Northern BC Backroad Mapbook Russell Mussio, 2018-06-30 Northern BC is a vast area covering more land than the entire country of Sweden. In the west the port city of Prince Rupert sits nestled among the majestic coast mountains acting as a gateway to the Pacific Ocean and the incredible islands of Haida Gwaii. To the east the Rocky Mountains cast their imposing shadow over the land attracting hikers, mountaineers and ski tourers from far and wide. As you move north towards the Yukon border the human population becomes sparser and nature rules the land. In between places like Spatsizi Wilderness Provincial Park contain some of the most breathtaking landscapes in the country. Whether you are looking to fish, camp, ATV, snowmobile, view wildlife or just take in the sights along the region's many roads Northern BC offers an abundance of adventure. Canadian Books in Print. Author and Title Index, 1975 **Canadian Books in Print**, 2003 *Cataloging and Classification* Lois Mai Chan, Athena Salaba, 2015-12-14

The fourth edition of the late Lois Mai Chan's classic *Cataloging and Classification* covers the analysis and representation of methods used in describing, organizing, and providing access to resources made available in or through libraries. Since the last edition published in 2007, there have been dramatic changes in cataloging systems from the Library of Congress. The most notable being the shift from AACR2 to Resource Description and Access (RDA) as the new standard developed by the Library of Congress. With the help of the coauthor Athena Salaba, this text is modified throughout to conform to the new standard. Retaining the overall outline of the previous edition, this text presents the essence of library cataloging and classification in terms of three basic functions: descriptive cataloging, subject access, and classification. Within this framework, all chapters have been rewritten to incorporate the changes that have occurred during the interval between the third and fourth editions. In each part, the historical development and underlying principles of the retrieval mechanism at issue are treated first, because these are considered essential to an understanding of cataloging and classification. Discussion and examples of provisions in the standards and tools are then presented in order to illustrate the operations covered in each chapter. Divided into five parts: a general overview, record production and structure, encoding formats and metadata records, RDA, subject access, and controlled vocabularies and the organization of library resources, each part of the book begins with a list of the standards and tools used in the preparation and processing of that part of the cataloging record, covered followed by suggested background readings selected to help the reader gain an overview of the subject to be presented. This book is the standard text for the teaching and understanding of cataloging and classification.
