Architecture The Subject Is Matter:

Architecture Jonathan Hill, 2001 The aim of this book is to expand the subject and matter of architecture and to explore their interdependence There are now many architectures This book acknowledges architecture far beyond the familiar boundaries of the discipline and reassesses the object at its centre the building Architectural matter is not always physical or building fabric It is whatever architecture is made of whether words bricks blood cells sounds or pixels The fifteen chapters are divided into three sections on buildings spaces and bodies which each deal with a particular understanding of architecture and architectural matter The richness and diversity of subjects and materials discussed in this book locates architecture firmly in the world as a whole not just the domain of architects In stating that architecture is far more than the work of architects this book aims not to deny the importance of architects in the production of architecture but to see their role in more balanced terms and to acknowledge other architectural producers Architecture can for example be found in the incisions of a surgeon the instructions of a choreographer or the movements of a user Architecture can be made of anything and by anyone

Philosophical Hermeneutics and the Architecture of Álvaro Siza Sally J. Faulder, 2024-12-30 This book presents an original study of the work of Pritzker Prize winning Portuguese architect Álvaro Siza from the perspective of architecture as an interpretation of human life It combines philosophical hermeneutics narrative textual description and history and theory research to provide a rich account of Siza's work The book gives a detailed analysis of three of Siza's works from this perspective the Tidal Pool Piscina das Marés in Leça da Palmeira Portugal the Galician Centre of Contemporary Art Centro Galego de Arte Contemporánea in Santiago de Compostela Spain and the Santa Maria Church in Marco de Canaveses Portugal This form of analysis provides insight into the unique temporal dimension of Siza's work both in the memory inscribed by the structure and in how what is inscribed is revealed by degrees to those who come into contact with it Drawing on Hans Georg Gadamer and Paul Ricoeur this book defines both building and inhabiting as acts of

interpretation Through employing the technique of writing architecture as a mode of phenomenological description the book uses one form of creative configuration narrative to draw out the meaning inscribed in another form of creative configuration architecture The book contributes a unique perspective to scholarship on Siza and an in depth study to the growing field of hermeneutics of architecture It will be of interest to researchers and students of architecture and philosophy

Model-based Reasoning about Learner Behaviour

Kees de Koning, 1997 Simulators are becoming standard equipment for interactive learning environments They allow for attractive teaching with a large degree of freedom for the learner However without proper guidance the learner easily gets lost in a simulation environment Providing guidance requires an image of what the learner is doing Acquiring this image by diagnosing the behaviour of the learner is a complex and resource intensive task for which yet no general approach exists In this book we apply existing ideas and techniques from the field of model based reasoning and diagnosis to interactive learning environments We present a framework for subject matter modelling and diagnosis of learner behaviour The framework defines generic techniques for automatically generating subject matter models from qualitative simulations A generic model based engine employs these models for diagnosing the learner s behaviour The framework provides a powerful and reusable approach to individualising guidance in educational systems

Embracing the Melody of Appearance: An Psychological Symphony within **Architecture The Subject Is Matter**

In some sort of eaten by monitors and the ceaseless chatter of fast interaction, the melodic beauty and mental symphony produced by the prepared word frequently disappear into the backdrop, eclipsed by the persistent sound and disruptions that permeate our lives. Nevertheless, nestled within the pages of **Architecture The Subject Is Matter** a charming literary value full of raw thoughts, lies an immersive symphony waiting to be embraced. Crafted by a wonderful musician of language, that charming masterpiece conducts viewers on a psychological trip, well unraveling the hidden songs and profound influence resonating within each carefully constructed phrase. Within the depths of the poignant analysis, we can explore the book is central harmonies, analyze its enthralling publishing type, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
