Architectural Visions:

Architectural Visions Jean Ferriss Leich, Hugh Ferriss, 1980 From the Chicago Tribune Competition and the Chrysler Building to the United Nations headquarters and Lincoln Center for the Performing Arts the drawings of Hugh Ferriss record a period of time in the history of architecture which has seen remarkable change in our conception of cities and buildings Trained as an architect in the Beaux Arts tradition Ferriss chose instead to devote the greater part of his career to giving shape and life to the dreams and visions in his own mind and in the minds of other now famous architects for whom he worked In one broad sweep we see through one man's eyes an astonishing record of 20th century ideas and designs in architecture from book jacket

The Method Framework for Engineering System Architectures Donald G. Firesmith, Peter Capell, Dietrich Falkenthal, Charles B. Hammons, DeWitt T. Latimer IV, Tom Merendino, 2008-11-20 Offering a practical way to generate effective and efficient project specific system architecture engineering methods this volume addresses the entire range of systems architecture including hardware software subsystems and systems of systems It defines a set of architectural roles and teams and provides a repository of reusable architectural engineering process components to develop high quality system architectures It examines a cohesive set of tailorable tasks and components steps for producing associated architectural work products and establishes a recommended set of industry best practices for engineering the architecture of software intensive systems

Utopias and Architecture Nathaniel Coleman, 2007-05-07 Utopian thought though commonly characterized as projecting a future without a past depends on golden models for reinvention of what is Through a detailed and innovative reassessment of the work of three architects who sought to represent a utopian content in their work and a consideration of the thoughts of a range of leading writers Coleman offers the reader a unique perspective of idealism in architectural design With unparalleled depth and focus of vision on the work of Le Corbusier Louis I Kahn and Aldo van Eyck this book persuasively challenges predominant assumptions in current architectural discourse forging a new approach to the invention of welcoming built environments and transcending the limitations of both the postmodern and hyper modern stance and orthodox modernist architecture

Builders of the Vision Daniel Cardoso Llach, 2015-06-05 Builders of the Vision traces the intellectual history and contemporary practices of Computer Aided Design CAD and Numerical Control since the years following World War II until today Drawing from primary archival and ethnographic sources it identifies and documents the crucial ideas shaping digital design technologies since the first numerical control and CAD systems were developed under US Air Force research contracts at MIT between 1949 and 1970 the cybernetic theorization of design as a human machine endeavor the vision of computers as perfect slaves taking care of the drudgery of physical labor the techno social utopias of computers as vehicles of democracy and social change the entrepreneurial urge towards design and construction integration and the managerial ideologies enabling today's transnational geographies of practice Examining the contrasting and often conflicting sensibilities that converge into CAD

and BIM discourses globalism utopianism entrepreneurialism and architects desires for aesthetic liberation Builders of the Vision shows that software systems and numerically controlled machines are not merely instruments or tools but rather versatile metaphors reconfiguring conceptions of design materiality work and what it means to be creative Crucially by revealing software systems as socio technical infrastructures that mediate the production of our built environments author Daniel Cardoso Llach builds a strong case for the fields of architecture media and science and technology studies to critically engage with both the politics and the poetics of technology in design Builders of the Vision will be essential reading for scholars and practitioners across disciplines interested in the increasingly complex socio technical systems that go into imagining and building of our artifacts buildings and cities *Model-based Systems Architecting* Daniel Krob,2022-06-28

Model based Systems Architecting is a key tool for designing complex industrial systems It is dedicated to the working systems architects engineers and modelers in order to help them master the complex integrated systems that they are dealing with in their day to day professional lives It presents the CESAMES Systems Architecting Method CESAM a systems architecting and modeling framework which has been developed since 2003 in close interaction with many leading industrial companies providing rigorous and unambiguous semantics for all classical systems architecture concepts This approach is practically robust and easy to use during the last decade it was deployed in more than 2 000 real system development projects within the industry and distributed to around 10 000 engineers around the globe **French Architectural and**

Organization and Pedagogy of Complexity Jacques Printz,2023-08-29 Organization and Pedagogy of Complexity deals with real systems their architecture and speaks of those who design develop and maintain them After a summary of the architecture proposed by Daniel Krob president of CESAMES in Paris France the book focuses on the sensor and effector equipment that routes and converts the system s information to the place where it is processed These are the equivalent of the system s sense organs It also analyzes the roots of complexity from the perspective of combinatorics in real systems everything comes down to cases and or configurations being validated in greater or lesser numbers but which must be kept under control This book presents two case studies giving a global vision of complexity Finally it presents a prospective approach that brings the engineering of artificial systems closer to that of biological systems based on first hand information provided by Philippe Kourilsky Emeritus Professor at the Coll ge de France **Posthumanity: Merger and Embodiment**

taught the book of Ezekiel for thirty years in seminary and in the church He skillfully opens the prophet s message about God s presence covenant victorious rule concern for the nations and cleansing for worship and obedience The wheel and dry

bones are not just for entertainment This actor singer and instrumentalist is prophesying to a battered people who need the word of the Lord for survival and mission God has called Ezekiel to be a sentinel for his people to warn them of pending danger They must not look back to unjust Jerusalem nor join a revolt against Babylon Instead they are to turn and live by God's law even in a foreign land After judging the nations and Jerusalem God will restore Israel to a renewed land The people will be given a new heart and spirit a resurrection God will defeat international terror and organize Israel as a new temple community with the Lord in their midst Then all will know that God leads world history not by militarists but through a people serving as a moral exemplar for the nations Free downloadable study guide available here *Digital Cities* Neil

