Articulating Difference Sophie Salvo, 2024-10-08 Enriches contemporary debates about gender and language by probing the histories of the philosophy and sciences of language Drawing on a wide range of texts from understudied ethnographic and scientific works to canonical literature and philosophy Sophie Salvo uncovers the prehistory of the inextricability of gender and language Taking German discourses on language as her focus she argues that we are not the inventors but rather the inheritors and adapters of the notion that gender and language are interrelated Particularly during the long nineteenth century ideas about sexual differences shaped how language was understood classified and analyzed As Salvo explains philosophers asserted the patriarchal origins of language linguists investigated women's languages and grammatical gender and literary Modernists imagined feminine sign systems and in doing so they not only deemed sex based divisions to be necessary categories of language but also produced a plethora of gendered tropes and fictions which they used both to support their claims and delimit their disciplines Articulating Difference charts new territory revealing how gendered conceptions of language make possible the misogynistic logic of exclusion that underlies arguments claiming for example that women cannot be great orators or writers While Salvo focuses on how male scholars aligned language study with masculinity she also uncovers how women responded highlighting the contributions of understudied nineteenth century works on language that women wrote even as they were excluded from academic opportunities

Worlds in Early Modern Italy Karen Hope Goodchild, April Oettinger, Leopoldine Prosperetti,2025-10-01 The green mantle of the earth This metaphor is a poetic image that borrows from the vocabulary of weaving and epitomizes the Renaissance interest in fashioning green worlds in art and poetry Here it serves as a motto for a cultural poetics that made representing living nature increasingly popular across Italy in the Early Modern period The explosion of landscape art in this era is often associated with the rise of interest in the literary pastoral narrowly defined but this volume expands that understanding to show Green's broad appeal as it intrigued audiences ranging from the ecclesiastic to the medical and scientific to the humanistic and courtly The essays gathered here explore the expanding technologies and varied cultural dimensions of verdure and verdancy in the Italian Renaissance and thus the role of visual art in shaping the poetics and expression of greenery in the arts of the 16th century and beyond Plant-Thinking Michael Marder,2013-02-19 The margins of

philosophy are populated by non human non animal living beings including plants While contemporary philosophers tend to refrain from raising ontological and ethical concerns with vegetal life Michael Marder puts this life at the forefront of the current deconstruction of metaphysics He identifies the existential features of plant behavior and the vegetal heritage of human thought so as to affirm the potential of vegetation to resist the logic of totalization and to exceed the narrow confines of instrumentality Reconstructing the life of plants after metaphysics Marder focuses on their unique temporality freedom and material knowledge or wisdom In his formulation plant thinking is the non cognitive non ideational and non imagistic mode of thinking proper to plants as much as the process of bringing human thought itself back to its roots and rendering it plantlike Routledge Encyclopedia of Philosophy: Index Edward Craig,1998 Volume seven of a ten volume set which provides full and detailed coverage of all aspects of philosophy including information on how philosophy is practiced in different countries who the most influential philosophers were and what the basic concepts are **The Routledge**
