Fertilization of Dryland and Irrigated Soils J. Hagin,B. Tucker,2012-12-06 Much has been learned about the proper
 and judicious use of fertilizers Fertilizer application by farmers has grown from an art to a science As food producers have
 strived to increase crop yields by overcoming nutrient deficiencies the use of fertilizers has increased dramatically This has
 created a large chemical industry capable of supplying the needed plant food elements A more complete understanding of
 soil chemistry and plant nutrition has led to greater fertilizer use with improved fertilization methods and crop cultural
 practices Improved fertilizer technology has led to the production of more efficient forms of fertilizer The modern fertilizer
 industry and with it fertilization practices began in the humid countries of the world The use of fertilizers in arid and
 semiarid regions was later in development although agriculture had its beginning in semiarid and arid regions The
 development of fertilizer use is parallel to industrial development in various areas of the world **Bibliography of