Leach,2009-08-31 Guest edited by Neil Leach What is the impact of digital technologies on the design and analysis of cities For the last 15 years the profound impact of computer aided techniques on architecture has been well charted From the use of standard drafting packages to the more experimental use of generative design tools and parametric modelling digital technologies have come to play a major role in architectural production But how are they helping architects and designers to operate at the urban scale And how might they be changing the way in which we perceive and understand our cities Features some of the world's leading experimental practices such as Zaha Hadid Architects R Sie n Biothing and Xefirotarch Takes in exciting emerging practices such as moh architects kokkugia and THEVERYMANY and work by students at some of the most progressive schools such as the AA Dessau Institute of Architecture and RMIT Contributors include Michael Batty Benjamin Bratton Alain Chiaradia Manuel DeLanda Vicente Guallart and Peter Trummer **Visualizing the Past in Italian**

Renaissance Art Jennifer Cochran Anderson,Douglas N. Dow,2021-03-22 The essays in Visualizing the Past in Italian Renaissance Art address a foundational concept that was as central to early modern thinking as it is to our own that the past is always an important part of the present Written by the friends students and colleagues of Dr Brian Curran former professor of Art History at the Pennsylvania State University these authors demonstrate how reverberations of the past within the present are intrinsic to the ways in which we think about the history of art Examinations of sculpture painting and architecture reveal the myriad ways that history has been appropriated reinvented and rewritten as subsequent generations including the authors collected here have attained new insight into the past and present Contributors Denise Costanzo William E Wallace Theresa A Kutasz Christensen Ingrid Rowland Anthony Cutler Marilyn Aronberg Lavin Louis Alexander Waldman Elizabeth Petersen Cyron Stuart Lingo Jessica Boehman Katherine M Bentz Robin L Thomas and John Pinto

Public History and Culture in South Africa Ali Khangela Hlongwane,Sifiso Mxolisi Ndlovu,2019-04-11 The post apartheid era in South Africa has in the space of nearly two decades experienced a massive memory boom manifest in a plethora of new memorials and museums and in the renaming of streets buildings cities and more across the country This memorialisation is intricately linked to questions of power liberation and public history in the making and remaking of the South African nation Ali Khangela Hlongwane and Sifiso Mxolisi Ndlovu analyse an array of these liberation heritage sites including the Hector Pieterse Memorial and Museum the June 16 1976

Interpretation Centre the Apartheid Museum and the Mandela House Museum foregrounding the work of migrant workers architects visual artists and activists in the practice of memorialisation As they argue memorialisation has been integral to the process of state and nation formation from the pre colonial era through the present day Teletechnologies, Place, and Community Rowan Wilken,2014-02-07 Teletechnologies or technologies of distance cannot be ignored Indeed the present electronic age is said to have wrought profound changes to how we think about and experience who we are where we are and how we relate with one another Place and community have traditionally formed key concepts for thinking about these issues but what relevance do these concepts now hold for us In this wide ranging study Wilken re evaluates how ideas of place and community intersect with and help us make sense of a world transformed by information and communication technologies This interdisciplinary investigation ranges across diverse textual and contextual terrain exploring approaches from media and communications architectural history and theory philosophy sociology geography literature and urban design The rich analysis of these myriad texts reveals the complex and at times contradictory ways in which notions of place and community circulate in relation to these technologies of distance Wilken s examination underscores both the enduring importance of ideas of place and community in the present age and the urgent need to continue to engage with think about and reconfigure these twin ideas Glass Skyscrapers Maya Iyer,AI,2025-02-19 Glass Skyscrapers explores the evolution of skyscraper design charting the shift to glass exteriors and their impact on urban environments The book examines how glass facades became a defining feature of modern cities driven by advancements in materials science and a desire for transparency It reveals that the adoption of glass signifies a fundamental change in our interaction with the built environment For instance early skyscrapers faced material limitations with steel and masonry issues that glass exteriors helped to overcome which supported the growing need for office spaces The book begins by laying the groundwork with core concepts like structural glazing and curtain wall systems It then journeys through architectural history comparing early experiments like the Crystal Palace to modern marvels such as the Burj Khalifa The book evaluates how architectural styles and technological capabilities developed together The book also addresses the challenges of energy efficiency and environmental sustainability in contemporary glass skyscraper design Ultimately this book offers a balanced perspective on glass skyscrapers acknowledging both their benefits and drawbacks It emphasizes the importance of sustainable and human centered design in the future making it a valuable resource for architects urban planners and anyone interested in understanding how buildings shape our world **Boom Cities** Otto Saumarez Smith,2019-03-21 Boom Cities is the first published history of the profound transformations of British city centres in the 1960s It has often been said that urban planners did more damage to Britain s cities than even the Luftwaffe had managed and this study details the rise and fall of modernist urban planning revealing its origins and the dissolution of the cross party consensus before the ideological smearing that has ever since characterized the high rise towers dizzying ring roads and concrete precincts that were left behind The rebuilding of British city centres during

the 1960s drastically affected the built form of urban Britain including places ranging from traditional cathedral cities through to the decaying towns of the industrial revolution *Boom Cities* uncovers both the planning philosophy and the political cultural and legislative background that created the conditions for these processes to occur across the country *Boom Cities* reveals the role of architect planners in these transformations The volume also provides an unconventional account of the end of modernist approaches to the built environment showing it from the perspective of planning and policy elites rather than through the emergence of public opposition to planning
