational Education,1984

Left Behind Edward P. St. John, Victoria J. Milazzo Bigelow, Kim Callahan Lijana, Johanna C. Massé, 2015-11-30 Urban schools are falling short of preparing students for college In *Left Behind* a team of education scholars led by Edward P St John argues that American cities have been engaged for the past three decades in a radical but failing effort to transform general and vocational high schools into college preparatory institutions By examining the educational reforms in four urban charter schools across the United States and four public high schools in New York City *Left Behind* reveals how educators contend with the challenge of developing new courses while providing social support for students to build college going cultures The research shows that district schools struggle to comply with standards that leave little room to develop advanced thematic curricula and that charter schools have not succeeded in substantially raising student test scores Many students who start in rigorous charter schools transfer back to public schools while both public and charter schools struggle to prepare their students for college level work *Left Behind* provides crucial insights into the troubling trajectory of public policy while offering teachers and administrators effective strategies for overcoming barriers *Crespar Findings (1994-1999)* A. Wade Boykin, Robert E. Slavin, 2014-10-13 This double issue presents summaries of the scholarly and practical reform accomplishments of the first five years of the Center for Research on the Education of Students Placed at Risk CRESPAR This bold five year initiative addressed several of the problems that most directly challenge the values and practical aspirations of modern democracies The included articles emphasize how CRESPAR has focused on the schools in many of America s most challenging communities It has both helped local schools improve themselves and advanced the nation s research base This issue was written in commemoration of the life and work of John Henry Hollifield Jr founding coeditor For 28 years Hollifield served as an editor and administrator at Johns Hopkins University s Center for Social Organization of Schools When JESPAR was just an idea Hollifield was one of the people who most strongly advocated its development He had a ready smile a fine editorial touch and a relentless will to produce each excellent issue This issue summarizing much of the research from CRESPAR s first five years is presented by the full team of authors in his loving memory *Leveled Texts for Mathematics: Algebra and Algebraic Thinking* Lori Barker, 2011-06-01 With a focus on algebra a guide to using leveled texts to differentiate instruction in mathematics offers fifteen different topics with high interest text written at four different reading levels accompanied by matching visuals and practice problems *A History of Mathematics Education during the Twentieth Century* Angela Lynn Evans Walmsley, 2007-05-22 *A History of Mathematics Education during the Twentieth Century* describes the history of mathematics education in the United States with conceptual themes concerning philosophy mathematics content teacher education pedagogy and assessment Each decade of the twentieth century is analyzed using historical documents within the context of the aforementioned themes to create a concise history of mathematical reform as it relates to history within the United States Finally conclusions are drawn as to which reform movements are similar and different throughout the century depicting which aspects of reform can be seen again

Mathematics education tends to swing on a pendulum from traditional education including teacher directed instruction with an emphasis on computation skills to reform education including student directed instruction with an emphasis on problem solving. All decades are analyzed to see where they were on the pendulum and what aspects may have contributed to the current reform movements led by the Standards movement.
